10. SIGNIFICANCE (use additional sheet if necessary):

a. Architect/Builder/Engineer:  
unknown

b. Style/Period: log house/

pre-Civil War

c. Date(s): 1930's

In terms of agriculture and architecture, the Cunningham House, granary and food cellar reflect traditional central West Virginia subsistence farming techniques which have existed relatively unchanged for over one hundred years. The house is a well-preserved log structure sided with white clapboard, one of the oldest and best preserved log structures in Braxton County.

The granary and food cellar are architecturally significant because they date to the mid 1800's and show excellent craftsmanship and quality design elements which are not present in more recent structures
