# National Register of Historic Places Registration Form

### 1. Name of Property

historic name Tabler's Station Historic District

other names/site number N/A

### 2. Location

street & number Portions of Tabler's Station Road and Carlton Drive not for publication N/A

city or town Martinsburg vicinity N/A

state West Virginia code WV county Berkeley code 003 zip code 25401

### 3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this  nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property  meets  does not meet the National Register criteria. I recommend that this property be considered significant  nationally  statewide  locally. (See continuation sheet for additional comments.)

**8. Statement of Significance**

**Applicable National Register Criteria**

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

**Areas of Significance**

(Enter categories from instructions)

ARCHITECTURE

**Period of Significance**

c. 1890-1953

**Significant Dates**

N/A

**Significant Person**

(Complete if Criterion B is marked above)

N/A

**Criteria Considerations**

Mark "X" in all the boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years

**Cultural Affiliation**

N/A

**Architect/Builder**

Unknown

**Narrative Statement of Significance**

(Explain the significance of the property on one or more continuation sheets.)

**9. Major Bibliographical References**

Section Number 7 Page 1

---

**7. Description**

The Tabler's Station Historic District (Photos 1-9) is a primarily residential district and consists of thirty-one acres lying along portions of Tabler's Station Road and Carlton Road, in the Arden District of Berkeley County, approximately three miles southwest of the county seat of Martinsburg, in the rural eastern panhandle of West Virginia. The Tabler's Station Historic District contains a total of twenty-four resources, all buildings, of which nineteen are houses, one is a church (Photo 6), one is a presently-vacant industrial property (Photo 1), and three are residential dependencies (two garages and one outbuilding of indeterminate use). Of the district's twenty-four resources, nineteen (80 %) contribute to the character of the district and five (20%) are non-contributing. The non-contributing resources are so designated because they date from outside the c. 1890-1953 Period of Significance of the district. Approximately eighty percent of the properties in the district pre-date 1920, approximately ten percent were constructed between 1920 and 1953, and the remaining approximately ten percent post-date 1953. In addition to the predominating domestic architecture of the district, the small settlement's limited institutional growth and maturity is represented by one church (Resource No. 16; Photo No. 6).

The vast majority of the district's architecture is of wood construction(Photos 1-9); the district's one industrial property, the former Shiftman Brothers Mattress Factory (Resource No. 10; Photo 1), is built of concrete block. Most of the homes retain front porches of varying scales and forms and some have garages. Larger dependencies are included in the resource count, while smaller outbuildings (sheds, etc.) are treated as low-scale landscape features and are not represented in the count. The district retains integrity in each of its seven qualities: location, design, setting, materials, workmanship, feeling, and association.

The topography of the district is flat and Tabler's Station Road, the major public right-of-way runs in a northwest-to-southeast direction. It is intersected by Carlton Drive, which extends to the southwest nearly opposite the former mattress factory. Both streets are asphalt-paved. The district is characterized by building lots of varying dimension with diverse front, side, and rear lot setbacks. Landscaping includes large and small lawns along with mature shade trees which are scattered throughout the nominated area. Some properties are fenced with split rail fencing, picket fencing and chain-link fencing.

The buildings in the district are rectilinear in form and vary in height between one and two and one-half stories. Most domestic architecture in the district incorporates gabled and hipped roofs; the single church in the district has a gable roof, oriented to the street, and the one industrial building is

**United States Department of the Interior  
National Park Service**

**National Register of Historic Places  
Continuation Sheet**

**Tabler's Station Historic District  
Berkeley County, WV**

Section Number 7 Page 2

---

flat-roofed. The majority of the buildings in the district rest on substantial foundations of ashlar limestone; a smaller proportion of foundations are of brick. Due to the late-nineteenth and early-twentieth-century character of much of the district, most buildings are penetrated by tall and narrow patterns of fenestration. The flat-topped window form is the most prevalent in the district; several repetitive house types also employ a pointed-arched window in the pediment of the centered gable on the facade.

The architecture of the Tabler's Station Historic District is primarily vernacular in character<sup>1</sup> and represents the building traditions of this section of Berkeley County. Several examples of late nineteenth-century repetitive house types are found in the district (Resource Nos. 13, 14, 15, 19, and 22; Photos 4 and 5). These are central-passage, single-pile homes, whose otherwise modest vernacular character is embellished by the aforementioned use of pointed-arched windows in the pediments of gables centered on the facade. The use of such fenestration is a chronologically-late survivor of the Gothic Revival style which was popular in America primarily from the 1850s through the 1880s. The Presbyterian Church (Resource No. 16; Photos 4 and 6) is Gothic Revival in design, with the lancet-arched fenestration which is central to the defining characteristics of this particular style.

Other styles of design represented in the district are the Bungalow and American Foursquare. The ubiquitous American Foursquare, more of a house type than a formal architectural style, is essentially square in plan and usually incorporates a dormered hipped roof and a hipped-roof front porch. Two examples of this style, 86 Carlton Drive (Resource No. 3) and 5622 Tabler's Station Road (Resource No. 17; Photo No. 7) appears in the district; the both include the hipped roof and dormers characteristic of the style, and the porch of 5622 Carlton Drive incorporates Neo-Classical Revival-style-derived columns set on brick piers.

Bungalows were a popular middle-class design choice beginning early in the twentieth century and continuing well into the 1930s. One and one-half stories in height, these properties typically include a laterally-oriented roofline and often incorporate large dormer and a front porch recessed beneath the slope of the main roof. This style appears in the Tabler's Station Historic District in the property at 5671 Tabler's Station Road (Resource No. 21; Photo No. 9), which is of wood construction and includes Adirondack-style braces under the eaves.

As noted in the introductory paragraph, the Tabler's Station Historic District retains historic and

---

<sup>1</sup>The term, "vernacular," refers to a building built without being designed by an architect or someone with similar formal training," the definition found in Ward Bucher's **Dictionary of Building Preservation** (New York: John Wiley, 1996), p 512.

**United States Department of the Interior  
National Park Service**

**National Register of Historic Places  
Continuation Sheet**

Section Number 7 Page 3

---

architectural integrity. The overall character of the district is intact and represents the growth and maturity of this settlement throughout its sixty-three year-long Period of Significance. Alterations to buildings within the district include the application of non-historic siding and the installation of replacement windows. These alterations are widely dispersed throughout the district and do not detract significantly from the ability of the nominated area to reflect its general appearance throughout the Period of Significance.

The following properties lie within the Tabler's Station Historic District. The numbering corresponds to the district map submitted with the nomination documents. Those properties indicated as being contributing are assumed to date from within the Period of Significance of the district and retain sufficient physical integrity enabling them to reflect their appearance during their historic past. Properties which are designated "non-contributing" were built outside the Period of Significance; no properties in the district possess alterations so severe that their individual architectural character has been seriously compromised.

1. **104 Carlton Drive**, residential

Description: 1½-story vernacular cottage set on a foundation of concrete block, with an intersecting gable roof of standing seam metal, and a single-story hipped-roofed porch on the facade

Date: c. 1940

Viewed in its entirety, the Tabler's Station Historic District consists of an architecturally-cohesive primarily residential rural village situated along a historic rail corridor and two intersecting county roads in Berkeley County, West Virginia. The nominated area retains integrity, reflecting its appearance throughout much of the period of significance, and contains historic residential buildings, one historic church, and one historic industrial property.

**United States Department of the Interior  
National Park Service**

**National Register of Historic Places  
Continuation Sheet**

**Tabler's Station Historic District  
Berkeley County, WV**

Section Number 8 Page 9

---

**8. Significance**

The Tabler's Station Historic District is significant under National Register Criterion C for *architecture*. Evaluating the fabric of the district under this Criterion, the district's nineteen contributing buildings represent vernacular<sup>2</sup> building traditions and a limited amount of formally-designed architecture reflecting styles popular during the Period of Significance, which begins c.1890, the date of construction of the district's earliest extant buildings, and ends in 1953, corresponding both to the 50-year guideline for National Register eligibility and to the approximate date of construction of the latest of the district's historic resources.

With respect to Criterion C, the district is architecturally cohesive and contains homes built by anonymous carpenters, primarily vernacular in character, and a few examples of properties which reflect some of the formal styles of architecture popular from the late-nineteenth through the mid-twentieth century. Among these styles are the Gothic Revival, Italianate, Eastlake, American Four-square, and Bungalow. Most of the architecture in the district is of vernacular derivation, which, although executed without reference to formal design tenets, nonetheless represents the significant manifestation of local building preferences in rural Berkeley County. Specific examples of the styles appearing in the district appear in Section 7 of this nomination.

The area which includes the Tabler's Station Historic District is part of a significantly larger tract known as Poplar Spring which was historically owned by Lord Fairfax. In 1751 the area was deeded to Lord Fairfax's cousin, George William Fairfax, and following George Fairfax's death in 1780, it passed to his nephew William Lee. In 1808, a 246-acre tract in Poplar Spring was purchased by Adam Tabler, Sr. The elder Tabler lived in Hedgesville, north of Martinsburg, and his newly-acquired tract was soon settled by his son Adam Tabler, Jr. Following the 1837 death of Adam Tabler, Sr., the 246-acre tract and additional farmland were acquired by Adam Tabler, Jr. and by the 1870s the Tablers, including John Newton Tabler, son of Adam Tabler, Jr. had amassed holdings totaling 917 acres. The settlement was initially known as "Tabler's," and the main east-west road bore the name, Tabler's Lane.

In the 1880s, the Cumberland Valley Railroad Company established a new line between Martinsburg, West Virginia and Winchester, Virginia for the transport of both passengers and freight. In

---

<sup>2</sup>The term, "vernacular," when used in this context, conforms to the definition which appears in Ward Bucher's **Dictionary of Building Preservation**: "a building built without being designed by an architect or someone with similar formal training; often based on traditional or regional forms."

**United States Department of the Interior  
National Park Service**

**National Register of Historic Places  
Continuation Sheet**

**Tabler's Station Historic District  
Berkeley County, WV**

Section Number 8 Page 10

---

describing the line, railroad historian Paul Westhaeffer noted, "the CVRR first and foremost served the Cumberland Valley, a particularly lush portion of the Great Valley that runs from Eastern Pennsylvania to Alabama. The CVRR was considered to be a almost perfect measure of Cumberland Valley's production, everything moved by the railroad, in or out."<sup>3</sup> In 1889, John Newton Tabler sold one acre of land to the railroad and in 1890 a depot was erected (Fig. 1; demolished c. 1932), with James T. Gano as Stationmaster.<sup>4</sup> The depot gave the community the name<sup>5</sup> and although the station is long gone and tracks have been removed, the name continues in use for the still unincorporated village. The railroad went on to acquire an additional seven acres, a cider mill was erected by Taylor Pitzer, James Morrison operated a blacksmith shop, and depot manager James T. Gano ran a general store. None of these early commercial properties are extant. The community developed as a primarily working-class settlement with many working in the vast orchards which have characterized the economy of Berkeley County for generations.

As members of the Tabler family died, some portions of their holdings were acquired by C. W. Lord and G. A. Harrison. Early in the twentieth century a portion of the farm on the south side of Tabler's Station Road was surveyed into building lots by Lord and Harrison. In 1905, some of the area citizens began to conduct Sunday School at the Burkhardt School (not extant) and soon a Presbyterian congregation was incorporated. William Stewart and H. H. Emmert subdivided nine acres on the north side of Tabler's Station Road into building lots. This area was known as Stewart's Addition, and in April, 1910, H.H. and Mary Emmert sold two lots to the trustees of the Presbyterian Church for \$100. A Gothic Revival-style house of worship (Resource No. 18; Photo 6) was erected shortly thereafter.

Viewing the Tabler's Station Historic District in the context of other similar resources in Berkeley County, the several Martinsburg districts are considerably larger than is the Tabler's Station district--including the Downtown Martinsburg Historic District--and exhibit a significantly larger concentration of formally-designed architecture, commercial, industrial, and domestic alike. Martinsburg owes a measure of its developmental success to the railroad, which is still active in the community and whose architectural heritage includes the Baltimore and Ohio and Related Industries Historic District. Tabler's Station developed around Berkeley County's orchard industry and was settled

Section Number 8 Page 11

---

around a rail spur; while the spur is no longer extant, the spatial relationship of the district to the railroad is unimpaired. The Harlan Spring Historic District, in northern Berkeley County, is a rural district focused upon a family farmstead, and the Hedgesville Historic District, further north in Berkeley County, dates from the 1830s and is a compact village containing a number of log homes, a lodge hall, some commercial architecture, and two churches. Tabler Station, conversely, is a rural cross-roads community containing primarily frame houses, one frame church, a twentieth-century industrial building, and virtually no commercial district. Those facts notwithstanding, the Tabler's Station Historic District is locally significant as a cohesive concentration of small-scale vernacular homes clustered around a(one-time) railroad spur in the heart of agricultural Berkeley County.

Summarizing, the Tabler's Station Historic District is a reflection of primarily rural working-class domestic design from the late nineteenth and early twentieth century, retains integrity. It is a generally linear rural village district characterized by modestly-detailed wood homes, one twentieth-century concrete block factory building, and one church building of wood construction. Its Criterion C significance is derived from the presence in the district of architecture reflecting vernacular domestic design in rural Berkeley County during the c. 1890-1953 period of significance.

**JUSTIFICATION**

The boundaries of this nomination consist of the area traditionally known as Tabler's Station, including homes built during the c. 1890-1953 Period of Significance, along with one industrial building and one church. The boundaries were selected as the result of a 2001 historic resource survey site completed under the auspices of the Berkeley County Landmarks Commission, with funding provided by the West Virginia State Historic Preservation Office. The boundaries incorporate residential properties, one institutional property, and one industrial complex, all of which collectively reflect the settlement and growth of the village.
