8. Statement of Significance**Applicable National Register Criteria**

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing)

- ☐ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield, information important in prehistory or history.

**Hinton Historic District (Boundary Revision)
Summers County, WV**

Section Number 7 Page 1

7. Description

The Hinton Historic District (Boundary Revision) is a mixed-use residential/commercial/institutional historic district of 80 acres consisting of the central business district and adjacent residential neighborhoods of the city of Hinton, the county seat of Summers County, along the New River in southeastern West Virginia. The Hinton Historic District (Boundary Revision) contains a total of 243 properties (Photo Nos.1-31), including 239 buildings, one contributing structure (a railroad water tank; Resource No. 7), one non-contributing site (a parklet at the corner of Third Avenue and Temple Street; Resource No. 80), and two contributing objects (a Confederate veterans' monument; Resource No. 165; Photo No. 22, and a more modern veterans' memorial; Resource No. 140). Buildings include substantial downtown commercial and warehouse properties, railroad-related resources, houses, churches, and local governmental buildings. One property, the Summers County Court House (Photo No. 21; Fig. 4), was previously listed in the National Register (NR 1981); it appears in the Resource Inventory but is not included in the resource count which appears in Section 5. Of the district's 242 unlisted resources, 215 (89%) contribute to the character of the district and 27 (11%) are non-contributing. Contributing properties are those erected within the period of significance which retain the essential form and appearance which they possessed during the period of significance; non-contributing properties date from after the period of significance and/or have undergone major alterations which have compromised their integrity. Noncontributing properties are scattered through the district and their presence fails to diminish the otherwise high degree of integrity possessed by the district as a whole.

The original Hinton Historic District was listed in the National Register in 1984. The boundary revision for the district retains the original land area of the 1984 district and continues to reflect the existing diversity of architecture within the historic core of the community. The original nomination included a number of Chesapeake and Ohio Railroad-related properties along the district's northern boundary, immediately south of the New River. Most of these properties, including with some warehouse properties, at least one historic railroad hotel, and the imposing roundhouse, have been razed. The vacant land which formerly contained these properties has been retained in the district. However, the Hinton Historic Landmarks Commission wished the 1920s Lincoln School (Resource No. 207; Photo No.27) to be included within the boundary revision. This historically-African-American brick school building abutted the southern boundary of the original district and is the only property and land area added to the original district.

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

**Hinton Historic District (Boundary Revision)
Summers County, WV**

Section Number 7 Page 2

The Hinton Historic District (Boundary Revision) consists of a grid of streets (Fig. 1) south of the New River. Moving from north to south are Maple, Commercial, Front, Summers, Temple, Ballengee, and James Streets. Unnamed alleys run east-to-west between most of these streets. Intersecting these are, from west to east, Park Avenue and First through Sixth Avenues. There are no north-to-south alleys in the district. All of the streets in the district are paved and have sidewalks on both sides; some areas retain historic brick pavement which enhances significantly the character of the nominated area. The topography of the district slopes upward from north to south. Setbacks vary throughout the district. Within the downtown area, in the eastern reaches of the district, most buildings occupy their entire lots, with little or no property line setback. In the residential areas east and south of the downtown, houses have front, side, and rear lawns, some with mature shade trees. Dependencies include small sheds and garages which are generally treated as uncounted landscape features within the context of the district.

Most commercial buildings in the district are of brick construction, laid in common bond. Domestic architecture is divided between brick and wood; judging from their age, the wood frame houses (Fig 3.) in the Hinton Historic District (Boundary Revision) are likely balloon-framed. Most of the railroad-related properties and the secular and religious institutional buildings are of brick. Historic commercial buildings vary in the district vary between two and five stories in height; the 5-story 1907 Hotel McCreery (Resource No. 162; Photo No. 16; Fig. 13) is the district's largest building. Most buildings rest on substantial foundations of native ashlar limestone or sandstone. Some brick foundations are found in the district and many twentieth-century houses are built on foundations of concrete block, both rock-faced and smooth-dressed. Porches and verandas appear on the facades of nearly all of the residential properties in the district, ranging from modest hipped-roof porches to comparatively elaborate Eastlake-style porches. Many of the porches retain their original turned spindle balustrades and lattice skirting. The district's buildings are penetrated by tall and narrow patterns of fenestration, nearly exclusively flat-topped, forms which were in vogue during the late-nineteenth and early-twentieth-century when the district developed. Some churches have lancet-arched windows, characteristic of the Gothic Revival style, and some properties influenced by the Colonial Revival style exhibit Palladian windows, typically in the pediments of gables. Roof forms include the flat or shed roof form in the downtown and gabled (front-facing and laterally-oriented), hipped, and pyramidal throughout the entire district. Asphalt shingling is the favored roofing material in the district, although some buildings have roofs of standing-seam metal; few examples of slate roofs

Section Number 7 Page 3

have survived.

The architecture of the Hinton Historic District (Boundary Revision) includes buildings primarily vernacular in character¹ along with examples of many of the formal styles of architecture popular during the period of significance. The district's vernacular building stock includes numerous examples of modest domestic architecture such as the three-bay side-passage house at 422 Summers Street (Resource No. 33), the Dr. B. P. Gooch House nearby at 418 Summers Street (Resource No. 34).

As would be expected from Hinton's late-nineteenth-century founding, the district's earliest extant formally-designed architecture is Italianate in character, with tall and narrow patterns of fenestration and often with overhanging cornices with brackets and modillions. Representative examples of Italianate-style design include 213, 217, and 316 Temple Street, 218, 216, 200, 213, 215, 217, 219 and 221 Third Avenue (Resource Nos. 60, 61, 86, 190, 191, 192, 195, and 196-199, respectively).

With the waning of the nineteenth century, the Queen Anne style came into vogue and was characterized by properties with an irregularity of form and materials, often with lively multiple roof systems and typically with some form of tower or turret. The Queen Anne style is represented by the Dr. Halloran house at 401 Summers Street (Resource No. 25) and in the National Bank of Summers at 301 Temple Street (Resource No. 63), both of which employ hexagonal corners towers.

The Gothic Revival, with its characteristic lancet-arched form of fenestration, appears in religious architecture in the district. Gothic Revival-style churches in Hinton include St. Patrick's Roman Catholic Church at 200 Temple Street (Resource No. 75) and Ascension Episcopal Church at 421 Temple Street (Resource No. 93).

As Hinton grew and prospered, some earlier churches were replaced by more substantial houses of worship built in the Neo-Classical Revival style. Such buildings are imposing in scale and employ design motifs derived--albeit sometimes loosely--from classical antiquity. They include the Central Baptist Church at 100 Union Street (Resource No. 166) and the First Presbyterian Church at 220 Third

¹The term, "vernacular," as applied here, follows the definition found on page 512 of Ward Bucher's **Dictionary of Building Preservation** (New York: John Wiley, 1996) and refers to "a building built without being designed by an architect or someone with similar formal training."

Summers County, WV**

Section Number 7 Page 4

Avenue (Resource No.187), both dating from 1922. Secular Neo-Classical Revival-style buildings in the district include the Big Four Building of 1907 (Resource No. 81) at Temple Street and Third Avenue, the National Bank of Summers, now the community library, at 201 Temple Street (Resource No. 56), the Laing-Humphries/Elks/Building at 300-310 Second Avenue (Resource No. 74) and the houses at 105 and 101 Ballengee Street (Resource Nos. 113 and 114, respectively).

The Colonial Revival style was born of patriotic fervor and interest in the American Colonial period sparked by the Centennial of 1876. Some Colonial Revival-style architecture is true to eighteenth-century form and detail, while other examples merely borrow Colonial-era massing and motifs such as the Palladian window. In Hinton, the Colonial Revival style flourished throughout much of the period of significance and includes the houses at 309, 307, and 412-414 Ballengee Street, the commercial Ewart-Miller Building at 131 Ballengee Street, the Second Baptist Church at 206 James Street (Photo No.25), the Methodist Episcopal Education Building at 411 Third Avenue and the Presbyterian Church Manse at 423 Third Avenue (Resource Nos. 100, 101, 131, 105, 149, 203, and 205, respectively). Institutional/governmental Colonial Revival-style design is seen in the U. S. Post Office of 1925 (Resource No. 119), and the 1928 Summers Memorial Building at (Resource No. 167; Photo No. 21), the latter of which is a Works Progress Administration building.

With the twentieth century in America came two styles which are almost purely American. The American Foursquare, more of a house type than an architectural style, incorporates an essentially square form, typically with a facade with a hipped-roofed one-story porch, and is generally capped with a hipped or pyramidal roof penetrated by dormers. Foursquares date from c. 1910 until the 1930s, appear in all residential sections of the district, and include the houses at 321 and 409 Summers Street, 121 and 100 Temple Street, 421, 212, and 312 Ballengee Street, 311-313 James Street, 411 Second Avenue, 415 Third Avenue, 119, 211, and 411 Fourth Avenue, and 315 Fifth Avenue (Resource Nos. 24, 27, 54, 68, 96, 123, 125, 136, 181, 204, 217, 218, 224, and 238, respectively).

Bungalows in Hinton date from the 1920s and characteristically have a laterally-oriented gable roof which extends forward beyond the plane of the house and shields a recessed front porch. Typically one and one-half-story in heights, Bungalows usually have a dormer, sometimes large, to create additional space and to allow light into an otherwise small, dark upper story. One Bungalow is in the Hinton district, at 416 Summers Street (Resource No. 35).

Summers County, WV**

Section Number 7 Page 5

As noted in the introductory paragraph, the Hinton Historic District (Boundary Revision) retains architectural integrity. The overall character of the district is intact and represents the development of this city throughout its approximately eighty- year-long period of significance. Some demolition has occurred in the district, leaving both empty lots and new buildings which have replaced historic properties. Most of the demolition has occurred in the district's northern reaches, near the railroad; two modern bank buildings (Resource Nos. 55 and 67) are on Temple Street. Alterations to buildings in the district match those found in virtually every other historic district, and include the replacement of historic wood windows and roofing material and the installation of non-historic siding.² Few buildings have been rendered non-contributing because of alterations and non-contributing properties are dispersed widely throughout the district and do not detract significantly from the ability of the nominated area to reflect its general appearance throughout the period of significance.

Resource Inventory

The following properties lie within the Hinton Historic District (Boundary Revision). The numbering corresponds to the district map submitted with the nomination documents. Most dates of construction are approximate and are estimated to the nearest decade.

1. Northeast corner, Commercial Street & Sixth Avenue, commercial
Description: This small property appears to be the last remaining building associated with the repair shops and yards of the C & O Railroad, whose history is inextricably linked to that of Hinton. The roundhouse, which was located east of this building, was demolished in the 1980s. Long, narrow brick building with a gable roof and flat-topped fenestration. It is presently vacant and lacks any notable architectural ornament.
Date: c. 1900
1 contributing building
2. North side Commercial Street, at Sixth Avenue, commercial
Description: Former warehouse building of brick construction, 2 stories in height, with elevator

²The use of non-original siding began well within the period of significance when asbestos shingles and insul-brick were applied to existing buildings. Numerous examples of such treatment are found within the district.

shaft penetrating roofline; several additions of wood of indeterminate age

Date: c. 1900

1 contributing building

3. 117 Fifth Avenue, commercial

Description: This is a vernacular industrial building with the rear section of two stories and the front of three. It is modestly detailed with flat-topped sash set in segmental-arched openings; no notable architectural ornament.

Date: c.1900

1 contributing building

4. C & O Freight Depot, south side Commercial Street, commercial

Description: This is an elongated single-story building, 8 x 2 bays, with a laterally-oriented gable roof. Fenestration is flat-topped, with modest detailing. A loading dock is on the east gable end and portions of the original overhanging roof shield the original loading platform on the north elevation.

Date: 1905

1 contributing building

5. New River Grocery Co. 502 Fifth Avenue, commercial

Description: One of a series of industrial warehouse buildings erected early in the twentieth century adjacent to the C & O Railroad yards, which formerly stood immediately north of the property. Served the New River Grocery Company, regional grocery wholesaler. Industrial vernacular brick building, sparsely ornamented, with flat-topped windows set in segmental-arched openings and tile coping along the roofline.

Date: c. 1910

1 contributing building

6. Maple Street at Second Avenue, commercial (vacant)

Description: This diminutive building appears to have been associated with the C & O Railroad, whose yards stood immediately to the north along the New River. Nearly all of the resources associated with the railroad have been demolished. An undistinguished building which appears

to have been associated with the railroad, whose yards are immediately to the north.

Date: c. 1940

1 contributing building

7. C & O Water Tank, commercial

Description: Steel water tank set on four legs, conical in form with a convex bottom and rounded top. The last such object in the C & O Railroad yards

Date: c. 1910

1 contributing object

8. 214 Maple Street, commercial

Description: This is a modest temple-form building with an extended roof on the facade, supported by plain wood posts. It is constructed of tile and has flat-topped windows. The building lacks any notable architectural embellishment. It was built as the Hinton Marble Company, under the ownership of W. B. Loomis. The property is significant to the historic streetscape of Summers Street and is a link to the commercial history of the Hinton Historic District during the first half of the twentieth century.

Date: c. 1900

1 contributing building

9. 200 Maple Street, residential

Description: This is a hipped-roof I-house with an exterior surface of insul-brick and a 2-story porch on the inner bays of the facade. The porch is supported by Doric posts on the first story and features an enclosed sleeping porch on the second.

Date: c. 1870

1 contributing building

10. 208 Maple Street, residential

Description: This is a vernacular gable-front house with gable-end orientation to the street. A two-story porch extends across the facade, with the second story enclosed as a "sleeping" porch. Fenestration is flat-topped, with some 6/6 sash retained.

1 contributing building

11. 210 Front Street, residential

Description: This is a vernacular house with a gable roof and gable-end orientation to the street; a shed-roofed addition has been made to the east elevation, well within the period of significance. Fenestration is flat-topped, with some 6/6 sash retained. A 2-story deck has been constructed on the facade, allowing for parking beneath.

Date: c. 1870

1 contributing building

12. 212 Front Street, commercial

Description: This is a deteriorated tile building with a gable roof and gable-end orientation to the street. Fenestration is segmental-arched, with windows boarded over. Original window and door openings have voussoirs of two wythes of yellow brick; an overhead garage door is in the west side of the facade

Date: c. 1920

1 contributing building

13. Y. M. C. A., 114 Second Avenue, social

Description: This building was erected as the YMCA by the C & O Railroad as a recreational facility for their employees. Built following a fire which destroyed the previous facility on the same site, this is a brick institutional building with a stylized Mansard roof penetrated by gabled dormer-like vents. A single-story veranda extends across the facade and a portion of the north elevation. Fenestration is flat-topped, with 1/1 windows set on plain stone sills and capped with plain stone lintels

Date: 1911

1 contributing building

14. Second Avenue at railroad tracks, transportation-related

Description: The former C & O Passenger Depot, this is a long depot building of common bond brick construction, with a 3-story central section flanked by 2-story side sections. Exterior surfaces trimmed in rock-faced stone. The 1930 *Sanborn Fire Insurance Map* for Hinton indi-

cates that the express office was in the easternmost room, that offices were located in the interior four rooms, and that a store was in the westernmost section. Fenestration is both flat-topped and segmental-arched, with some openings larger than others to accommodate the transfer of materials, a cantilevered bay is on the second story of the middle section, enabling the stationmaster unencumbered line of sight to see up and down the track. Some interior trim and room arrangements intact. The history of Hinton is inextricably linked to that of the C & O Railroad. This building was the passenger depot for the railroad (later the B & O) and is among the few remnants of the massive railyards maintained in Hinton by the C & O. It was recorded by the Historic American Engineering Record (WV-45).

Date: c. 1890

1 contributing building

15. 201 Summers Street, residential

Description: This is a vernacular residence with a hipped roof and a gable on the east side of the facade, with a vent (likely originally a window) in the pediment. The original porch appears to have been replaced with a recessed porch, likely during the period of significance. Fenestration is flat topped and the house is generally devoid of architectural embellishment. One of a series of adjacent Summers Street homes erected on speculation in 1897 by Azee Ford, first president of the First National Bank of Hinton. These homes represent an early speculative residential development by one of the community's first entrepreneurs.

Date: 1897

1 contributing building

16. 203 Summers Street, residential

Description: Vernacular house with a hipped roof penetrated by a gable on the east side of the facade. A hipped-roofed front porch extends across the facade, supported by plain wood posts. Fenestration is flat-topped, with a two-part window on the right side of the facade on the second story. One of a series of adjacent Summers Street homes erected on speculation in 1897 by Azee Ford, first president of the First National Bank of Hinton. These homes represent an early speculative residential development by one of the community's first entrepreneurs.

21. 213 Summers Street, residential

Description: Gable-front vernacular residence with a double-gallery porch extending across the facade, supported by wood piers without notable ornament. Fenestration is flat-topped, with any trim obscured by the installation of insul-brick. This is one of a series of adjacent Summers Street homes erected on speculation in 1897 by Azee Ford, first president of the First National Bank of Hinton. These homes represent an early speculative residential development by one of the community's first entrepreneurs.

Description: This is one of a series of adjacent Summers Street homes erected on speculation in 1897 by Azee Ford, first president of the First National Bank of Hinton. These homes represent an early speculative residential development by one of the community's first entrepreneurs. This is a gable-end oriented vernacular house with non-historic siding over the original wood surfaces. The second story includes a three-unit window assembly and a shed-roofed porch extends across the facade.

Section Number 7 Page 13

Description: Modestly-detailed and minimally-altered American Foursquare of wood with a hipped roof and 3-bay configuration on the first story and two bays on the first. Fenestration is flat-topped, 1/1, with simple surrounds. Extending across the facade is a hipped-roofed porch with a paneled bulkhead balustrade.

Date: c. 1919

1 contributing building

28. 415 Summers Street, residential

Description: Except for the replacement of the original porch balustrade (which likely occurred during the period of significance), this house is little altered from the original. It has a gable roof and gable-end orientation to the street, with cross gables near the rear of the building. The 3-bay facade retains original sash and incorporated a side-passage plan. The front porch is hipped-roofed, with a shallow pediment over the front door. The existing balustrade employs paneled bulkheads in place of spindlework.

Date: c. 1900

1 contributing building

29. 419 Summers Street, residential

Description: Vernacular wood house with a three-bay facade and a centered entrance and a hipped roof porch with replacement brick supports. The roof is laterally gabled, with a central pediment on the facade and centered gables in the lateral ends. Fenestration is flat-topped, lacking notable ornament.

Date: c. 1900

1 contributing building

30. 423 Summers Street, residential

Description: This is a vernacular cottage lacking any notable architectural embellishment. It has a laterally-oriented gable roof and a shed-roofed rear section, which may or may not have been original. A modestly-detailed porch extends across the facade. A modest lateral shed roof 2-car garage is located adjacent to the subject property. The garage has 2 overhead doors and exposed rafter tails.

1 contributing building

31. 501-503 Summers Street, residential

Description: This multi-unit house was erected by the C & O Railroad as a boarding house to serve both C & O employees and travelers coming to town by rail; the rail yards were located one block north of the property. It is a French Second Empire-style building with a double-gallery porch extending along the entire facade, supported by modest columns. The porch includes two gables symmetrically located along its roof. Fenestration is flat-topped, with some original 2/2 sash retained. Any historic ornament has been obscured by the installation of insul-brick. The Mansard roof is punctuated by four dormers on the facade and two on the side elevations; the dormers have very shallow gabled roofs.

Date: c. 1890

1 contributing building

32. 502 Summers Street, residential

81. 300-302 Temple Street; 301-311 Third Avenue, commercial
Description: Monumental Neo-Classical Revival-style brick building on a corner lot with angled corner. Storefronts altered, upper facade generally intact with 3-bay facade on Temple Street and 6-bays along side elevation. Fenestration flat-topped, with windows set singly and in groups. Limestone beltcourses. Cornerstone on Third Avenue elevation with insignia and initials of four organization who built the building.. Built from designs by Huntington architect J. B. Stewart at a cost of c. \$60,000 by the Big Four Improvement Company, a consortium of the four major fraternal railroad organizations, the Order of Railway Conductors, the Brotherhood of Railway Trainmen, the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen. From the time the building was completed until 1925, the post office was located in a portion of the ground floor. From c. 1930 to 1979 the private Hinton Hospital occupied the top three floors of the building. The hospital was owned by surgeon Dr. William L. VanSant (b.1885) who came to Hinton in 1915. With other institutions in Charleston and Clarksburg, this was one of three private hospitals in the state.,

88. South side Temple Street, between Fourth and Fifth Avenue, educational

Description: Substantial institutional building of buff-colored brick construction, with a projecting entry bay centered on the facade and smaller projecting bays on end elevations. Large multi-unit flat-topped windows, with replacement sash. Newer addition on west side. A plaque on the building notes that it was constructed at a cost of nearly \$100,000 in 1925-1926 by the Board of Education: W. E. Price, W. J. Martin, O. P. Vines, and A. D. Lilley. The cornerstone was laid by the local Masonic Fraternity June 27, 1925, Clyde T. Dutton, Grand Master. It opened in March 1926 and served until 1994 when it was converted to middle school. The land was purchased in 1886 from Central Land Co., owned by C & O president Collis P. Huntington; the company donated 4 lots at the rear on which the structure known as Hinton College stood facing Ballangee Street. A 1952 fire destroyed much of the building and it was substantially rebuilt 1953-1954, at the end of the district's period of significance.

1 contributing building

102. 213-217 Ballengee Street, commercial

Description: Vernacular commercial building of three stories, built of brick-faced tile, with the storefronts altered but retaining a traditional window-to-wall ratio. The upper facade is original and unaltered, with four bays each set symmetrically on either side of the center of the building and beltcourses of soldier course brick above the windows. The area between the third-story windows and the parapet includes three masonry (stone or concrete) diamond motifs. Shallow stepped parapet with stone or concrete coping. It was erected by the Hinton Construction Company for the Bowling-Haynes Motor Car Co., R. C. Haynes, Manager, and is characteristic of the type of unadorned commercial buildings being erected in Hinton just before the Depression.

Date: 1929

1 contributing building

103. 211 Ballengee Street, commercial

Description: Built as the Ritz Theater, this is a 1929 movie theater building of brick construction, whose original marquee was removed at an indeterminate time and replaced by a three-awning assembly. The upper facade is of five bays in width, with flat-topped 1/1 windows to which have been appended non-historic chronologically-inappropriate exterior shutters. Above the second-floor windows are three masonry (stone or concrete) motifs, similar to the Bowling-Haynes Building immediately to the east. The facade terminates in a shallow stepped parapet with masonry coping.

1 previously-listed building, not included in the resource count

119. Ballengee Street at Second Avenue, governmental

Description: Neo-Classical Revival-style post office of brick, with a flat roof. The original building was five bays wide and five bays deep, with a centered Doric portico occupying the center-most of the original bays. In the 1960s, a 4-bay matching addition was made to the building, resulting in the existing 9-bay asymmetrical facade. The bay spacing consists of a series of slightly-recessed blind round arches, into some of which are 15/15 wood windows. Extending along the perimeter of the principal elevations is a terra cotta cornice, above which is a parapet and behind the parapet is the flat roof. It was designed under the supervision of James A. Wetmore, the prolific U. S. Treasury architect and, according to the datestone was erected under the leadership of Treasury Secretary Andrew W. Mellon.

1 non-contributing building

149. 206 (?) James Street, religious

Description: The Second Baptist Church, this is a Colonial Revival church building of brick construction, with a gable roof and gable-end orientation to the street and a square two-stage tower centered on the facade capped with a belfry with louvered sides and a Byzantine curved roof. Corners are defined by brick quoins and fenestration includes round-arched and flat-topped multi-light Colonial Revival-style sash. The main entrance is centered on the facade, in a forward-projecting section which forms the base of the bell tower. The entry includes a classically-derived frontispiece with Tuscan columns and corbeled brick beltcourses are found at various locations on the building. A faithful 1920s representation of the Colonial Revival style as it was applied to religious design, this is the home to the city's oldest African-American congregation which was established in 1878 at the Front Street home (not extant) of Henrietta Hostler. The growing congregation purchased this lot for \$35.00 and built first a frame church and then this brick church, the cornerstone of which was laid by George Jordan under the auspices of the Wiley Lodge No. 11.

1 contributing building

145. 114 James Street, residential

Description: Vernacular residence of wood construction, 2½ stories in height with a front-facing gable roof. The facade is dominated by a double-gallery porch, also of wood, with Tuscan columns on both levels. The easternmost section of the second story porch is enclosed with a gable roof. The building's most distinctive architectural feature is the star motif with, along with spindled ornament, appears as bargeboard under the eaves of the gable on the facade.

Date: c. 1890

1 contributing building

146. 116 James Street, residential

Description: 2-story vernacular residence of wood construction, clad in non-historic siding and capped with a laterally-oriented gable roof with interior gable-end brick chimneys of brick. Centered on the three-bay facade is a double-gallery porch supported by turned Eastlake-style posts and enclosed by a solid wood railing which likely replaced the original spindled balustrade. The main entrance and a second-story door are both centered on the facade, suggestive of a central-passage plan on both stories.

Date: c. 1880

1 contributing building

147. 122 James Street, residential

Description: 4-bay vernacular residence with a laterally-oriented gable roof of standing-seam metal; a central chimney of brick penetrates the roofline. The facade is dominated by a double-gallery gable-roofed porch of wood, with some of the community's finest Eastlake-style trim, including turned posts, a spindled balustrade, and elaborately sawn fan brackets. Fenestration is flat-topped, 1/1 and on the outermost bays of the first story are oversized windows with art glass transom sash, which appear to post-date the construction of the house by at least twenty years. Paired entry doors access the first story. At least one early addition is on the southeast corner.

Description: the Hotel McCreery, a monumental hotel building built of brick with Neo-Classical Revival-style trim. Storefronts altered, but upper facade generally intact and original, except for the removal of balconies on the top floor. Under rehabilitation at time of survey. Fenestration flat-topped, with window units set singly and in groups, with flared lintels with keystones. Lighter-colored brick quoins define corners and a metal cornice with modillions extends around the perimeter. One of the two largest single buildings in the district (the other is the Laing-Humphreys/Elks Lodge Building one-half block to the north), this hotel was built during a time of significant growth and development in Hinton. It was owned by the Hinton Hotel Company and bore the name of James T. McCreery (1844-1925), a Confederate veteran, local entrepreneur, and president of the National Bank of Summers from 1906 until his death. The building is attributed to Washington, D. C. architect Frank P. Milburn (1868-1926) who designed state capitol buildings, court houses (including that of Summers County), and business blocks

167. First Avenue at James Street, performance

Description: The Summers Memorial Hall, this is a 2-story brick public auditorium building with a temple-form center section flanked by flat-roofed side wings, behind which is an auditorium for public assembly. The temple form section is defined by four rectangular pilasters and the main entrance has a pedimented frontispiece surround. Fenestration is flat-topped, with multi-light Colonial Revival-style wood sash. The interior includes a rotunda extending from the basement through the second story and an imposing, auditorium with a balcony and stage, and Art Deco lighting. Significant both architecturally and as a major cultural feature within the context of the community, the building's date stone indicates that it was built "in memory of those who served." The cornerstone was laid by the American Legion Department of West Virginia. It is also identified on the cornerstone as WPA project No. 2579.

1 contributing building

191. 216 Third Avenue, commercial

Description: Italianate commercial building of 3 stories with the facade rehabilitated sensitively, including new, compatible wood storefront with bulkheads and transoms. 7-bay upper facade with flat-topped windows, 1 / 1, with extended sills and plain stone lintels. Extending across the roofline is a metal cornice with brackets, modillions, and small floral motifs.

Date: c. 1890

1 contributing building

192. 200 Third Avenue, commercial

Description: 3-story Italianate commercial building of brick with altered storefront and 3-bay upper facade with segmental-arched openings and flat-topped windows. Bay spacing articulated by corbeled brick spandrels and roofline capped with cornice with small brackets and stylized floral motifs. A painted "ghost" sign extends across the facade between the third story windows and the cornice, indicating that this was the J. R. Dolan Company, purveyors of furniture and hardware.

Date: c. 1890

1 contributing building

193. 211 Third Avenue, commercial, fraternal

Description: 2-story vernacular commercial building of brick-faced tile construction, located on a corner lot, with its southwest corner chamfered and dominated by a large semi-circular arched opening; the outside corners of this feature are trimmed with ornamental brickwork. The Third Avenue facade includes a 2-part storefront with display windows and transom sash and a four-bay upper facade with flat-topped openings infilled with T-111 and out-of-scale replacement windows. A metal cornice without notable ornament extends along the Third Avenue facade and wraps around the chamfered corner.

Date: c. 1910

1 contributing building

195. 213 Third Avenue, commercial

Description: Italianate vernacular brick commercial building which includes an altered storefront on the first story and a three-bay facade above. Upper facade bay spacing is defined by corbeled brickwork. The facade terminates in a modestly-detailed bracketed Italianate cornice.

Date: c. 1890

1 contributing building

196. 215 Third Avenue, commercial

Description: Italianate vernacular brick commercial building which includes an altered storefront on the first story and a three-bay facade above. Upper facade bay spacing is defined by corbeled brickwork. The facade terminates in a modestly-detailed bracketed Italianate cornice.

Date: c. 1890

1 contributing building

197. 217 Third Avenue, commercial

Description: Italianate-style commercial building with a pressed metal facade; storefront has been altered from the original. The upper stories are intact and original, with 3 bays on each story, defined by paired pilasters. Other ornament on the facade includes foliated motifs and a bracketed cornice. An identification plaque is on one of the storefront pilasters, identifying this as a Mesker Brothers front, the only such pressed metal front in the historic district and the product of a prolific company from Evansville, Indiana which produced a wide variety of pressed metal architectural features. The building is significant architecturally for its position as a physically unique example of nineteenth-century mail-order catalog commercial design in Hinton. Early uses include that of the National Bank of Summers and the Fairyland Theater.

Description: 2-story Italianate commercial building of brick with altered storefront and original upper facade, including 3-bay massing, flat-topped windows and modest metal cornice

Date: c. 1890

1 contributing building

199. 221 Third Avenue, commercial

Description: Italianate vernacular commercial building of brick, 2 stories in height, with flat roof, altered storefront on first story, and 3-bay upper facade with a second-story open porch accessed by a door in the centermost bay. Porch includes replacement wood balustrade and roof with scalloped rafter tails, and is supported from the ground by iron pipes and from the ceiling by turned wood posts. Corbeled brickwork on upper facade and modestly-detailed Italianate cornice with brackets extends along the roofline.

Date: c. 1890

1 contributing building

200. 317 Third Avenue, residential

Description: Vernacular 2-story residence with facade dominated by double-gallery porch extending its entire width, set on a replacement concrete block foundation and trimmed with plain wood posts and solid wood railings on each floor. The main section of the building has a laterally-oriented gable roof with a gablet offset on the northern section. Fenestration is flat-topped, 1/1, without remarkable ornament.

Date: c. 1900

1 contributing building

201. 319 Third Avenue, commercial

Description: Two-story vernacular residential building built in several stages within the period of significance. The main brick building is hipped-roofed, with a facade dominated by a two-story porch with the second story enclosed with paired double-hung windows to create a "sleeping" porch. Fenestration on this section is segmental-arched. Set back from the main section is a 2-story lateral gable-roofed section of wood with a three-bay facade and centered entrance.

1 contributing building

202. 321 Third Avenue, commercial

Description: Three-story commercial building of light-colored brick with a flat roof and a double-gallery porch above the storefront on the second and third stories. Porch is cantilevered over sidewalk and upper stories include attenuated posts and solid roof railings on each floor. Each of the upper stories has a centered entry, suggestive of a central-passage interior plan for each of the apartments. Storefront altered but retains traditional window-to-wall ratio.

Date: c. 1900

1 contributing building

203. 411 Third Avenue, religious/educational

Description: Symmetrically-massed Colonial Revival religious educational building of brick, with a 7-bay facade and 7-bay lateral elevations. Flat, unobservable roof. Main entrance is centered on the facade, featuring double wood doors and a shed-roofed hood above which is a single-hung 36-light sash. Other fenestration is multi-light in configuration. Building is sparsely detailed including some corbeled brickwork and brick quoins. The Methodist Church with which the building is associated stands immediately to the north, fronting on Ballengee Street. The Educational Building replaced two residential buildings which stood between the Church and the alley south of Ballengee Street.

Date: 1930

1 contributing building

204. 415 Third Avenue, residential

Description: Brick American Foursquare set on a parged masonry foundation and capped with a pyramidal roof with a dormer on the facade. Hipped-roofed porch extends across facade, with original lattice skirting and plain square wood posts; replacement balustrade. Fenestration flat-topped, 6/1

8. Significance

The Hinton Historic District (Boundary Revision) meets National Register Criterion A for *politics/government, education, religion, and transportation* and Criterion C for *architecture*. Evaluating the fabric of the nominated area under this Criterion, the district's properties represent both vernacular and formally-designed architecture reflecting styles popular during the period of significance, which begins c. 1870 the date of construction of the district's earliest buildings (the Campbells-Flanagan-Murcell House at 406 Summers Street; Resource No. 38), and ends in 1954, corresponding both to the National Register fifty-year guideline and to the approximate date of construction of the latest of the district's historic resources (the former high school on Temple Street; Resource No. 88; Photo No. 20).

The National Register Criterion A significance of the district for *politics/government* is supported by the presence in the district of the previously-listed 1870s Summers County Court House (Resource No. 118; Photo 21; Fig. 4), the 1870s Summers County Jail (Resource No. 164), and the U. S. Post Office (Resource 119; Fig. 5), which dates from 1926 with a compatible 1960s addition.

Criterion A significance for *education* derives from the district's position as a long-time center for local education, evidenced by the former Hinton High School (Resource No. 88; Photo 20) and Lincoln School on Hill Street (Resource No. 207; Photo 27), a pre-integration African-American neighborhood school.

The patterns in the community's religious heritage is substantiated by several imposing churches in the district, the earliest of which is the c. 1890 Methodist Episcopal Church (Resource No. 124) at Ballengee Street and Third Avenue. It was followed in 1898 by St. Patrick's Roman Catholic Church at Temple Street and Second Avenue (Resource No. 75; Fig 6) and by Ascension Episcopal Church (Resource No. 93), also of 1898, which was moved to its present site at Temple Street and Fifth Avenue in 1907 (Fig. 7) and was veneered in brick in 1929. In 1913 the First Baptist Church (Resource No. 70; Fig. 8) was built at 110 Temple Street, followed in 1922 by the First Presbyterian Church at 220 Third Avenue (Resource No. 187), and in 1925 by both the Second Baptist Church at 206 James Street and the Central Baptist Church at 100 Union Street (Resource Nos. 166 and 149, respectively).

United States Department of the Interior

National Park Service

National Register of Historic Places

Continuation Sheet

Hinton Historic District (Boundary Revision)
Summers County, WV

Section Number 8 Page 73

The district's association with patterns of *transportation* runs as deep as the history of Hinton itself. Long a major hub of the C & O (later the B & O) Railway, the rail yards lie just north of the district. The district's irrefutable association with transportation history is supported by the presence in the district of the C & O Freight (Photo No. 1) and Passenger (Photo No. 5) Depots (Fig. 9; Resource Nos 4 and 14, respectively) and by the Y. M. C. A. (Resource No. 13), which was built by the railroad for use by its employees who made up much of the population of the community for decades.

The National Register Criterion C significance of the Hinton Historic District (Boundary Revision) is established by the presence in the district of buildings which reflect vernacular traditions and formal styles of architecture popular during the forty-five year period of significance. Among these style are the Italianate, Gothic Revival, Neo-Classical Revival, Colonial Revival, American Foursquare, and Bungalow, specific examples of which are discussed in Section 7.

Additional Criterion C significance is derived from the presence in the district of buildings designed by regionally- and nationally-prominent architects. Frank Pierce Milburn (1868-1926) designed court houses & business blocks throughout southwest West Virginia, court houses in Kentucky, Virginia, and the Carolinas, as well as the old Florida State House. He designed the Hotel McCreery (Resource No. 162) and the Masonic Lodge (Resource No. 87).

H. Rus Warne, the architect of the First Presbyterian Church (Resource No. 187) was a student in the Beaux-Arts tradition, having studied in Paris and Rome. A Parkersburg native, he practiced in his home town only briefly before moving to Charleston where he became one of West Virginia's most important early 20th-century architects. Included among his commissions are the Boone County Court House, in Madison West Virginia and in Charleston, the City Hall, Masonic Building (1915), and the Cabell (African-American) School.

Hinton's U. S. Post Office (Resource No. 119; Fig.) is the work of the office of James A. Wetmore (1863-1940), who for forty-five years was the Architectural Supervisor of the U. S. Treasury Department and under whose supervision more than two thousand buildings were designed.³

³Henry F. Withey, FAIA and Elsie Rathburn Withey, **Biographical Dictionary of American Architects (Deceased)** (1956; rpt., Los Angeles: Hennessey and Ingalls, Inc., 1970), p. 647.

National Park Service

National Register of Historic Places
Continuation Sheet

Hinton Historic District (Boundary Revision)
Summers County, WV

Section Number 8 Page 74

In addition to these, Huntington architect J. B. Stewart designed the Big Four Building (Resource No. 81), Richard Bates of Huntington, was responsible for the National Bank of Summers at 201 Temple Street (Resource No. 52), and Charleston architect Frank Crowther designed the Central Baptist Church at 100 Union Street (Resource No. 166).

Hinton and the Hinton Historic District (Boundary Revision) lie on land that was formerly owned by Isaac Ballengee.⁴ The area's first settler, Ballengee likely served in the War for Independence. He took an oath of allegiance to the Commonwealth of Virginia in 1777 and was presented with a land grant of 210 acres. He departed Botetourt County with his wife Jane to claim his land grant and first settled near the Bluestone River. Native Americans forced him away from his claim, and in 1785 he relocated to the mouth of the Greenbrier River and claimed all the land which now comprises the city of Hinton as well as the settlements of Avis and Bellepoint. The Native Americans again tried to dissuade him by burning his next home, but the stalwart Ballengee built another log house which survived until the 1940s when it was razed for the construction of the Bluestone Dam.

Isaac Ballengee lived for less than a decade on his new land, dying in 1792. He left his wife and their three sons, Isaac Jr., George, and Henry, among whom their father's land was divided. Isaac, Jr. settled in the Hinton area and built a house (Fig. 2; not extant) near where the C & O Railroad shops were eventually built. Henry Ballengee settled in the Avis area but soon sold his holdings to John "Jack" Hinton and moved west. George Ballengee located at the mouth of the Greenbrier River in what is now Bellepoint.

Early transportation arteries followed a series of Native American trails which intersected near the Ballengee/Hinton settlement. Among the more prominent trails mentioned in early accounts were the Seneca, Midland, Paint Creek, Pocahontas, Guyandotte, and Big Sandy-Tug Fork trails. The James River and Kanawha Turnpike was completed along the route of the old Midland Trail to Gauley Bridge by 1825, but the most important early roads were the Red Sulphur and Kanawha Turnpike and the Giles, Fayette, and Kanawha Turnpike, both of which were completed prior to the Civil War. Other

Section Number 8 Page 75

roads in Summers County followed the aforementioned Native American trails. Prior to the construction of the railroad in the early 1870s, these trails were the principal thoroughfares into and out of the New River country. Road improvement into and out of the Hinton area was slow, principally due to the rough terrain and sparse population. With the arrival of the railroad and the completion of the Court House, roads to the county seat began to improve to permit the railroad and the city to be more accessible.

Due to the poor roadways, river transportation along the New and Greenbrier Rivers played a role in the early history of Hinton, and the various waterways were the main source of shipping freight, logs and lumber to other parts of the county. Early accounts of the area reference the use of the river for floating produce on rafts or batteaux which were operated in packs, hauling lumber, staves, tanbark and other provisions. Batteaux were also used to carry materials down the Greenbrier River from White Sulphur Springs for the construction of the C & O Railway, which eventually put river transportation out of business. Other types of river transportation on the New River included a steamboat, the "Cecelia," built in 1878 in an ill-fated scheme designed to provide transportation between Hinton and Bull Falls, and a sailboat, the "Black Hawk," built at Hinton by Captain Frank Dennis, the sailor-brother of Maryland Senator George Dennis. Both of these ventures were short-lived. The "Cecelia" sank near shore, close to the ferry landing in Avis, and Captain Dennis sold out his properties and moved west.

The oldest and most useful of water transportation was the ferry, used to move people, vehicles and livestock from one side of the river to the other. Many ferries crossed the New River, including Pack's Ferry at the mouth of the Bluestone which led to the Giles, Fayette, and Kanawha Turnpike, two ferries at Hinton, one at Meadow Creek, Patrick's Ferry at the mouth of the Greenbrier, and Richmond's Ferry at the mouth of Laurel Creek. Soon after the completion of the Hinton Toll Bridge in 1906, the ferries in the Hinton area were forced out of business.⁵

For the first seven decades of the nineteenth century, little development occurred in the area that would become Hinton. When Summers County was formed in 1871, only two houses stood in

⁵The 1906 toll bridge is not extant, but its tollkeeper's house (Resource No. 44) stands at the east end of the present bridge at the western edge of the district.

the Hinton/Avis area, the Ballengee house in Hinton and the John Hinton house in Avis. By the early 1870s, only six families lived in the area but all would change when Hinton was chosen as a major terminal yard for the C & O Railway's main line.

The cultural and economic history of Hinton and the historic district are linked inextricably to that of the Chesapeake and Ohio Railway.⁶ The Virginia legislature had envisioned a canal system leading from Richmond to the Ohio River, a system to rival the Erie Canal. The Virginians' canal dream went unfulfilled, but Baltimore entrepreneurs created the Baltimore and Ohio Railroad which was began 1828 and was completed to Wheeling (then in Virginia) on the Ohio River in December, 1852. While the B & O was working its way west, in 1836 the Louisa Railroad was incorporated, becoming the first of a group of successor organizations which eventually led to the incorporation of the Chesapeake and Ohio Railway. Over the next decades, including the disruption of the Civil War, the operation changed named several times until emerging as the C & O in 1867, named to indicate the transportation link between eastern Virginia and the Ohio River commerce.

Progress was satisfactory in the railroad's Kanawha and Western sections, with the road completed to Charleston from the Ohio by December, 1871 and to Kanawha Falls the following year. The Greenbrier Division had the task of building the 6,500-foot Big Bend Tunnel through Big Bend Mountain east of Hinton, which was not completed until May, 1872. The line was officially opened for business in March but it was not until September that the road was formally turned over to the C & O Transportation Division for operation.

On November 6, 1871 lands of Isaac Ballengee, Jr. were sold at public auction to the C & O Railway Co. for \$3,600. A town was platted into 178 building lots (Fig. 1) and early in 1873 the railroad conveyed all of the property except five lots and the land needed for railroad operations to the Central Land Co. for \$12,000. Hinton's original plan consisted of five named streets⁷ running roughly northeast to southwest and parallel to the railroad trackage and nine numbered streets (later changed

to "avenues") perpendicular to the named streets.⁸ The groundwork was laid for the development of the new community and the Central Land Company began to sell lots; corner lots sold for \$300 and mid-block lots for \$250. From the beginning, the population grew, adding as many as 300 persons in one year.

Much of the early railroad freight in and out of Hinton was agriculture-based, including lumber, hay, corn, potatoes, bacon, butter, and wool. However, during the 1888-1900 presidency of M. E. Ingalls the C & O set out to build its coal traffic. In the 1890's the railroad began to build feeder branches up the larger New River tributaries to tap rich coal fields, a venture apparently spurred by rival railroads which were entering and developing the coal fields of southern West Virginia. The C & O discovered the relationship between coal and profit and the economic strength of the railroad and Hinton was assured for decades.

Lumber, too, played a significant role in the fortunes of Hinton and the C & O. In the 1880's the demand for coal and lumber stimulated the West Virginia economy, and Hinton was profoundly influenced by the timber boom. Branch railway lines were extended into the virgin forests to provide access to this vast resource. The railroad, of course, through its expanding network of trunk lines, provided easy access for delivery of materials from and to eastern markets. Large companies were formed to exploit the untapped resource and in a few decades produced literally billions of board feet of lumber in an operation which cut virtually all of the stands of virgin timber in the state.

Returning to the history of the community and the Hinton Historic District, according to a 1908 county history, the earliest buildings erected in the new town were along Front Street.⁹ A c 1876 map of the new community corroborates this, indicating a concentration of early buildings on Front Street, some on Summers and Temple Streets, and a scattering of buildings beyond. The community's earliest businesses included the stores of John and Silas Hinton and a Mr. Tomkies (established in 1872

⁸Portions of First (also known as Park) through Fifth Streets/Avenues are in the district.

Section Number 8 Page 78

and 1874, respectively) in the settlement of Avis,¹⁰ adjacent to and southwest of Hinton. Other early businesses included the Ridgeway Saloon (1873), which was located in the Hinton House, the town's earliest hotel, at Third Street and Front Street; and the Burke Prince store and Post Office (1876) and the Price store (1873), both on Front Street. None of these are extant.

Hinton's growth was temporarily set back by a major flood in 1878, but the community rebounded and in 1880 the fledgling settlement was incorporated with W. R. Benedict serving the first of three terms as mayor. The first few years of incorporated history saw the development of city government facilities and services including a city hall (not extant), a jail (Resource No.164), a water system, and a school system.

The educational history of the community dates to 1873 when C.L. Ellison won an election for County Superintendent. At that time Hinton had no public school house, and one of the first acts of the board was to rent a building. Eventually the first of several school buildings were built on Temple Street; the earliest part of the present school building (Resource No. 88) was completed in 1954 at the end of the period of significance of the district. Lincoln School (Resource No. 207) was built on Hill Street in the 1920s for the community's African-American student population, and a bequest from Pittsburgh steel magnate Andrew Carnegie, enabled the construction of a public library (Resource No. 97) in 1912 behind the high school.

The C & O shops were completed in 1892 and included a substantial roundhouse with seventeen engine stalls and a car repair shop holding forty cars. The operation employed 540 men and infused into the local economy an average monthly payroll of \$84,000. In addition to the shops and roundhouse, the C & O built freight and passenger depots (Resource Nos. 4 and 13) and in 1891 a YMCA (the original YMCA burned and was replaced by a new facility (Resource No. 13) in 1911.

The growth and maturity of the community is also reflected in the rise of organized religion in Hinton, which dates to the earliest years of the community. Several substantial church buildings in

¹⁰This settlement was named for John Hinton's wife, Avis. It is part of the incorporated city of Hinton but is outside the district.

Section Number 8 Page 79

the district reflect the spiritual history of the district. The First Baptist Church was established in 1872. The original building for the church was constructed in 1877 on land donated by the Central Land Company. The Methodist and Presbyterian congregations also used this building until they could build churches of their own. The present First Baptist Church (Resource No.70) dates from 1913. The local Methodist Episcopal Church was also formed in 1872; the congregation first used the public school building until a permanent house of worship was completed in 1876. The present brick church (Resource No.124) was built in 1890. In 1873 the First Presbyterian congregation was formed, meeting first in the Court House and later in a school building. The present Neo-Classical Revival-style church (Resource No. 187) dates from 1922.

The Second Baptist Church--the oldest African-American congregation in Hinton--was organized in a private home in 1878. Encouraged by a rapidly growing membership, the church acquired its present location on James Street for \$35.00. A frame church building was dedicated in 1881 and was used until the 1926 completion of the present Colonial Revival-style church (Resource No. 149).

Roman Catholics organized St. Patrick's Parish in 1874 and in May of that year acquired a lot at the corner of Temple and Second streets from the C & O for \$100. The present Gothic Revival-style church (Resource No. 75) replaced a small frame building in 1898.

Hinton's Episcopalians formed a church in 1874 and in the spring of 1881 a building was completed on the corner of Temple Street and Third Avenue, the present location of the Big Four Building. In 1897, the building was destroyed by a tornado and its replacement (Resource No. 93) was completed in 1898. In 1907, the church was moved two blocks eastward to its present location at the corner of Temple Street and Fifth Avenue; in 1929 the exterior of the church was clad in a brick veneer.

The Central Baptist Church was organized in 1894 and occupied several venues before the present Neo-Classical Revival-style church (Resource No. 166) was completed in 1925.

By the early years of the twentieth century, a sewer system and an electric company had been added to Hinton's growing repertoire of public services. The city's cultural enlightenment had been addressed somewhat by Col. Joseph Parker who built an opera house (not extant) by the mid 1880s,

Section Number 8 Page 80

and a new brick high school which opened for the 1893-1894 school term. The Bank of Hinton opened in 1887 at the corner of Third Avenue and Temple Street. In 1895 the National Bank of Summers (Resource No. 63; Fig 10) opened on the opposite corner of Third and Temple. The wholesale operations of the Hinton Grocery Co. began in 1892 and in 1901 consolidated with the New River Grocery Company, whose historic warehouse (Resource No. 5; Fig. 11) is in the district.

The twelve years between 1895 to 1907 saw a building boom reflecting the early prosperity of Hinton and its citizens. The Hinton Marble Works (Resource No.8; Fig. 12) was established in 1895 by R. E. Noel who is best remembered for his 1901 monument to the Confederate Soldiers of Monroe County in Union. Various substantial business blocks replaced the earlier store buildings: the Plumley building was erected in 1895; the Jones Building dates from 1895; Tomkies mercantile building on Third Avenue was erected in 1895; the Rose building(not extant; burned and replaced by a parklet, Resource No. 80) was built in 1897; the Hinton Hospital was opened in 1899 by Dr. O. O. Cooper and early in the twentieth century two other hospitals, Bigony's and Holly's were opened--none are extant; the Richmond store in Avis opened in 1900; the Dolan Hardware (Resource No.192) opened in 1900 on Third Avenue; the Hinton Hardware Company was established in 1901 and the Ewart-Miller Building (Resource No. 105) on Ballengee Street was completed in 1905 as a professional office building. Citizens Bank, the Elks Lodge and Laing, Humphries & Co. shared a major corner property (Resource No.74) completed in 1907 at Second Avenue and Temple Street. Two of the districts other large buildings were completed in 1907 and 1908, respectively. The five-story Hotel McCreery (Fig. 13; Resource No. 162) was built at Ballengee and Second Streets and the four-story Big Four Building (Fig. 14; Resource No. 81), at Third Avenue and Temple Street was completed by the four major railroad workers' organizations, the Order of Railway Conductors, the Brotherhood of Railway Trainmen, the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen.

Other notable events during these years of growth included the arrival of the first automobile and the opening of the Hinton Toll Bridge over the New River, both in 1906. In 1907 and 1908 several fires occurred in the downtown, damaging a number of the city's leading commercial properties. In 1908 street-paving in the downtown began, using paving bricks for the cartways and concrete for gutters and curbing.

Summers County, WV**

Section Number 8 Page 81

After the major building boom which ended with the 1908 building season, construction proceeded at a somewhat slower pace, although additional major buildings were erected through 1934. The Lilly Building and the Fox Building on Second Avenue and the Bowling-Haynes Building on Ballengee Street were completed in 1910, the Carnegie Library (Resource No. 97) in 1913, the Hinton Post Office (Resource No. 119) on Ballengee Street and the Hinton Daily News Building (Resource No. 169) on Second Avenue in 1926, the Ritz Theatre (Resource No. 103) on Ballengee Street in 1929 and the Memorial Building on First Avenue (Resource No. 167) in 1938 under the auspices of the Works Progress Administration.

When the first building boom waned in 1908 the population of Hinton was about 6,000, a figure which by 1925 had grown to more than 8,800. The railroad remained the driving force of the community and the exploration of the coal fields along the New River kept the trains rolling and the economy of Hinton stable into the years following World War II. In the 1950's, however, changes in coal mining technology, the working out of some of the older mines, the abandonment of coke-making, and the conversion of locomotive power from coal-powered steam to diesel, all drastically altered the socio-economic life of Hinton. The C & O laid off hundreds of workers who had been specialists in maintenance of steam engines, and the population declined significantly. The shops and roundhouse were demolished and little remains beyond the depots and tracks as a reminder of Hinton's heyday as a rail center.

The Bluestone Dam, a flood control/recreation project completed in 1949, along with the Bluestone Public Hunting and Fishing Area and Bluestone State Park, have brought some reinvigoration to the Hinton economy. Other important tourism-related factors for the present city of 5,000 are the development of Pipestem State Park and the New River Gorge National River, both of which attract an influx of travelers to the historic community.

Viewing the Hinton Historic District (Boundary revision) in the context of other similar resources, The Thurmond Historic District in Fayette County, is another New River community whose history is linked to the C & O Railway. Thurmond bears the name of W. D. Thurmond, the town's original proprietor, and developed as a linear district along the river with comparatively modest architecture and only three or four house types, unadorned and lacking in any flamboyance or preten-

Section Number 8 Page 82

sion. Fayetteville, also in Fayette County on the New River plateau, has a period of significance beginning thirty years earlier than that of Hinton, and ending a decade and one-half earlier. The Fayetteville Historic District owes its existence to its location on an early turnpike, while Hinton is linked inextricably to the railroad. Containing about 185 buildings, Fayetteville is significantly smaller than Hinton. Also, its distinction is partially owed to associations with Civil War events, and was occupied both by Confederate and Union troops during the conflict. Fayetteville is small-town county seat with two- and three-story brick and stone commercial buildings and residences reflecting primarily Queen Anne- and Colonial Revival-style design tenets. Hinton differs from these communities in several instances. First, it is considerably larger than either of the other two districts and contains a significantly larger diversity of residential and commercial buildings spanning the entire 1870-1954 period of significance. Hinton's commercial district is built on a far grander scale than is either Fayetteville or Thurmond, with buildings such as the Hotel McCreery, the Big Four Building and the Citizens Bank/Elks/Laing Humphreys Building towering over the commercial resources in the other districts. While Hinton can claim no historic stone buildings as can Fayetteville, Hinton's repertoire of domestic design is much more complex, including vernacular workers' housing along side of high-style managers homes.

Summarizing, the Hinton Historic District (Boundary Revision) is a locally-significant southeastern West Virginia historic district containing domestic, commercial, and institutional architecture and one historic commemorative object. The district retains integrity and reflects on a local level the patterns of education, religion, transportation and politics/government; architecturally, the district contains locally-distinctive examples of many of the styles of design which were popular during its c.1870-1954 period of significance.

JUSTIFICATION

The boundaries of this nomination consist of the downtown area of the city of Hinton and the immediately adjacent historic residential neighborhood, as well as contiguous extant resources from the city's association with the railroad erected during the c. 1875-1954 period of significance. The boundaries modify only slightly those of a 1983 historic architectural survey and the original 1984 National Register nomination, and were redrawn to include a historically-African American neighborhood school immediately adjacent to the original district.
