**8. Statement of Significance**

---

---

**Applicable National Register Criteria**

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield information important in prehistory or history.

**Criteria Considerations**

(Mark "X" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

NATIONAL REGISTER OF HISTORIC PLACES CONTINUATION SHEET

Greenmont Historic District  
Name of Property

Monongalia County, West Virginia  
County/State

Section 7

Page 1

---

There are three buildings within the proposed Historic District that have been previously listed on the National Register of Historic Places. Site #0174, Kern's Fort (Michael Kern's Cabin) was listed on the register in April of 1993 with 1 contributing resource. Site #0265, the Hackney Place was listed on the register in July of 1999 with 1 contributing resource. Site #0460, the Second Ward Negro Elementary School was listed on the register in July of 1992 with 1 contributing resource.

The proposed historic Greenmont district contains approximately 74.9 acres and is located in the Second Ward of Morgantown, West Virginia. Greenmont lies southeast of downtown Morgantown and across Decker's Creek on part of a 600-acre tract of land acquired by Michael and Susan Kerns circa 1772. Kerns Fort at 305 Dewey Street, which was listed on the National Register of Historic Places in April 1993, was the site of one of Morgantown's earliest and largest forts erected by Michael Kern on his property at the beginning of Dunmore's War in 1774. This site has only one extant small building now used as a rental property. The site was memorialized in 1927 with a cut stone marker with a bronze plaque dedicated to Kerns Fort by the Elizabeth Ludington Hagans Chapter of the Daughters of the American Revolution.

The Greenmont nomination is primarily residential but has clusters of commercial buildings on Brockway, Decker and Wilson Avenues. The nominated area is bound on the east by Front Street and Arlington Street, on the north by Decker Avenue, on the west by Kingwood Street and on the south by White and Posten Avenues. The main interior streets within the nomination are Green and Arch Streets, which intersect at right angles. The nomination is contiguous along Kingwood Street to the Morgantown South Park neighborhood, listed on the National Register of Historic Places in July of 1990 with 506 contributing resources.

The terrain of the proposed district is composed of steep hills ascending from Decker's Creek to a flat plateau encompassing Green and Arch Streets. The district's resources are set on small city lots that were laid out in several plats or additions developed from the late 1880s into the 1920s. (See Map section.) The neighborhood is densely populated and, except for Arch and Green Streets, has paved, narrow streets and alleys. Reay Alley has residential houses, but other alleys are primarily used to access garage/garage apartments built on the rear of properties. Green Street is a wide avenue between Cobun Avenue and Wilson Avenue with period street lights on both sides of the street. Arch Street has a maple tree lined, grassy divider about six feet wide down the center of its 400 and 500 blocks. Anecdotal information

indicates that Arch Street was part of the race track for the county fairs held in Greenmont in the 1860s and 1870s.

Greenmont had few homes until a metal pony truss bridge was constructed across Decker's Creek in 1900-1901. Until then, a covered wooden bridge provided the only access from downtown Morgantown. The early settlement was concentrated on Green and Arch Streets but most Greenmont homes were constructed from 1901-1925 and are frame construction with brick or wood facades. Most are modest two or two and one-half stories with plain front gables or American Four Squares. Other styles found in the neighborhood include Bungalows, Colonial Revival, Queen Anne, Dutch Colonial, Gothic Revival, Beaux Arts, Commercial and Mediterranean Revival. The Queen Anne houses in Greenmont have few decorative elements. Greenmont buildings include three large apartment buildings and houses converted into apartments by landlords who live outside the neighborhood. Greenmont had many small businesses, most converted in the past twenty years to garages or apartments. Greenmont was a working class neighborhood and has few high style homes or commercial buildings.

Greenmont was a separate town from 1899-1901 when it was incorporated into the city of Morgantown. The neighborhood developed commercial establishments and businesses separate from Morgantown despite the closeness of the Morgantown downtown because many Greenmont residents walked to work in the Marilla and Sabraton suburbs of Morgantown, just over the hill from Greenmont's north eastern boundary. These suburbs were home to several industrial plants, which provided employment to Greenmont residents.

Commercial establishments thrived in Greenmont because they provided residents easy access to groceries and basic household goods since many residents did not own cars. During the late 1920s and early 1930s, Greenmont had at least eleven grocery stores, meat markets, bakeries or confectionaries, ten or eleven auto repair shops, barber shops, restaurants and a pool halls. Another seven grocery stores were located just outside the Greenmont nomination boundaries.

Many Greenmont residents during those years were immigrants from Italy, and various other countries including Greece and Wales, although immigrants from Italy predominated. The immigrants attempted to recreate their home villages or at least the atmosphere of villages in Greenmont. The women shopped on a daily basis for fresh produce, meats and breads, which gave them opportunities to chat with neighbors. Most building lots were too small for gardens, although many residents were inventive in growing at least some vegetables and berries for summer eating and canning. Grape growing and wine making was reported to have been profitable for several residents, even during the Prohibition era. In the early years in Greenmont, attics and extra rooms were rented out, usually to new immigrants who might be cousins or friends of family from back home. The first garages were generally built as garage

Monongalia County, West Virginia  
County/State

Section 7

Page 3

---

apartments for the same reason.

Customers of similar ethnic backgrounds in Monongalia and Preston Counties came to Greenmont to patronize the business establishments via street car or bus and later in automobiles. Streets and sidewalks were busy, and well populated, especially on Saturday. Brockway Avenue was the busy main road that connected Greenmont with Marilla, Sabraton, and downtown Morgantown. Brockway had parking along its right side so people could patronize the commercial establishments in the 400 and 500 blocks. Coal trucks with their dust and noise were a constant annoyance to residents living along Brockway, which on a busy day could experience unpleasant traffic jams.

The commercial and business establishments in Greenmont generally fell into two categories. Utilitarian, flat roof, brick commercial buildings erected specifically for a commercial purpose, most with living quarters in their upper stories. The second category included residential additions built to house grocery stores or small businesses. The 600 block of Elmina Street, the 400 and 500 blocks of Wilson Avenue, Cherry Street, Kingwood Street and Brockway Avenue each had several businesses. Greenmont experienced a change in usage of many buildings after more residents began buying cars in the 1940s and started shopping in other places or moving to more upscale sections of Morgantown. Buildings originally used as commercial establishments were renovated to accommodate residential rentals. Prominent names involved in Morgantown commercial ventures today, such as Bossio and Lorentz, started as small family businesses in Greenmont.

Greenmont had an African-American neighborhood along White Avenue that was established earlier than the rest of Greenmont. Well-to-do African-American entrepreneurs bought land, built homes and established commercial enterprises. A sixteen room house, site # 0458 on White Avenue, opposite the Second Ward Negro Elementary School, was used to house African-American students for nearly ten years before the school was built in 1939. A beauty shop that catered to African Americans was located for more than 30 years in a combined commercial and residential building at 446 Wilson Avenue just around the corner from White Avenue.

Of the three resources listed individually on the National Register of Historic Places within the proposed district, one is the above mentioned former school building. The Second Ward Negro Elementary School, located on White Avenue, was listed in July 1992. The building, which opened in 1939, is a two story flat roof, rear facing T-shaped, red brick building with a center chimney. Monies from the Federal Emergency Administration of Public Works were used to build the school. The school was used as an annex to Second Ward School on Wilson Avenue in Greenmont after the 1954 Supreme Court decision banning "separate but equal schools." The Monongalia County Board of Education donated the annex to the community after the Second Ward School was closed in 1992.

Greenmont contains another former school building. Second Ward School, which opened in 1910, is a two-story, buff brick building with an elevated cut stone foundation that sits on an eminence on the south side of the 400 block of Wilson Avenue. The building, which has cut stone sills and lintels, looks down onto the Greenmont neighborhood. A one-story, buff brick addition was added to the building's east facade in 1939. The school's grounds were very small and its playground was reached via an iron

bridge to a separate small lot. The school closed in 1992 and was bought at auction by a Greenmont businessman who sympathetically remodeled the building into apartments and the playground into a parking lot. Across Wilson Avenue from the school building is a mixed commercial and residential block of red brick buildings.

The proposed district has two extant churches, site #0235, the Jones United Methodist Church on Green Street and site #0015, the Reformation Orthodox Presbyterian Church on Arch Street. The Green Street church's original building, constructed in 1908 as a residence, is a two-story, red brick, American Foursquare with hip roof dormers on the front and side facades and a cut stone foundation. Unfortunately modern additions, a porch enclosure and replacement windows make this building non-contributing. The Arch Street church is a small building with steep front gable, gothic shaped chapel windows, including a large leaded window with a sun design, and bell tower. The church was built in 1931 by Clay Warman, a Morgantown carpenter, for the Christian and Missionary Alliance Church. The church is in excellent condition although its wood siding was recently covered with vinyl siding.

Several stone masons who worked for Thoney Pietro, a well-known, local stone mason and builder, lived in Greenmont. Some of them embellished their homes with works of stone folk art. Examples of Pietro's work are exemplified in sites #0259, #0260, #0261, #0347, #0348 and #0397. Site #0394 was built by James Pietro, brother of Thoney. There are many stone retaining walls throughout the Greenmont area very similar in structure and style that can probably be credited to Pietro's stone masons. The curbs flanking most of the streets are also constructed from cut stone. Site #0095, 233 Cherry Street has four decorative stone boundary pillars across the front property line and site #0450, 436 White Avenue displays a decorative stone balustrade on the full length front porch.

The proposed Greenmont historic district contains 409 contributing buildings, 158 non-contributing buildings, 4 contributing structures, 2 non-contributing structures and 1 contributing object. The complete list of resources is listed below.

#### LIST OF SITES

##### Alma Street

##### 0001. 608 Alma Street , residential

date: ca. 1924

description: Two and one half story, Gable-Front house with asphalt shingle roof and a shed roof dormer on the east elevation. **0063. 530 Brockway Avenue, commercial/residential - B & L Interiors /apartments**

date: ca. 1923/1938

description: Three-story, Commercial style building with a flat roof, red brick façade, 1/1 double-hung sash metal and wood windows and a poured concrete foundation. This building is actually two connecting buildings. The building on the east elevation has a date plaque in the cornice that reads, "1923" and above the entrance door to the second and third floor apartments there is an engraved stone plaque that reads, "BIAFORA". The westernmost building has a central entrance door flanked by display windows on the first floor. The kickpanels are brick header rows capped with a single rowlock row. The kickpanels in the easternmost building are the same brick header rows capped with a single rowlock row on the two storefronts located there. Two-story porch on rear elevation with modern metal railings. Concrete steps with iron pipe railing and concrete block foundation on the north elevation lead to east elevation for entry to apartments on second and third floors. Poured concrete wall with iron pipe railing surrounds parking area adjacent to building's east elevation. 4 X 2 bays. The building on the easternmost side was built in 1923 and housed a grocery store and barber shop until the second building was constructed to expand the space. The grocery store then became affiliated with the Clover chain of grocery stores. The family that built the building lived upstairs.

description: Thoney Pietro's third home. Two and one-half story, hip roof, Tudor Revival style house with asphalt shingle roof, large interior brick slope chimney between two hip roof dormers on the south elevation. The house has a buff colored brick façade laid in a common bond and a cut stone foundation. The building is rectilinear in form and irregular in plan with a multiple roof system which incorporates a main roof which is intersected by a jerkinhead-gabled roof over a projecting wing on the right side of the façade. The roof slopes beyond the plane of the main portion of the house on the south elevation

and shields an original sunroom with multiple windows. Two projecting rectangular bays extend forward on the north and south ends of the façade. The main entrance is centered on the façade and is recessed behind an arcaded single-bay loggia. All windows are flat-topped, with 6/1 and 4/1 windows. Extending across much of the façade is a piazza which formerly had an open railing with brick piers and curvilinear concrete balusters. Under the north end of the piazza is a one bay garage with a non-historic overhead door. The rear elevation is considerably less formally adorned than is the front façade and includes a recessed back porch, a projecting wing with a sunroom on the second floor and a dormer on the roof. 3 X 2 bays. Cut stone wall with grapevine joints surrounds the perimeter of the property line.

**0397. 10 Pietro Street, residential - apartments**

date: ca. 1910

description: This building was originally the Sons of Italy Lodge, then the Moose Lodge and presently houses the Pietro Street Lofts/Upscale Urban Living and was built by Thoney Pietro. Three-story, flat roof, Beaux Arts style building with red brick on the rear and side elevations with a front façade of ornamental orange brick. The front portion of the building is "H" shaped and joins the longer, rectangular shaped flat roof, rear portion so the overall configuration is a rear facing "T" shape. The front section has a brick cornice, while the rear section has a simple corbeled brick cornice. The front façade consists of three bays with the central bay slightly recessed and having stone quoins. There is a central entrance with a segmented arched opening which has been altered to accommodate multi-tenant residential occupancy. Centered on the third floor is a segmental-arched motif. Other windows on this elevation are flat-topped with stone sills and capped with brick voussoirs with keystones. Windows on the side elevations are segmental-arched openings infilled with flat-topped window units. An open stairway is attached to the south elevation and a one-story masonry addition has been added to the north elevation. The building has a molded concrete block foundation. 3 X 5 bays.

Greenmont Historic District  
Name of Property

Monongalia County, West Virginia  
County/State

Section 8

Page 149

The Greenmont Historic District is significant under Criteria A for community development. This area was one of the first sites to be settled in what is now North Central West Virginia. From the late 1800's to the mid-20th century, Greenmont was one of the most ethnically diverse areas in Monongalia County. Greenmont is significant under Criteria C for its architecture, which is indicative of working class ethnic neighborhoods. Most of the houses are gable front or Four Square style with little or no decorative elements. The majority of the houses are two-story and large enough to accommodate the growing families of the ethnic residents in addition to relatives staying until they could build a home of their own. Greenmont is located in the Second Ward section of Morgantown, West Virginia and lies to the southeast of downtown Morgantown, across Decker's Creek.

Until the late 1700's the Morgantown area was used as hunting and fishing grounds for Native-Americans, mainly the Delaware and Mingo tribes. These tribes had hunting camps along Cobun Creek in what is now Monongalia County. Occasionally explorers and traders traveled through this area. After the end of the French and Indian War in 1763, settlers began crossing the mountains to inhabit western lands. This westward settlement brought the first people of European descent to this area.

The Greenmont area was originally part of Michael Kerns' 600 acre homestead settled in 1772. Kerns (also spelled Kearns and Carnes) immigrated to New York from Holland in the early 1770's. He then traveled to New Jersey and crossed into Pennsylvania. In Westmoreland County, Kerns married Susan Weatherholt before crossing the Cheat River into Virginia and settling in Morgantown.

Kerns acquired a large tract of land and built his cabin. The land at that time was unpopulated and virtually an unbroken forest. Two years earlier, in 1770 (some reports say 1772), Isaac Lemaster had built a cabin and claimed part of what is now Morgantown. Zackwill Morgan had been in this area as early as 1766, although he did not return on a permanent basis until 1774 when he purchased the Isaac Lemaster claim. Thus, Michael Kerns was perhaps the first permanent settler in the area that is now Morgantown. At the time of Lord Dunmore's War in 1774, there were only two families living in Morgantown, the Kerns and the Morgans.

The site of Kerns' cabin was an ideal place to build. The Kerns' cabin had a high vantage point, water source, Chestnut trees, and was located near a creek for transportation. This creek was later named Decker's Creek and flowed into the nearby Monongahela River. Kerns cleared the Chestnut trees from the

site and built his cabin.

The early 1770's were a time of peace between white settlers and Native Americans. However, this period of tranquility was short-lived with the beginning of Lord Dunmore's War in the spring of 1774. Around 1774 Kerns built a fort around his property in response to threats of attacks by the Delaware and Mingo tribes. Kerns' Fort was a stockade built near the area that later became the fairground in Greenmont. It was among the largest forts in the county and provided a safe haven for the residents of the area. The fort was also used as a stopping place for settlers moving into Monongalia County. New arrivals stayed inside the fort while building their own cabins.

The fort was used for defense during Lord Dunmore's War. Records indicate that there was no military use of the fort except when assisting settlers in fighting off Native Americans. One incident recorded states that settlers from Cobun's Fort fled to Kerns' Fort after being attacked by Native-Americans. Two settlers from Cobun's Fort, Miller and Woodfin, were killed in the attack. The other settlers from Cobun's Fort apparently made it safely to Kerns' Fort. Occasional attacks persisted until the signing of General Wayne's Treaty in 1775. The security provided by Kerns' Fort was used by settlers until the end of the Revolutionary War.

White settlers were also responsible for attacks on Native Americans. In 1774, one of the frequent Native American visitors to Kerns' Fort, Bald Eagle, was murdered. An account in Wiley's *History of Monongalia County* named Elijah Runner, William Hacker, and Jacob Scott as the murderers. An account in Veech's *The Monongahela of Old* credited John Ryan with the murder and Eli Morgan as Ryan's accomplice. Both accounts agreed that Bald Eagle was on his way to Kerns' Fort when he was killed along the banks of the Monongahela River. According to Wiley, after murdering Bald Eagle, Runner, Scott, and Hacker placed Bald Eagle in a boat with "a piece of johnnycake in his mouth and set him adrift on the Monongahela."

Michael Kerns was one of the first businessmen in the Morgantown area. He built the first grain mill in on Decker's Creek, and is credited with building the first public road in the county, the old Rock Forge Road. Kerns also owned the first boat operation in the Morgantown area; the Kerns' Boat Yard was located at the mouth of Decker's Creek on the Monongahela River. Kerns built flatboats for those wanting to settle in Kentucky. The boatyard was later used to carry farm products down the Monongahela River.

Michael Kerns sold most of his property along with his boatyard and mill to John Rogers in 1815. Michael Kerns died in 1833 and was buried in the Kerns' graveyard, one of the oldest cemeteries in the area. The cemetery was located near Kerns' Fort and was probably destroyed in the 1860's when the

area was converted into a fairground and racetrack. Reports from the time say the "graves of the dead were leveled down by the plow. Human greed for gain had no respect for the sleep of the honored Revolutionary dead." The last remaining building of Kern's Fort was placed on the National Register of Historic Places in 1993, site #0174, 305 Dewey Street. In 1927, the Daughters of the American Revolution placed a memorial stone with a bronze plaque on the site of Kerns' Fort at the corner of Arch and Dewey Streets. The plaque reads:

"This Tablet marks the site of Kerns' Fort  
Erected at the Beginning of Dunmore's War  
1774  
Placed by the Elizabeth  
Luddington Hagans Chapter  
Daughters of the American Revolution  
1927"

In the late 1860's, real estate developer, George M. Hagans, named the proposed district, Greenmont. The name came from the area's many hardwood trees and its location on a slope. In 1876, Greenmont, which consisted of 345 acres, (Core, Vol. III, page 266) was divided into town lots that were sold from \$70.00 to \$226.00 each. George M. Hagans operated the first real estate agency handling property in the Greenmont area.

Kerns' Fort was torn down in the late 1860's. On January 7, 1869, the Monongalia Valley Agricultural and Mechanical Society was incorporated for the purpose of organizing annual fairs above the site of the former Kerns' Fort. A grandstand and horse track were built on the "Flats," now known as Arch and Green Streets. Incorporators included many of Morgantown's most prominent citizens: William Wagner, Samuel Howell, Manliff Hayes, J.P. Shafer, W.T. Willey, E.C. Lazier, W.A. Hanway, W.P. Willey, J.M. Hagans, J.K. Durr, J.C. Wallace, L.S. Layton, A.L. Wade, and J.H. Hoffman and Company. The annual county fair ". . . was an occasion of social importance at the fairgrounds in a new section called Greenmont being developed by Morgantown's first real estate agent, ample space was provided for exhibits . . ." (*Morgantown Weekly Post*, September 21, 1872) Large crowds turned out for the fairs. The *Morgantown Weekly Post* reported on October 1, 1873 that, "On Friday the people poured into town by thousands, and by 9 o'clock a.m., the streets were jammed with horsemen and vehicles of all kinds. The enlivening strains of the Fairmont Cornet Band seemed to inspire the people with renewed vigor and animation, and a continual stream of 'living freight' wound its way to the Fair Grounds, until two o'clock p.m."

According to their programs, the fairs featured horse-racing, gambling, food, and music. Current residents said that horses were raced up Arch Street and that Arch Street's two-lane, grass and maple tree islands exist as a result of the former racing area. In addition to horse-racing, the fairs included livestock judging, brass bands, trotting matches, floral arranging, produce exhibitions and needlework

Page 152

---

contests. The "Manufacturers' Hall" had exhibits of leatherwork, carriage-making and other craft-related exhibits. The Monongalia Valley Agricultural and Mechanical Society disbanded in 1878. The Monongalia Agricultural Association, was incorporated to operate the fair on June 23, 1879. This organization sponsored the fair for three more years. After failing to make a profit, the fair in Greenmont closed in 1881. While the fairs drew large crowds, income did not meet expenses. The terrain allowed enterprising fair goers to sit on the hillsides surrounding the fairground and watch the activities for free. (*Weekly Post*, October 12, 1878)

After the fairs ended, the fairgrounds were used for baseball games. Every community and most churches and Sunday schools fielded teams. The popular sport had few playing fields in hilly Morgantown and teams coveted the opportunity to play on the flat fairgrounds. (Core, Vol. IV, page 360)

In 1885, the Greenmont area was divided into building lots. Stephen D. Hirschman, Dr. I. C. White's business partner, was the first man to place a block of Greenmont lots on the market. "The lot of land known as Greenmont situated on an eminence across Decker's Creek from town near the Fairgrounds was divided into town lots." (Core, Vol. III, page 702) The lots were laid out with wide streets and alleys. The public had their choice of lots at \$100.00 each in the new development, which was named the Houston and Hirschman Addition. In spite of local interest in developing Greenmont, population in the area remained sparse. By 1896 there were only a few homes on what are now White Avenue and Kingwood Street, and none in the Houston and Hirschman Addition.

Early Greenmont residents (Deed Book 6, page 374, 1869), C. L. Reay and his wife Mary deeded (Deed Book 43, page 331, 1896) "in natural love and affection to their daughter, Minnie Selby, (wife of Frank Selby, a bricklayer) . . . a parcel (119 Reay Alley) off the property upon which the parties now reside (31 Arch Street) . . . near the Old Fair Grounds and known as Greenmont, a suburb of Morgantown . . ."

Population growth was enough to precipitate an important event in Greenmont history. Greenmont residents decided that Greenmont should become a town and a vote was taken on February 18, 1899. Incorporation passed by a vote of 42 to 7. On February 20, 1899, the county court certified the vote, and Greenmont became a town. In March, town officials were elected. J.A. Powell was elected Mayor; W.E. Kerns, Recorder; and Lee Gidley, John Smith Frank Selby, Pierce Hess and Judd Zinn, Councilmen. (*New Dominion*, February 22, 1899)

Between 1870 and 1900, industry in Morgantown had expanded. Buggy-making and flour-milling operations had expanded due to the introduction of steam power. The industrial expansion was further quickened by the arrival of the B & O Railroad in the late 1880's. Slack water legislation to provide dams on the Monongahela River greatly improved water transportation to and from Morgantown by the 1870's, and the discovery of oil and gas in the western part of Monongalia County in the late 1880's completed the necessary components to foster industrial growth.

In 1900, Morgantown was on the edge of an industrial boom. Greenmont residents were looking to the future and the expanding industrial situation and residents of Durbannah (south Morgantown) and Seneca were ready to be consolidated with Morgantown. In 1901, Durbannah (First Ward), Greenmont (Second Ward), and Seneca (Fourth Ward) were incorporated into Morgantown. Greenmont included, "All territory within the town of Greenmont, north of Kingwood Pike and south of Decker's Creek." (*Evening Post*, January 21, 1901)

In 1906, the American Sheet and Tin Plate Mill opened in Sabraton. It was the largest industrial operation ever opened in the Morgantown area. Tin plate was made from pure steel billets and the bars were sent from the Steel Works in Pittsburgh for processing at the mill. The tin plate mill was constructed by Morgantown industrialist and developer, George Sturgiss, who had developed the Sabraton/Sturgiss City area of the county. The mill was under the management of the American Sheet and Tin Plate Company, whose president was C.W. Bray. Robert Skemp was the district manager, and William C. Lloyd was the general manager. At first, the Tin Plate Mill employed 300 people, but eventually 800 men and women would be employed at the plant. *Morgantown City Directories* from that era show that many Greenmont residents were "tin plate" workers.

Improved transportation led to greatly increasing industrialization in Monongalia County. Coal mines, glass factories, and the tin mill all added to the growth of both Morgantown and Greenmont. Many residents of Greenmont were employed at glass factories such as Seneca Glass Company, United States Window Glass Incorporated and the Marilla Window Glass Company. The 1906 *Acme City Directory* shows not only how many Greenmont residents were glass workers but that Green and Cherry Streets and White Avenue were the first streets in Greenmont to become heavily populated. Hoffman Dean, George Cluse, William Hoover, and Harry Thomas were glass workers and William Tobin was a glass blower; all of them boarded at 107 Green Street. William Chipps and Harry Chipps were glass workers who lived respectively at 120 and 128 Green Street. Cabata Dembotangelo, a glass worker, lived at 20 Cherry Street and R.W. Lawrence, glass worker, lived at 97 Cherry Street. B.S. Kinsey, glassworker, lived at 42 White Avenue and Anthony Cloe, a "colored" glass worker, boarded at 71 White Avenue. These three streets also exemplified the diversity of occupations, ethnic backgrounds, and women's roles of the Greenmont residents. H.L. Hogan, painter, lived at 112 Green, J.A. Powell, plasterer, at 108 Green, L.J. Holland, a "colored" barber at 95 Green, Claudia and Dennisse Debrocq, saleswomen, at 128 Green and Essie Selby, compositor at 120 Green. Luther Smith, worker for the Union Utility Company, lived at 91 Cherry Street and Lee Wells, carpenter, at 83 Cherry. Clarence Davis, M & K Railroad worker, lived on White Avenue as did Bert Holland, a "colored" plasterer. Emerson Blue, a "colored" waiter, and Thomas Blue, a "colored" plasterer, lived at 55 White Avenue. Joseph Widows, butcher, lived at 40 White Avenue, Lizzie Johnson, a "colored" seamstress and Callie Johnson, a "colored" cook, lived at 61 White and W.H. Ross, painter, at 4 White. As a harbinger of things to come, Arthur Wiedman, WVU student, boarded at 98 Arch Street.

On May 8, 1909, a bond issue for \$100,000.00 was submitted to Morgantown voters by the Morgantown Independent School District. The bond, which passed by a vote of 539 to 215, provided for the construction of four new schools, including Second Ward School. The school was built to provide needed classroom space for white children in South Park and Greenmont. Second Ward was constructed on the corner of Kingwood Street and Wilson Avenue in 1910.

Area coal companies also provided employment for Greenmont residents. By 1925, the coal industry was one of the largest employers in the area. The coal industry employed 6,614 men at 83 mines by the mid-1920's.

Increasing industrialization in Morgantown increased demand for labor and many workers were immigrants and Greenmont, along with Sabraton and Seneca, became residential districts for the immigrant workers and their families. Greenmont was home to immigrants from Italy, Slovenia, Greece, Poland and other countries, although most of Greenmont's immigrant population came from Italy. The 1890 census listed two Italian immigrants in Monongalia County but by the 1920 census that number was 802. Twenty five per cent of the county's 3,279 residents were from other countries. (Core, Vol. IV, pages 531-534) Often immigrants came to the Morgantown area to work in one of the local factories, but some ended up running their own businesses such as Emilio Ferrara.

Emilio Ferrara worked at the American Sheet and Tin Plate Company in Sabraton when he and his wife, Filomena, first immigrated to Morgantown from Italy in 1912. While working at the mill, Ferrara started selling produce from the back of a horse-drawn wagon. He then sold produce from several locations on Kingwood Street before building a buff brick commercial building with art deco embellishments at 455 Wilson Avenue, circa 1921, which he used as a grocery store and residence, site #0470. He moved across to the corner of White and Wilson Avenues and built a second larger building for his store, which had four rental apartments on the two upper floors in 1925, site #0471. The red brick store building with buff brick facade was an expensive undertaking, and is the only corner-built commercial building in Greenmont. Filomena Ferrara felt they could use a bit of good luck so, when the store was constructed, she embedded two new silver dollars in the front steps for luck. The Ferraras did a good business from local and Preston County Italian customers. Unfortunately, the silver dollars did not protect Ferrara's store from the Depression and the store closed in 1929. Soon afterward the Ferraras reopened in a new location on Kingwood Street. The Ferraras operated this store until 1954 when their son, Emil, opened the Crestholm Pharmacy.

A new metal bridge over Decker's Creek was built in 1899. The construction of this bridge was considered a significant improvement in transportation for residents of Greenmont. The *Evening Post* reported on June 18, 1900, "It is the most stupendous piece of engineering ever attempted here." The bridge made it possible for the residents of Greenmont to travel easily to downtown Morgantown. Until then, the only way across the Decker's Creek ravine was via a covered wooden bridge behind and below

---

the old Monongalia Academy on Walnut Street. (*Weekly Post*, August 20, 1881)

With the population of Morgantown increasing, enterprising businessmen planned more development for the Greenmont area. Developments included the South and Sennett Addition (Cobun and Dewey Streets area) and the C.L. Reay Plan. Reay, who had owned three acres in Greenmont for many years, did not start developing the area until 1915. In 1910, Samuel McGara bought 13 lots from Reay. He planned to resell the lots but he died in 1914, before he could develop the land; Reay sued McGara's estate for the balance due on the property. Reay regained the lots and developed the land himself.

I. Grant Lazzelle bought the area that became the Homeside Addition in 1900. A draft of the new development was prepared by C.W. Bennett. To sell lots in the Homeside Addition, Lazzelle formed the Globe Realty Company. As construction commenced in Homeside in 1915, John W. Wiles, the developer of the South Park neighborhood became involved. Wiles developed the area of Homeside around Wilson Avenue. Wiles was known for building Bungalow style and American Four Squares in this area of Homeside.

The Homeside Addition had restrictive covenants included in the deeds. Not only were gambling and intoxicating liquors forbidden in many deeds, but some deeds had other restrictions. The property buyer had to agree that the property could, "never be sold or rented to any but the Caucasian race, only garages built on rear of property and built in a neat and workmanlike manner and shall never be used as a residence," and restrictions on size (18 feet minimum from foundation to cornice"), roofing (only slate, tile or cement shingle roof), gables (three gables or no gables) and cost (at least \$2500.00).

These developments increased the density of population in Greenmont and transportation problems began to develop with the increasing population. A Greenmont branch of the trolley line was constructed in 1912 as part of the Sabraton-South Morgantown Line. The South Morgantown Traction Company was responsible for building the new line, which ran across the Walnut Street Bridge on the tracks of the Union Utilities Company. The route then went up South Walnut Street to Cobun Avenue to Green Street, up Green Street to Wilson Avenue, then up Washington Street to Euclid Avenue, and then to Allen Street (now Simpson) and down to South High Street. In November, the line was laid from Cobun Avenue to Green Street and Wilson Avenue. (*Morgantown Post Chronicle*, November 5, 1912) The company also announced that it was applying for a franchise to build a line from Greenmont to Sabraton by way of Marilla, but never built the line. (*Morgantown Post Chronicle*, December 30, 1912)

On April 7, 1917, the United States entered World War I. Men from Greenmont and the rest of Monongalia County enlisted in the army. Registration day in Monongalia County was June 5; 2,685 local men signed up for military service. Greenmont residents who enlisted that day included Charles Edwards and Irvin White. Greenmont residents did their part for the war effort by planting victory gardens, taking canning classes (the women) and supporting the Liberty Bond drive and the Red Cross.

During World War I, anti-immigrant feelings arose in the Morgantown area as well as in the rest of the United States. Many immigrants Anglicized their names or translated them into English equivalents. (Core, Vol. IV, page 534) This hatred of foreigners brought about the U.S. Immigration Act of 1917 preventing immigrants from 33 "undesirable" classes from entering the country. One of the 33 classes was "illiterates." Illiteracy was a problem for immigrants in Greenmont. Several illiterate Greenmont immigrant residents were swindled by a crooked Morgantown land developer who pretended to sell one piece of land, but really sold them a less desirable parcel.

In spite of these difficulties, Italian immigrants were successful in starting businesses in Greenmont. From 1915 to 1950, the following Italian-American business enterprises illustrate the strength of their entrepreneurship: Louis Mantini's grocery, Carmino Pisegna's grocery, Anthony Di Bastianni's restaurant, Tony Barlio's grocery, Angelo Zuccari's grocery, Anthony Constantine's grocery, Furfuri's Grocery, Amico Buccigrossi's confectionary and ice cream parlor, Samuel Fratto's barber shop Anthony Capellanti's grocery, Salucci's Beer Garden and Shoe Repair Shop, Rotunno's Drugstore, Andrew Constantine's Dry Goods Store, Emidio Guerri's drugstore, Gene Perrilli's Pool Hall, A.W. Lorentz's photo business, Bossio's Confectionary and Louis Forlini's White Avenue Beer Garden.

The many retail establishments in Greenmont provided residents with fresh produce, meats, and bread. In 1927, there were 18 grocery stores in the Greenmont vicinity. Other entrepreneurs were engaged as a fish dealers, beer distributors, florists, shoe repairmen, druggists, pool hall operators and barbers. The high immigrant population in this area gave Greenmont an ethnic feel. Although there was little room for gardens, residents often grew vegetables native to their homeland. Grape production and wine making, even during Prohibition, were carried on in Greenmont. Angelo Luckini, of Overdale Street was a stonemason/brick mason by trade. Luckini also had a mushroom-growing business. His cellar had a tunnel to the area under his concrete parking lot where he grew his mushrooms. Reportedly, he also had a wine-making operation in his cellar during Prohibition. Luckini was known for "excellent wine, stonework, and mushrooms."

Few residents of Greenmont owned automobiles until after 1940. Most people walked to work and the local stores. A suspended footbridge ran from the hill near Front Street in the Homeside Addition to the Marilla area. Greenmont residents used this bridge to cross Decker's Creek and to go to work in Marilla and Sabraton. The footbridge was removed after the Hogback Bridge was built over Deckers Creek in 1929. (*New Dominion*, December 4, 1929)

#### **African-American History in Greenmont**

The first African American to settle in the Greenmont area was John Edwards. Edwards moved to Morgantown after service during the Civil War. He purchased 4 ½ acres of land in the area that is now White Avenue from Jeremiah Simpson in 1866. (Deed Book 13, p. 174) Edwards, according to his grandson, was a "huckster." He traveled around the area selling housewares. Edwards met Sarah Evans

Monongalia County, West Virginia  
County/State

Section 8

Page 157

---

on a selling trip to the Blacksville area. The 25 year old Edwards married the 17 year-old Sarah, a native of Preston County, on May 13, 1865 in Monongalia County (Marriage Book B page16, 1865) Edwards listed Pittsylvania County, Virginia as his birth place on the marriage license.

Later, Edwards began hauling water from the Monongahela River in a mule-drawn wagon with a wooden cask attached. Edwards filled the cask with water and sold it door-to-door. According to Rice's *Our Monongalia*, water from the Monongahela River was \$.10 a barrel, while water from Decker's Creek was \$.15 a barrel. Since most water came from wells at that time, people preferred to purchase river and creek water from Edwards to preserve their well water. Edwards' water-hauling enterprise went out of business when the city of Morgantown built its first water works, circa 1890. (Callahan, *History of the Making of Morgantown*, p. 218)

John Edwards who was listed as a laborer in the 1901 *Acme Morgantown Directory*, died intestate in 1903 and his property on White Avenue was platted into lots in 1907. Sarah lived in the family home at 71 (old numbering system) White Avenue until her death, circa 1925. She took in boarders for many years after her husband's death, although most seemed to be family members: C. Dabner (son), a driver; Charles, a driver and Zerme, a hod carrier, and his wife Mamie, all Edwardses, were listed as boarders in the 1914 *Polk's City Directory*. James A.G. Edwards drove his father's water barrel wagon in the parade down High Street that celebrated Morgantown's sesquicentennial in 1926.

John Edwards' son, J.A.G. Edwards, purchased property adjacent to his father's on White Avenue. He built his home on one section of the property and kept horses and wagons on the "stable lot." James A.G. Edwards, like his father went into business for himself. Between 1896 and 1926, James A.G. Edwards expanded his family's sanitation business. Edwards hauled garbage throughout Morgantown and Westover areas for businesses and private homes. The county paid him to pick up garbage from county institutions such as the courthouse. As Edwards' business grew, so did the number of his workers. Many teamsters or drivers found in census reports during those years worked for James A.G. Edwards. Edwards also hired Samuel Turner to work as a fireman at the garbage plant.

The Marshall family, relatives of Edwards' wife Lucetta, came from Virginia to work for Edwards. The workers hauled garbage in wagons pulled by horses. According to Charlene Marshall, the horses knew their route, even without their drivers. On one occasion, John Marshall became ill and fell off his wagon while working in Westover. His sons, James and Clarence, found him on their way back to the stable. In the meantime, John Marshall's horse brought the wagon across the Westover bridge, and backed it into its usual parking place at the stable on White Avenue. James A.G. Edwards' sanitation business made him wealthy, however, the city of Morgantown again stepped in and put J.A.G. Edwards out of business when the City Council voted to provide free garbage service to city residents in 1926. A year later, the City began charging for garbage pick up. The Edwards family always felt the city, "Didn't want a black man to make all that money." The rise and fall of James A.G. Edwards was not only chronicled in *Morgantown City Directories* but so were attitudes about African Americans.

County/State

Section 8

Page 158

The 1906 *Polk City Directory* listed Edwards as a "teamster." The 1914 *Polk City Directory* listed Edwards as a "garbage man." In the 1915-1916 and 1918-1919 *Directories*, Edwards had prominent display advertisements, "JAG Edwards/The Garbage Man/Let Me Haul Your Garbage/All Work Promptly Done/A Trial Will Convince You/79 White Avenue/Morgantown, WV." The 1920 *Directory* listed Edwards as a "laborer." In the 1925 *Directory*, Edwards is again listed as a "garbage man" in the alphabetical listing and under the heading "Garbage Reduction Companies" in the business listings. In 1927, Edwards is listed as a driver for the "City Sanitation Department." In 1931, Edwards is listed but without any occupation, instead, Lucetta, his wife who was never identified in previous years as other than a housewife, is listed as working for a downtown restaurant, the Way-Journ. In 1935, J.A.G. Edwards was listed as a janitor, in 1939 as a laborer for the WPA, in 1941 as a watchman for the State Road Commission and in 1943 as janitor for the F & M Bank. He was not listed in the 1945 directory. Lucetta's obituary on October 18, 1972 reported her as born in 1879 in Orleans, Virginia.

In 1891, the *Morgantown Weekly Post* began a column, "in Colored Circles," which recorded the news, events and gossip within the African-American community in Monongalia County, including the residents of Greenmont. According to the *Post*, "It was the first paper in the State to allow space for our colored people, and every colored man ought to subscribe." The regular columns provide an excellent perspective into African-American life in Monongalia County. On December 5, 1891 "In Colored Circles" reported, "Do you know that Uncle John Edwards has been wearing a Cleveland hat? What shall we do with him?" On August 6, 1892, it was reported that, "Casper Johnson is building an additional story to his house in Greenmont (61 White Avenue). How long will we have to wait, Casper?" Then on September 3, 1892, "Casper Johnson has been to Wheeling to see his true love. How much longer, Casper? After five years of reporting events in the African-American community, "In Colored Circles" ended its run on December 19, 1896.

In 1913, African-Americans in the Morgantown area celebrated the 50<sup>th</sup> anniversary of their emancipation from slavery. A parade down High Street featured former slaves in decorated cars. The black Knights of Pythias Band from Uniontown and the local drum corps performed. Dr. Ernest W. Lyon, former minister of Liberia, spoke in the afternoon. Lyon's speech concerned the progress of the black race since the Emancipation Proclamation. That evening at the Monongalia County Courthouse, the Reverend John Peters of the Jones Methodist Episcopal Church and local businessman, John Hunt, both gave speeches.

Economic opportunities for African Americans became more restricted as the 20<sup>th</sup> Century progressed and many suffered severe economic setbacks when they had to compete with European immigrants. (Brown, page 38, 1930) In the late 1800s and early 1900s, several businesses were owned and operated by African Americans. Matthew Harris and Ames Harris owned a barbershop in 1885-1886, G. L. Holland, Jr. owned a barber shop, the first for African Americans on High Street. John Hunt owned his own building and ice cream factory on Beechurst Avenue and was profiled in the *1906 Progress and*

*Industry Edition* of the *New Dominion* newspaper. In the 1901 *Acme City Directory*, Hunt is listed as operating the White Mountain Ice Cream Parlors, which was a gathering place for the small African-American community in Morgantown. The 1900 Census had counted 200 African-Americans in Monongalia County, however, there were few black professionals in the Morgantown area. While some African-American men found work in the coal mines, they were not permitted to hold the higher paying positions. The glass factories and the Morgan Shirt Factory did not hire African Americans for many years. African Americans were forced into accepting menial and often unsafe jobs. During World War II, Dixon Edwards, grandson of John Edwards, obtained a job at the Morgantown Ordnance Works handling chemicals considered to be dangerous to white skin, but "harmless to black skin."

African-American workers for many years believed Sterling Faucet was the best place in town to work and make good wages. Indeed, an African-American man was head of the union for several years and the owner was known to have fired men who refused to work with blacks. Another African-American man, Paul Hall was a foreman in the packing department. The enlightened owner also operated an integrated canteen. A very different environment than that experienced by the African-American union members in downtown Morgantown where they attended meetings with white union members in the Labor Temple but could not go upstairs to the bar for food and drink after the meetings. New ownership at the plant changed things and African Americans were assigned the most menial tasks. While a handful of African Americans continued to operate businesses, by 1950 fully 25 % of African American men were janitors and none were in professions, such as medicine, law or teaching. Interestingly, all Morgantown garbage men were African American, but none were street cleaners. (Williams, 1952)

African-American students for years attended school on the second floor of John Hunt's ice cream factory, which on the weekends was a place to dance and listen to the mandolin. The Beechurst Grade School at 136 Beechurst (old number) was listed in *City Directories* under public schools as a "colored" school at Beechurst and Hough Streets. Mattie Pronty was the principal in 1914, 1915-1916 and 1918-1919. The *Directories* in 1918-1919 listed a Beechurst High School at 135 Beechurst Avenue and Morgantown High School "Colored" at the same address in 1925. Arthur Barnett was principal and listed as boarding in the James. A.G. Edwards home at 489 (new number system) White Avenue. In 1927, Barnett was still listed as the principal but he lived at 1137 Richwood Avenue with his new wife, Irene, a teacher at the Beechurst School.

In 1929, J.A.G. Edwards opened his house at 501 (new numbers again) White Avenue as a school to relieve overcrowding at Beechurst Elementary. He, "Priced the rental of his (16 room) house at \$112.50 for twelve months each year, if the Board of Education guarantees to replace partitions and repair any damage by occupancy other than normal wear and tear." (Hastings, Vol. 10, page 127) Barnett became the principal of the White Avenue Colored School. Dixon Edwards, J.A.G. Edwards' son, had the experience of attending school in the same room where he was born and where he was taught by his brother, Charles. His aunt, Grace, (Charles' wife) also taught in the house, which continued to be the African-American school until 1939, site #0458. (*New Dominion*, December 11, 1929)

In 1933, the Board of Education reported that 83 students were attending school in the Edwards' house. (Hastings, page 136) The School Board had voted to close Jerome Park, Beechurst Elementary and Brewer Hill Elementary and consolidate the children on White Avenue. (*New Dominion*, March 23, 1929) Barnett was the principal for most of those years. When the Board of Education received money from the Works Progress Administration to build a new African-American elementary school, White Avenue was chosen as the location.

The Second Ward Negro Elementary School, site #0460, was built as part of a grant of \$1,034,284.31 from the Works Progress Administration that provided for the construction of 21 new schools or additions. The firm of Tucker and Sillings was selected as the architect for all these projects.

Second Ward Negro Elementary School opened in the 1939-1940 school year. Approximately 30 students attended that first year. The African-American schools in Monongalia County had the same curriculum as the white schools; however, teachers for music, art, and physical education rarely attended the African-American schools nor did these schools receive as many facilities or as much funding as the white schools. For example, when the white schools received new textbooks, the old textbooks were sent to the African-American schools.

The Parent-Teacher Association at Second Ward Negro Elementary helped to raise money for textbooks and playground equipment. The PTA also raised money to replace the long flight of wooden steps in the front of the school with concrete steps, and to construct a wall around the playground. The PTA was an important organization in the White Avenue African-American community. It brought together parents and teachers to work for improved educational opportunities for their children. A state wide PTA movement to encourage African American parents and teachers to work together was strongly encouraged by the West Virginia Superintendents for Negro Education during the 1920s and 1930s. The state wide group was instrumental in the growth of black high schools in West Virginia, including Monongalia High School built in Westover in 1935 by the Works Progress Administration. Monongalia County did not send delegates to the West Virginia State PTA Conferences but most were held in the southern counties and transportation may have been a problem. The Second Ward Negro Elementary School was placed on the National Register of Historic Places in 1992.

Relations between the races in Greenmont seem to have been amicable, for the most part. The 1915-1916 *City Directory* listed a diverse collection of residents on White Avenue, including: P.D. Arbogast, a physician; John W. Dixon, Lee Gidley, F.E. Gidley, Lingi Pisegnia, Levi Shoemaker, Charles Kerns, F. E. Sapp, Thomas Blue and A. M. Holland. Other streets were not as diverse, although one of the Holland families (African Americans) did live on Green Street for many years. The children attended different schools but some did play together, at least, the younger ones. Boys playing sports together was fairly common. According to interviews and surveys done by Ellis Ray Williams for his thesis for the Sociology Department at West Virginia University in 1952, one Greenmont mother of Italian heritage was concerned that her 10 year-old daughter, "played at the Negro School playground all

Page 161

---

summer and wanted to go to school there with her Negro friends." (Williams, page 32) Bible schools in the neighborhood churches welcomed all the children but when they went on their annual picnic to Richard Park, only the white children were permitted in the swimming pool. Adults did not seem to socialize much in the neighborhood except for some senior citizens who would sit on each other's porches and chat. (Williams, page 64)

One African American who rented property in Greenmont had a bad experience with a white family. "They lived like pigs. I have never seen a family any more nasty than they were. They destroyed my property and I finally had to put them out." (Williams, page 43)

Greenmont had always been an ethnic working-class community. Although Greenmont was on the border of the more exclusive South Park neighborhood, there was no direct access between the two areas. Until the 1920's, the only way to get from South Park to Greenmont was to cross the Pleasant Street Bridge into downtown Morgantown, then take the Walnut Street Bridge back across Decker's Creek into Greenmont. In 1924 the Morgantown City Council instituted legal proceedings to purchase the South Park home of E.H. Gilbert. Gilbert's home, "in accord with the strategic methods of some early real estate promoter, had blocked the way for a lateral street which was needed to connect with Greenmont."

During the 1930's, the streets and sidewalks were paved due to the WPA (Works Progress Administration) and former Greenmont resident, Thoney Pietro. Pietro came to Morgantown in 1901 from Abruzzi, Italy and formed the Pietro Paving and Construction Company. In addition to paving Greenmont's streets and alleys, Pietro's company paved many streets in Morgantown, as well as other towns in West Virginia. Thoney Pietro became one of the wealthiest men in Morgantown.

In 1934, the trolley was closed and replaced with a bus system. The trolley tracks were removed during World War II to salvage the metal.

Greenmont has had several churches during its history as well as ties to other churches in the area. With such a diverse population, a variety of religions were practiced by the citizens of Greenmont.

#### **Kerns' Church**

The first church in the Greenmont area was Kerns' Church. Michael Kerns constructed a building to be used as a church in the early 1780's near Kerns' Fort and it was open to all denominations. Bishop Francis Asbury preached at the church when he visited Morgantown in 1785 and apparently was not impressed with the citizens of Monongalia County. Bishop Asbury later wrote of his visit, "I had a lifeless, disorderly people to hear me at Morgan's Town. It was a matter of grief to behold the excesses particularly in drinking which abound here."

**The Russellites**

Charles "Tazz" Russell founded the Russellite Sect in the 1860's in Allegheny, Pennsylvania. Originally a Presbyterian, Russell became disenchanted with the church's belief in hell. Russell didn't believe in "eternal torment" and his new *Watchtower Society Tract* reflected his beliefs. Some of his disciples formed the Jehovah's Witness Church, others the Adventist Church. His beliefs had lost popularity, so it is surprising that a Russellite Church operated in Greenmont in the 1930s. Services were held in a combined residence and grocery store on Overdale Street for about five years in the mid 1930s.

**Christian Missionary Alliance**

The Christian Missionary and Alliance Church was located on the corner of Arch and Reay Streets. The church was founded during the summer of 1917 by the Reverend D. Hayes Permar and the Reverend A. R. Fesmire. After a tent meeting conducted by these ministers, a fund was started to buy a plot of land on Kingwood Street. The church was built on this parcel of land in 1917. As the congregation increased, the church was enlarged to seat 250 people. Reverend Permar remained until 1921. A series of ministers followed until the Reverend Fred Vail arrived in 1930. Under Reverend Vail's leadership, the congregation purchased the lot at the corner of Arch Street and Reay Alley, and erected the church now occupied by the Reformed Orthodox Presbyterian congregation, site #0015, 450 Arch Street. The Missionary and Alliance Church congregation outgrew the building and moved to its current building on Patteson Drive in the 1970s. (Dodds and Dodds)

**Jones African Methodist Episcopal Church**

Church members say that the Jones A.M.E. Church was founded as the result of the Edwards family arriving in Morgantown and settling in the Greenmont area on White Avenue. One account of the church founding is that John Edwards was sent to this area to bring the body of a white person home for burial. Edwards was asked what he would like as a reward for this service. Edwards requested that his brother and sister be brought here to live. Soon other African-American families followed and a church group was organized. Another story is that John Edwards was a cook in the Union Army who came to Morgantown at the close of the Civil War with his commanding officer, Captain Johnson. (Dodds and Dodds)

At first the African Americans worshiped with the white people in the Methodist Episcopal Church on Pleasant Street, but the Bishop told the African-American members of the congregation that they were no longer welcome. Edwards along with Frederick Trimble, a former slave of Waitman T. Willey and Stephen Trimble became trustees for the Negro Methodist Episcopal Church, which in the 1869 deed in which George and Mary Kiger donated land on Long Alley (now Chestnut Street) for the church, was called the African Methodist Episcopal Church to distinguish it from the Methodist Episcopal Church. This church was also used as a school for African-American children.

Around 1871 differences among the congregation caused the church to split, and some members formed the St. Paul's A.M.E. Church on Beechurst Avenue. Interestingly, the new church was built on land donated by John and Louise Hoffman in 1872, who in the deed, "Forbade the erection of a school for black or white on the premises." The original building on Chestnut Street (then Long Alley) was renamed the Jones Methodist Episcopal Church and its congregation continued to meet in downtown Morgantown for many years before moving to its current location at 333 Green Street, site #235.

During the first half of the 20<sup>th</sup> century, the women of Greenmont had opportunities for employment that eluded other women in Morgantown. Greenmont women were running stores (either by themselves or with their husbands), working in the tin plate mill and glass factories, clerking in downtown shops, waiting tables in local restaurants, teaching, working as beauticians, etc.

By the early 1950s Greenmont was beginning to change. Families with students attending West Virginia University increased as did student rentals. During the last years of World War II, a survey of Morgantown residents reported that the most popular item on a large percentage of people's buying lists after the war was a car. Cars changed the neighborhood. The G.I. Bill after World War II and the Korean Conflict afforded newly discharged soldiers a college education and Morgantown had numbers of veterans eager to take advantage of this opportunity. Greenmont's close proximity to West Virginia University made it an ideal location for students. Many single family homes were converted into rental apartments, and longtime Greenmont residents slowly began to move to other parts of town.

At present, Greenmont is a mix of student housing and long time residents. Greenmont remains a working-class neighborhood and there is still an ethnic flavor to the area. Descendants of the John Edwards still live on White Avenue and small Italian gardens are visible throughout Greenmont.

**Architecture**

Greenmont is also eligible under Criteria C for architecture. Because Greenmont was a working class neighborhood, the houses are not considered "high style." Some are American Four-squares (two-story boxes with hipped roofs and one-story porches), homesteads (two-story houses often one room wide with gable roofs and front porches), Princess Anne (a simplified version of the Queen Anne), and bungalows. A few of the homes in Greenmont were built during the 1890's, but most date from 1900-1920. Buildings in the Greenmont neighborhood are reflective and typical of modest, ethnic, working class neighborhoods. Commercial construction includes basic commercial buildings, large apartment buildings and duplexes. However, there are some prefab and mail order houses in the district. As a rule, the houses and commercial buildings in the district were constructed close together to maximize space. The architecture of the Greenmont Historic District is representative of a typical working class, immigrant, neighborhood.

---

In summary, the Greenmont Historic District is significant under Criteria A, community development, as one of the earliest settled areas of Monongalia County. The district is also significant under Criteria A as an example of a neighborhood that was developed as a result of late 19<sup>th</sup> century and early 20<sup>th</sup> century immigration and industrialization. The Greenmont Historic District also qualifies under Criteria C for architecture as an example of a typical, late 19<sup>th</sup> century and early 20<sup>th</sup> century diverse ethnic, working class neighborhood.

**VERBAL BOUNDARY DESCRIPTION**

The boundary of the Greenmont Historic District is outlined on the accompanying topo map. The southern boundary of the proposed district is the east side of Kingwood Street from Decker Avenue through the 300 block. This boundary is also contiguous with the South Park Neighborhood, which is on the National Register of Historic Places. The southern boundary runs from Kingwood Street along the rear property line behind the main parcel of land for the Second Ward School building and continues in a southeast direction to include Posten Avenue and White Avenue. The district line crosses White Avenue at the property line of the Second Ward Negro Elementary School and runs along the rear property line of the east side of White Avenue to the rear property line of the south side of Sennett Street to the rear property line on the south side of Conn Street and then along the eastern boundary of the rear property line of buildings on Front Street and Arlington Street. The boundary crosses Brockway Avenue and Pennsylvania Avenue at their junction and turns west running parallel to Decker's Creek, forming the northern boundary. At site #0155, the Decker's Creek bridge abutment, the boundary turns south and meets Brockway Avenue to include only the north side of Brockway in the one block section before closing the district boundary at the junction of Kingwood. The south side of Brockway in this one block section was included in the South Park Historic District. See Historic District Map for illustration of verbal boundary description.

**BOUNDARY JUSTIFICATION**

The boundaries encompass the heart of the Greenmont District in Morgantown, West Virginia and includes the major areas associated with the Greenmont neighborhood. Greenmont was a vibrant working class neighborhood of African-Americans and immigrants who worked in area industries and engaged in entrepreneurship by starting successful small neighborhood businesses. The areas outside these boundaries show a measurable decrease in historic structures.
