

United States Department of the Interior National Park Service
NATIONAL REGISTER OF HISTORIC PLACES REGISTRATION FORM

1. Name of Property FIDLER'S MILL

historic name: _____
other name/site number: _____

2. Location

street & number: HEASTON RIDGE ROAD Not for publication: N/A
city/town: ARLINGTON vicinity: N/A
state code: WV county: UPSHUR code: 097 zip code: 26234

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this x nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property x meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide x locally.

William C. Kinnaman 10/1/97
Signature of Certifying Official Date

State or Federal agency and bureau Date

In my opinion, the property meets does not meet the National Register criteria. (See continuation sheet for additional comments.)

Signature of Certifying Official/Title Date

State or Federal agency and bureau

4. National Park Service Certification

I, hereby certify that this property is:

	Signature of Keeper	Date of Action
<u> </u> entered in the National Register <u> </u> See continuation sheet.	_____	_____
<u> </u> determined eligible for the National Register <u> </u> See continuation sheet.	_____	_____
<u> </u> determined not eligible for the National Register	_____	_____
<u> </u> removed from the National Register	_____	_____
<u> </u> other (explain): _____	_____	_____

5. Classification

8. Statement of Significance

=====

Applicable National Register Criteria

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "X" in all the boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET

Fidler's Mill Upshur County, WV
Section number 7 Page 2

Fidler's Mill is located on the north bank of the Little Kanawha River along a portion of the river known as Arlington Falls. The mill was a local source for grinding grain and carding wool in the Arlington and Rock Cave area of Upshur County. The two-story front elevation is immediately adjacent to the roadway, however, the rear portion is four stories as it drops from the embankment to reach the river.

The frame building is yellow poplar, the siding on the upper floors having been replaced with matching clapboard over the years due to deterioration and weathering. The top two stories are horizontal clapboard, while the floor above the stone foundation is vertical planks. The building was enlarged when another floor was added in 1916. The former sawmill adjacent to the mill provided the lumber.

The front elevation has double doors, slightly off center with each floor having two 4/4 double-hung sash windows. There is a metal overhang across the first floor of the building over a wooden plank sidewalk. The building has a gable metal roof with a front gable end. The sides of the building also have 4/4 sash windows with the rear elevation having two 4/4 double-hung sash windows. The lowest level (stone foundation) cannot be accessed from the interior of the building, but through a rough opening in the east side of the foundation.

The interior of the building is intact with post and beam construction, wooden floors and wood sided walls. The mill equipment had the capability of powering two mill stones to provide ground wheat and corn simultaneously. The metal gears, wooden chutes with glass view holes, wooden hoppers, and leather belts are still in place. The metal gears have various patent dates of 1779, 1882, and 1892. Painted inscriptions on the lower level machinery read: "EUREKA' PATD MAR 16, 1858/REISSUED MAR 5, 1872/EXTENDED MAR 16, 1872/PTD FEB 22, 1859 & FEB 23, 1861/REISSUED OCT 31, 1865/ & SEPT 12, 1871/PATENTED IN GREAT BRITAIN/ JULY 23, 1872". Above the bagging apparatus it reads: "No.0/CAPACITY/10-15 BUSH. per HOUR".

The second floor still has the wool carding machines which were used seasonally. After sheep shearing, the wool was cleaned and brought to the mill. The machinery would "pick the wool into a fluff, whirl it into long rolls about two feet long and about 1/2 inch thick. It was then ready for the spinning wheel". Family members remember using the wool to spin, and then weave blankets.

The mill building well represents the mill industry in Upshur County. The building grew on its foundation over time and has retained the early milling equipment from the late 19th century.

**NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET**

Fidler's Mill Upshur County, WV
Section number 8 Page 2

Fidler's Mill is significant under Criterion A for the local milling industry in Upshur County; Criterion B for the Fidler family, especially William Fidler who constructed the mill in 1847, his son William M. Fidler, grandson Hudson, and great-grandson Russell Fidler; and Criterion C for the Architecture of the mill building.

Upshur County histories recount the many mills which sprang up as the county was settled, for they supplied the much needed grain for families and livestock. Many of these mills have disappeared over the years, due to deterioration, or fire. The first mill on the Arlington site was built in 1821 by Daniel Peck. It was a small structure which sat on four posts.

In 1847, William Fidler emigrated from Fluvanna County, Virginia. After a year in Buckhannon, he purchased a 200 acre farm in Arlington which included the mill property. Fidler enlarged the mill in 1849 with the help of several slaves, and his family. The slaves are reported to have helped lay the present stone foundation and run the mill operations.

The mill's power came from a dam located a short distance upstream. A turn of the century photograph shows a wooden mill race that diverted water from the stream to power a twenty foot overshot wheel. This engaged the gears and shafts to power the two stone burr's, or mill stones, which were ordered from France for \$100. The race also powered a saw mill which stood a short distance upstream from the mill. The same photo depicts the sawmill as a ramshackled wooden plank structure with plank roof and open sides along the bank. By 1920, the sawmill had moved farther downstream and was run by Robert Fidler.

After the death of William in May 1865, his son William Martin Fidler, took over the operation and ran the mill until his death in 1901. The mill was sold at that time to a E.G. Wilson, who enlarged the mill, adding the second floor for its present configuration. After several years Wilson ran into financial difficulties and the mill was sold back to the Fidler family, namely Hudson V. Fidler. Hudson continued the milling operation with the help of his son Russell. Local residents recall the barber chair which used to sit near the doorway of the mill. Russell often cut hair for local residents as they waited for their milling order. By the 1920s Hudson had given a half interest in the property to his son, Russell, and a 1/4 interest to sons, Henry and Glen. Later, Russell received Henry's interest in the 1930s, and Glen's in 1967.

During the period of 1847 to 1942, Fidler's Mill provided ground wheat and buckwheat for flour, and ground cornmeal. They also made feed for horses, cattle and other animals. The mill was a social gathering spot for nearby residents as they waited their turn to have their grain ground for flour or meal. Family members and residents recall yearly Halloween dances on the wooden floor of the mill, when leaves were gathered and strewn on the floorboards.

The mill continued its water powered operation through the depression years of the 1930s, until a flood along the river washed the dam out in 1942. Operation ceased for several years, and after World War II the family purchased a Hammermill machine which continued to provide

cornmeal for local families, as the demand for wheat, buckwheat and rye had dropped off. The mill was sold to the Grafton Coal Company in 1978, who gave the property to the Southern Upshur County Business Association (SUBA) in 1988.

The mill served the nearby residents of Arlington, and surrounding Upshur County, through much of the 19th and 20th century. It provided a convenient service, both for the grinding of grain and for wool carding.

Fidler's Mill well represents the early milling industry of Upshur County. Many of these structures have been lost in the county in recent years including the Buckhannon Mill, and Tinney's Mill. The integrity of the mill and machinery is excellent, depicting the methods used by an overshot wheel during the late 19th century.
