10. SIGNIFICANCE (use additional sheet if necessary):

<p>a. Architect/Builder/Engineer: _____</p> <p>b. Style/Period: <u>Second Empire</u></p> <p>c. Date(s): <u>1863</u></p>	<p>The rectory was built during the tenure of Dr. William L. Hyland (1859-1878), fourth rector of Trinity Parish. At that time, the parish was served by an 1843 brick church. It is a notable Second Empire design for Parkersburg.</p>
---	--

Trinity Rectory is actually the only remaining building in downtown which exhibits the concave profile mansard roof so identified with Second Empire period architecture. Other examples are seen in Parkersburg's Julia-Ann Square Historic District though the Episcopal rectory remains the definitive downtown representative.

Rectory, Trinity Episcopal Church
430 Juliana St. (S corner of Juliana & 5th Sts)
92-33

The Rectory is a freestanding building, joined by small wings to the church building. It is roughly 5 bays square, of 2 stories plus a concave mansard. The mansard is pierced by 3 dormers on the NW (front) facade and a dormer flanked by 2 chimneys on the NE (5th St.) facade; its cornice is bracketed, with larger, paired brackets between the bays. The 2nd story windows (3 on NE, 5 on NW originally) are d/s; on the NW, those in the outer 2 bays are joined by a picture window. The 1st story windows are also d/s. The central doorway on the NW has a transom and sidelights and is sheltered by a concave hood on wrought iron supports.
