### Narrative Description

(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

---

### Summary Paragraph

The City of Lewisburg, the county seat of Greenbrier County, is located in the Greenbrier Valley region of West Virginia. Lewisburg is situated in the southern portion of Greenbrier County. Two important transportation routes, US Route 60 (the Midland Trail) and Route 219 (the Seneca Trail), intersect in Lewisburg. The town developed from a frontier settlement to a small city with a variety of commercial, residential, governmental, religious, and educational structures and two cemeteries. The town lies in an area of relatively flat river valley land in the midst of rugged mountainous terrain. The commercial center of the town developed at the crossroads of US 219 (Seneca Trail) and US 60 (Midland Trail). Blocks become more residential proceeding outward in each direction. Both residential and non-residential buildings were constructed in a variety of architectural styles ranging from the colonial period to the present day. These architectural styles include Federal, Greek Revival, Italianate, Colonial Revival, and Ranch. The Lewisburg Historic District (Reference # 78002795) was listed in the National Register of Historic Places in 1978 and included 120 contributing resources and 78 non-contributing resources. The district also has nine individually listed resources: Old Stone Church (listed 1972), Greenbrier County Library and Museum (listed 1972), Greenbrier County Courthouse and Lewisburg Spring (listed 1973), John Wesley Methodist Church (listed 1974), John A North House (listed 1974), James Montgomery House (listed 1974), Governor Samuel Price House (listed 1975), Big Levels Baptist Church (listed 1978), and Confederate Cemetery at Lewisburg (listed 1988). This district encompasses approximately 350 acres and includes #442 contributing resources (including 89 outbuildings) and 75 non-contributing resources.

---

### Narrative Description

#### *Setting*

The City of Lewisburg, the county seat of Greenbrier County, is located in the New River/Greenbrier Valley region of West Virginia. Greenbrier County borders Virginia to the east, Monroe and Summers Counties to the south, Fayette and Nicholas Counties to the west and Pocahontas and Webster Counties to the north. Lewisburg is situated in the southern portion of Greenbrier County. Two major transportation routes, US Route 60 and US Route 219, intersect in Lewisburg. US Route 60 (the Midland Trail or Washington Street) is the major east-west thoroughfare and is lined with commercial, religious, and residential properties. Route 219 (the

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

Seneca Trail and Jefferson Street) is the major north-south thoroughfare and also contains residential and commercial properties. These routes intersect at the center of the Lewisburg Historic District. Lewis Spring, a source of water for explorers and early settlers, is located on a lot behind the Greenbrier County Courthouse. The Lewisburg Historic District encompasses approximately 350 acres and over 400 residential, commercial, religious, educational, and governmental buildings as well as two cemeteries. These buildings represent a variety of architectural styles dating from the colonial period to the present day.

Lewisburg was originally laid out in a 4x4 block grid pattern, consisting of 16 large blocks divided into four smaller lots for a total of 64 square lots. These large lots have since been subdivided into smaller lots of varying sizes. The original plat map contained six streets: three east-west and three north-south. The east-west streets consisted of Main (now Washington) Street, Randolph Street to the north and German (now Foster) Street to the south. The north-south streets included Market (now Court), Jefferson, and Lafayette Streets. The residential, commercial, and religious structures with the earliest dates of construction are scattered throughout the original plat on large lots. As Lewisburg's population increased, additional subdivisions and streets were laid out surrounding Lewisburg's original 64 lots.

*Building Types and Styles*

Lewisburg's central business district developed in a wide river valley along major transportation routes. Commercial buildings dating from the nineteenth and twentieth centuries are primarily concentrated along Washington Street between Church Street and Lafayette Street. A smaller number of commercial buildings also line Jefferson, Foster, Randolph, Lafayette, and Court Streets. Most of the attached commercial buildings are two to three stories in height, constructed of brick, and have storefronts with large display windows on the first floor. Specialty retail shops, restaurants, and professional offices occupy the first floor of the commercial buildings. The streets are lined with sidewalks and parking spaces.

Governmental buildings are scattered throughout the Lewisburg Historic District. The earliest extant government structure is the Greenbrier County Courthouse (No. 52). The current courthouse was erected in 1837 on lot number 7 and close to the street due to the location of Lewis Spring. In addition to county court functions, the courthouse served as the venue for the Supreme Court of Virginia, which held an annual session in Lewisburg starting in 1831 to serve residents in the western mountain region. A law library for the Supreme Court was constructed on the western end of town in 1834 (No. 79). This two-story, Federal style brick building shared a lot with the North House/Star Tavern (1820, No. 396) and was located along a major transportation route. When it was constructed, the surrounding area consisted of primarily farmland. Law offices also developed throughout the historic district in proximity to the courthouse. One of the early extant buildings that served as a law office is 850 Court Street N (No. 44), constructed in 1852. This one-story brick building served as the law office for Samuel Price and later John A. Preston before being converted into a retail business.

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

In 1897, the Greenbrier County Jail, a stone structure was constructed on North Jefferson Street. The jail is no longer extant. The Lewisburg Historic District also includes three municipal government buildings. The Lewisburg City Hall was originally located on North Court Street but has since relocated to the former Bank of Greenbrier building (No. 410) at 930 Washington Street West. Lewisburg's fire department and police department buildings are situated at 200 Foster Street and 119 Preston Boulevard respectively.

Extant residential buildings in the Lewisburg Historic District date from the late eighteenth century to the present day with the majority constructed in the twentieth century. Residences are primarily detached single-family dwellings with a mixture of sizes, massing, and architectural details. These dwellings represent the spectrum of architectural styles found within the United States and West Virginia. The architecture ranges from log structures to large two-story brick residences designed in higher styles including the Federal and Greek Revival, to popular styles from the late nineteenth and early twentieth century and concluding with Modern. The largest concentration of residences was constructed to the east of the central business district along Washington Street with a smaller number located to the north and south. Residences sit back from the street to varying degrees and have well-manicured lawns with mature trees. A handful of multi-family housing properties are dispersed throughout the district.

*Institutional and Ecclesiastical Buildings*

On Lewisburg's western edge is the present-day campus of the New River Community & Technical College. This large lot has a well-manicured lawn with picnic tables, shrubbery, and mature trees as well as a stone wall along Church Street. It consists of four education-related buildings including Greenbrier Hall (No. 35), Carnegie Hall (No. 32), Kyle and Ann Fort Arts and Science Building (No. 295), and the North House/Star Tavern (present-day Greenbrier County Historical Society's Museum and Archives, No. 396). Three of the four buildings rest on the hillside at the western end of the Lewisburg Historic District, overlooking the central business district while Carnegie Hall is located close to Church Street.

Two other education-related resources including the Greenbrier Military School (present-day West Virginia School for Osteopathic Medicine, No. 239) and Lewisburg High School (present-day Lee Street Studios, No. 217) are situated along North Lee Street in the northeast section of the Lewisburg Historic District. The Greenbrier Military School was constructed on land used for agricultural purposes and the Old Fair Ground. It is the northernmost resource in the Lewisburg Historic District. Its campus was located outside the settlement of Lewisburg and consisted of land north of Greenbrier Avenue, east of North Jefferson Street, and the majority of North Lee Street. Today, the main academic building continues to dominate the surrounding built environment, which is a mixture of green space, residences dating from the early twentieth century, and academic buildings from the late twentieth century. Centrally located along North Lee Street on a residential street is the former Lewisburg High School building. Unlike the majority of the surrounding residences, the three-story, brick academic building sits back from the street on a hillside.

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

There are churches of the Presbyterian, Methodist, Baptist, and Episcopal denominations situated in the historic district in the central business district and on Church Street. The earliest extant church is the Old Stone Presbyterian Church (No. 34). Constructed in 1796, Christopher Foglestone and John Brown built the first stone church on Church Street to replace the original log structure; an education building was added in 1910. Two brick churches were constructed on Foster Street in the early 1800s and became historically Black congregations after the Civil War: the classical temple-form John Wesley United Methodist Church in 1820 (No. 123) and the vernacular Gothic Revival style Mount Tabor Baptist Church in 1833 (No. 114). Historic twentieth century churches include the Romanesque style Lewisburg United Methodist Church (1905, No. 331) on Washington Street E, classical temple-form Shuck Memorial Baptist Church (1938, No. 397) on Washington Street W, and the Modern style St. James Episcopal Church (1951, No. 25) on Church Street.

*Landscape Features*

The Lewisburg Historic District features two public parks within the central business district: Andrew Lewis Park (No. 145) and Lewisburg Downtown Park (No. 177). Andrew Lewis Park is situated on the northwest corner of Jefferson Street and Randolph Street behind the Greenbrier County Courthouse. Andrew Lewis Park was developed around Lewis Spring, an early water source enclosed by a limestone building. Lewisburg Downtown Park was constructed in 1998 on the southwest corner of Washington Street and Jefferson Street on the site of the E. L. Bell Building, which was destroyed by fire. This small urban park features brick retaining walls and hardscaping, seating, and trees and shrubbery.

There are three cemeteries, the Old Stone Presbyterian Church Cemetery (No. 424), the Dick Pointer African-American Cemetery (No. 425), and Confederate Cemetery at Lewisburg (No. 257) located within the Lewisburg Historic District. The Old Stone Presbyterian Church Cemetery shares a large lot with the Old Stone Church and includes graves dating from the town's early settlement period. A separate cemetery for Lewisburg's Black population was established to the west of the Old Stone Presbyterian Church Cemetery and south of Carnegie Hall. The Confederate Cemetery is a small cemetery located in a wooded area on the western edge of the historic district and includes a cross-shaped mass grave of unknown Confederate soldiers killed during the Battles of Lewisburg and Droop Mountain.

Historic stone walls are located throughout the district and contribute to the overall historic setting, feeling, and association. The majority of these stone walls are retaining walls in front of residences along Washington, Church, and Jefferson Streets with a smaller number found along Walnut, Lafayette, East Randolph and Lee Streets. Stone walls also line the properties of the Old Stone Presbyterian Church Cemetery and Lewisburg United Methodist Church. Historic stone walls, including those not specifically described here, are considered characteristic landscape features of associated contributing resources. The stone retaining wall and herringbone brick sidewalk along Washington Street East are counted as a distinct contributing resource as pedestrian landscape features associated with the road (No. 307).

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

The Lewisburg Historic District consists of 349 primary contributing resources and 74 non-contributing resources. An intensive-level survey of Lewisburg found six contributing structures in the 1978 nomination have been demolished since initial listing and one resource, the L&R Railroad Depot, was recently relocated outside of the district. The majority of buildings in the Lewisburg Historic District are residential (about 280) followed by commercial buildings (about 100), and smaller numbers of religious, educational, governmental, and other use types. Approximately 10% of properties (about 44 of 424 properties, not including outbuildings) were constructed post-1974.

The earliest extant building in the Lewisburg Historic District is Jessie Bowlin House (1784, No. 337). Other resources dating from the late eighteenth century include the Lewis Spring (1785, No. 145), Bowyer-Grow-Foster House (1790, No. 398), a residence at 332 Lafayette Street (1794, No. 193), Old Stone Presbyterian Church (1796, No. 33), Gratton-Pare House (1796, No. 216), Thomas Edgar House (1797, No. 49), and "The Barracks" (1787-1807, No. 154). These buildings represent the early exploration and settlement era in Lewisburg's history.

*Integrity*

The Lewisburg Historic District retains integrity of location, setting, workmanship, design, materials, feeling, and association. The majority of structures in Lewisburg remain in their original locations. A smaller number of residences and commercial buildings have been demolished. While the structures have been altered with new siding and roofs and replacement windows, the overall character remains the same. Lewisburg's two-hundred-year history remains evident in its large number of extant buildings and residential scale. The historic district conveys its significance as an important location for commerce and architecture.

The following buildings that were listed as contributing (pivotal or secondary) have been demolished since the original listing in 1978. Street address numbers have changed since the original nomination; the current address is noted in parentheses.

E.L. Bell Store, 101 W. Washington Street (851 Washington Street W)  
McElhenney Lodge, 101B Church Street (668 Church Street)  
A. Cooper Property, 215 W. Randolph (between Livesay St. and Burdette Lane)  
Mason Barn, 235 N. Court Street (1019 N Court Street)  
A Hayes Property, 305 N. Jefferson St (was on 1117 Jefferson Street N parcel)  
Dr. M.L. Lacy House, 302 N. Lee Street (SE corner of Lee Street and Greenbrier Ave)  
Old L&R Railroad Station, 305 Echols Lane (moved outside of district to 288 Feamster Road)

<b>1. Dwelling</b>	158 Austin Street	1952	Contributing	2
Residential	Wood - Weatherboard	Asphalt - shingles	Ranch	1 / 4
This Ranch residence has a side-gabled roof with partial eave returns with an interior brick chimney on the west elevation. The fenestration is obscured by vegetation but includes the main entrance, one-over-one sash windows and sliding windows. An ADA ramp with wood railings leads to the front entry. A one-story brick addition with a flat roof, was added to the south elevation. Additions: one-story brick addition added to the side elevation; Alterations: replacement windows				
Outbuildings: Detached one-car garage (1970) with a front-gabled roof with a wide eave overhang and cornice returns.				
<b>2. "Mount Esperance"; Bell-Hamilton House</b>	121 Bell Drive	1942	Contributing	3
Residential	Brick	Asphalt - shingles	Classical Revival	2 / 6
This residence has a side-gabled roof and exterior brick chimneys on the gable ends. A cornice stretches across the front facade. The roof, supported by full height Doric columns, extends to cover the front portico. The fenestration along the front facade consists of the centered main entrance with side lights and flanked by pilasters and eight-over-eight sash windows with operable shutters on the outer bays. The remaining fenestration consists of eight-over-eight windows. A one-story addition was added to the rear elevation and a one-story stone addition was added on the east elevation. Additions: One-story wing with an interior swimming pool was added on the south elevation. It has a brick foundation, gable roof and ribbons of six-over-six sash windows. One story stone addition with a side-gabled roof and six-over-six sash windows.				
Outbuildings: Detached 3-car brick garage (1900) with a side-gabled roof. Contributing. Log cabin (1780; 620 Bell Street) with a stone foundation, side-gabled roof, horizontal windows, and brick chimneys on the gable ends. Contributing.				
<b>3. Dwelling</b>	122 Bell Drive	1937	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Tudor Revival	1.5 / 3
This residence consists of a central front gable with side-gable section extending from either side. The front-gable section is brick on the first floor and board-and-batten in the gable; the side sections are weatherboard. The front elevation contains an exterior brick chimney. A gabled dormer and a gabled wall dormer with six-over-six sash windows are present along the front facade and north elevation and shed dormers are present on the north elevation. A steeply-pitched gable with a multi-light diamond patterned window caps a central projecting bay. This bay consists of a centered main entry and quarrel casement windows on the outer bays. The remaining fenestration consists of eight-over-eight wood sash windows.				
Outbuildings: None				
<b>4. Dwelling</b>	182 Ben Ellen Alley	1985	Non-contributing	0
Residential	Vinyl	Unknown		2 /
This is a two-story cross-gabled residence with one-story projecting gables and 1/1 sash windows.

<b>5. Dwelling</b>	136 Bittles Cove	1959	Non-contributing	0
Residential	Metal - Aluminum	Asphalt - shingles	Ranch	1 /

The architectural details of this Ranch residence are difficult to see due to the wood fence. This residence has a rectangular plan and a front-gabled roof. An attached one-car garage is present on the east elevation. The north elevation has an entry door and a window hidden by vegetation. The fenestration on the west elevation consists of single and paired six-over-six windows while the remaining fenestration is hidden by a wood fence. Alterations: aluminum siding, gray asphalt shingles

Outbuildings: None

<b>6. Dwelling</b>	100 Brandon Drive	1972	Non-contributing	0
Residential	Brick	Asphalt - shingles	Ranch	1 / 5

This residence has a rectangular plan and side-gabled roof. The fenestration along the front facade consists of a centered main entrance and single, paired, and triple four-over-four vinyl sash windows with brick sills. This residence has been recently updated with a contemporary aesthetic and does not retain integrity of design. Additions: one-story addition clad in vinyl siding was added to the southwest elevation; Alterations: replacement windows, painted bricks, fixed shutters removed

Outbuildings: Frame utility shed (2012)

<b>7. Dwelling</b>	102 Brandon Drive	1967	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 2

This residence has a rectangular plan, mid-century modern asymmetrical front-gabled roof with exposed beam ends and an exterior brick chimney on the west elevation. The roof, supported by posts, extends to cover the carport. The fenestration on the facade consists of a single pane window and the main entrance. The exterior of this residence is clad in brick on the north elevation and T1-11 plywood on the east and west elevations.

Outbuildings: None

<b>8. Dwelling</b>	124 Brandon Drive	1967	Non-contributing	0
Residential	Brick	Metal	Ranch	1 / 3

This Ranch residence has a rectangular plan and side-gabled roof. The roof extends to cover the two-bay front entry and garage door. The fenestration consists of the main entrance and single and paired six-over-six sash windows with brick sills and fixed shutters. An attached one-car garage is present on the south elevation. The exterior of this residence is clad in brick and plywood along the front facade and aluminum siding on the west elevation. Alterations: Metal roof, vinyl replacement windows

Outbuildings: Small utility shed (1980) with a front-gabled roof and an off-center entrance

<b>9. Dwelling</b>	122 Brown Road	1962	Contributing	1
Residential	Metal - Aluminum	Metal	Minimal Traditional	1 / 3

This residence has a rectangular plan and a side-gabled roof. The fenestration along the front facade consists of the centered main entrance with a single side light and a multi-pane box bay window and an eight-over-eight sash window with fixed shutters. The main roof partially projects over the front entrance and box bay window. An attached one-car garage with a front-gabled roof is present on the west elevation.

<b>10. Dwelling</b>	133 Burdette Lane	1900	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Gable-Front	2 / 5

This residence has a front-gabled roof and interior brick chimneys along the roof line and on the south elevation. A shed roof, supported by square wood posts, extends to cover the one-story, three-bay, front porch. The fenestration on the first floor consists of an off-center main entrance and one-over-one replacement windows. On the second floor, there are two-over-two sash windows. A one-story wing is present on the south elevation and a one-and-a-half story addition on the rear elevation. Additions: One-and-a-half story addition on the rear elevation.; Alterations: Replacement windows, wood railing and columns on the front porch

Outbuildings: None

<b>11. McClenachan-Welch House</b>	137 Chestnut Street	1800	Contributing	2
Residential	Board and Batten	Metal	Federal	2 / 4

This residence has a side-gabled roof and exterior gable end brick chimneys. A one-story front porch supported by paired columns that rest on piers stretches across the front facade. Fenestration on the first level consists of a centered main entrance with side lights and nine-over-six sash windows with shutters on the outer bays. On the second story, there are six-over-six sash windows with shutters in each bay. A one-story enclosed sunroom is located on the east elevation. Additions: One-story addition with a metal roof and sheathed in board and batten. Fenestration consists of single and paired 6/6 windows. A one-story sunroom with a balustrade on the east elevation.; Alterations: siding

Outbuildings: One-and-a-half story outbuilding with a metal covered side-gabled roof. Fenestration consists of six-over-six windows.

<b>12. Dwelling</b>	174 Chestnut Street	1957	Contributing	1
Residential	Board and Batten	Asphalt - shingles	Ranch	1 / 5

This Ranch residence has a rectangular plan and a side-gabled roof with an exterior stone chimney on the west gable end. The fenestration consists of a centered main entrance with side lights and four six-over-six vinyl sash windows on the outer two bays. The roof, supported by wood posts, extends to cover the carport on the east elevation.

Outbuildings: A wood frame studio (2006) is located behind this residence.

<b>13. Dwelling</b>	177 Chestnut Street	1934	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Cape Cod	1.5 / 3

This residence has a side-gabled roof with an exterior brick chimney on the west gable end and gabled dormers along the front elevation. A projecting bay has a gable with cornice returns and a recessed main entry flanked by single light windows. The remaining fenestration consists of single and paired four-over-one wood sash windows and bay windows on the side elevations. A porte-cochere is present on the west elevation. The foliage surrounding this residence obscures the view from the public right of way. Additions: one-story addition with six-over-six sash windows and an entry was added to the north elevation

Outbuildings: Detached garage (1971) with a front-gabled roof and sheathed in clapboard siding.

Education	Brick	Asphalt - shingles	Greek Revival	2 / 4
Architect: John Dunn. The original section of this building has a hipped roof and a 3x1 rectangular plan. A denticulated cornice stretches across the front facade and the west elevation. A two-bay shed roof porch with wood posts is partially enclosed. Fenestration along the front facade consists of the main entrance with side lights and a glass transom, six-over-six, eight-over-twelve, and one-over-one sash windows with shutters. On the second level, there are eight-over-twelve and one-over-one sash replacement windows. A two-story 1x3 bay shed-roof stucco addition was constructed on the north side of the building, and a one-story flat roof addition is located at the rear. Additions: two-story addition on front facade and rear elevation; Alterations: converted into an office, part of the front porch enclosed				
Outbuildings: Detached one-car garage on west elevation. A U-shaped building is present on the rear elevation.				
<b>15. Alma Hendrick House</b>	204 Chestnut Street	1930	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Bungalow - gable front	1.5 / 2
This frame residence has a hipped roof with a front gable, hipped dormer on the west elevation, and interior brick chimney on the east elevation. The front gable has three one-over-one vinyl windows. The right bay of the front elevation contains a recessed front entry porch supported by a single Doric column. The left bay contains a one-story canted bay with one-over-one vinyl sashes. Additions: One-story addition with a shed roof added at the rear elevation.; Alterations: Replacement windows				
Outbuildings: None				
<b>16. Samuel McCorkle House</b>	218 Chestnut Street	1909	Contributing	2
Residential	Wood - Weatherboard	Asphalt - shingles	Colonial Revival	1.5 / 3
This residence has a hipped roof and hipped dormers on the south, east, and west elevations. A large front gable sheathed in wood siding with paired one-over-one vinyl sash windows dominates the front facade. The recessed wraparound porch is supported by Doric columns. Fenestration consists of one-over-one vinyl sash windows. Additions: One story addition with 2/2 horizontal windows and a screen door. Another one-story addition connects the garage to the main residence.				
Outbuildings: Detached two-car garage with a front-gabled roof.				
<b>17. Dwelling</b>	227 Chestnut Street	1995	Non-contributing	0
Residential	Vinyl	Asphalt - shingles		0 /
This building is obscured by vegetation. Aerial imagery indicates that it is a side-gabled residence with three gabled dormers.				
Outbuildings: None.				
<b>18. Dwelling</b>	246 Chestnut Street	1906	Contributing	1
Residential	Vinyl	Asphalt - shingles	Bungalow - gable front	1.5 / 2
This residence has a rectangular plan, a front-gabled roof, and hipped dormers with one-over-one vinyl windows on the east and west elevations. The front gable has three one-over-one vinyl sash windows, and the partial recessed front entry porch is supported by turned spindle columns. A bay window bay on the first floor includes three one-over-one vinyl sash windows. The remaining fenestration consists of the main entrance and one-over-one vinyl windows. Alterations: vinyl siding, replacement vinyl windows

Outbuildings: Detached car garage (1950) with a front-gabled roof.

<b>19. Dwelling</b>	259 Chestnut Street	1940	Contributing	1
Residential	Wood - Shingle	Asphalt - shingles	Minimal Traditional	1 / 4

This wood frame residence has a rectangular plan and a side-gabled roof with an interior brick chimney centered along the roof line. The rightmost bay contains a shallow projecting front gable with a picture window. The remaining fenestration along the front facade consists of sliding vinyl windows and the main entrance. An attached one-car garage is situated beneath the first floor of the main residence. Alterations: vinyl

Outbuildings: None

<b>20. Dwelling</b>	268 Chestnut Street	1954	Contributing	1
Residential	Metal - Aluminum	Asphalt - shingles	Other	1 / 4

This residence has a side-gabled roof with a centered gabled dormer and an exterior brick chimney on the east elevation. The roof steps down to a lower section of a house on the south end. A cross-gable section projects from the rightmost bay and a small gabled entryway is located within the left third of this projecting bay. The fenestration along the front facade consists of single and paired eight-over-eight vinyl sash windows and a multi-light picture window flanked by six-over-six sash windows and fixed shutters. The exterior of this residence is clad in brick and aluminum siding on the projecting bay and east elevation. Alterations: replacement windows

Outbuildings: None

<b>21. Dwelling</b>	404 Church Street	1941	Contributing	1
Residential	Metal - Aluminum	Asphalt - shingles	Colonial Revival	1.5 / 5

This residence has a side-gabled roof, an exterior brick chimney on the south elevation and an interior brick chimney along the roof line. The gabled dormers in the central bay and southern wing have six-over-six vinyl sash windows and the northern wing has a gabled wall dormer with paired four-over-four vinyl sash windows with shutters. A scalloped cornice stretches across the central bay. A one-bay gabled porch extends over the front entrance. The fenestration along the front facade consists of eight-over-eight vinyl sash windows, a bay window with four-over-four sash windows and paired six-over-six vinyl sash windows. Additions: one-story addition was added to the east elevation of the north elevation; Alterations: vinyl replacement windows

Outbuildings: A detached two-car, concrete-block garage (1978) is accessed from Laing Street. It has a side-gabled roof covered with asphalt shingles.

<b>22. Dwelling</b>	424 Church Street	1951	Contributing	1
Residential	Brick	Asphalt - shingles	Colonial Revival	1 / 5

This residence has a side-gabled roof, exterior brick chimneys on the north elevation, and two gabled dormers with three-over-one sash windows along the front facade. A one-bay gabled porch with barrel-vaulted ceiling supported by classical columns marks the front door, which has side lights and a fanlight. The fenestration along the front facade consists of picture windows flanked by one-over-one windows on either side of the front door. A one-story gabled wing extends from the north elevation and contains a sash window and picture window. An attached carport is located on the south elevation. Additions: Carport; Alterations: vinyl replacement windows

Outbuildings: A detached one-story, one-car garage and car port are located behind this residence.

**LINE 4: Outbuildings**

This residence has a hipped roof, a gabled dormer with a Palladian window and twin interior stone chimneys on the north and south elevations. The exterior is random course stone with birdbeak mortar joints. A hipped roof extends across the front facade and is supported by paired Doric columns that rest on stone piers with a balustrade. The centered main entrance has sidelights and a transom. The fenestration on the first and second floor consists of one-over-one double-hung vinyl sash windows surrounded by quoins. There are projecting bays with one-over-one double-hung vinyl sash windows on the north and south elevations. Alterations: replacement windows, boarded window in the gabled dormer on the south elevation

Outbuildings: One-story outbuilding with a stone foundation, asphalt shingle side-gabled roof and centered brick chimney. The exterior is covered with wood. (1950-1960)

<b>24. Dwelling</b>	442 Church Street	ca. 1960	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 5

This Ranch residence has a side-gabled roof with an interior brick chimney located along the roof line. The main roof, supported by Doric columns, extends over the front elevation to form a three-bay front porch. The main entrance is centered and flanked by side lights. The fenestration along the front facade consists of one-over-one windows one either side of the front door and large multi-pane windows within the one-story wings on either side of the center section of the house.

Outbuildings: None

<b>25. St. James Episcopal Church</b>	468 Church Street	1951	Contributing	1
Religion	Stucco	Asphalt - shingles	Modern	1 / 3

This church has a steeply pitched front-gabled roof. The narthex of the church is stucco, and the front (west) elevation contains central double wooden doors covered by a bracketed shingle shed roof, narrow six-pane windows on either side of the door, and a tall, narrow window with cross muntins above the door. The exterior of the nave is brick. On the north and south elevations, there are six-over-six sash and one-by-one sash windows situated between full height brick piers. A cornerstone is inscribed "SAINT JAMES EPISCOPAL CHURCH 1951 FOUNDED IN 1881." A separate one-story, L-shaped brick building is connected to the church by a covered walkway. The fenestration along this building consists of six-over-six sash windows, one-over-one sash windows, and casement windows. Additions: One-story brick building is connected to the main church by a covered walkway. A two-story addition with a steeply pitched building was added behind the main building. It has paired four pane windows above six pane windows.

Outbuildings: None

<b>26. Sydenstricker-McLaughlin House</b>	471 Church Street	1906	Contributing	1
Residential	Brick	Asphalt - shingles	Colonial Revival	2.5 / 3

This residence has a hipped roof with a triangular gabled dormer covered with fish scale shingles and a Palladian window on the front facade and semi-circular windows on the north and side elevations. An interior brick chimney rises from the center of the roof. A one-story, wraparound veranda supported by Doric columns extends across the front facade and north elevation. The centered main entrance is flanked by decorative sidelights and has a glass transom. Fenestration on the first and second floor consists of one-over-one sash windows with sills and lintels. Additions: One-story addition on the west elevation (2002)

Outbuildings: Unknown.

Residential	Wood - Weatherboard	Asphalt - shingles	Bungalow - gable front	1.5 / 3
This residence has a hipped roof and an interior chimney on the south elevation. A triangular gables dormer with a two-over-two window is present along the front facade and gable dormers with one-over-one sash windows are present on the side elevations. The main roof supported by Doric columns extends to cover a recessed full-width front porch. Fenestration on the first floor consists of a centered main entrance with one-over-one double-hung sash windows on the outer bays. Alterations: replacement windows				
Outbuildings: Detached two-car garage (1996) with a side-gabled roof. There are gabled dormers with one-over-one windows along the front facade and rear elevation. Fenestration consists of one-over-one windows. An exterior staircase leads to a door on the second floor of the west elevation.				
<b>32. Carnegie Hall</b>	611 Church Street	1902	Contributing	1
Education	Brick	Other	Neo-Classical Revival	3 / 8
Architect: Charles W. Barrett. This brick building has a flat roof and a cross-shaped plan. The original configuration consisted of the central 3-story plus basement section with 1-story plus basement wings on the west and east side elevations. A prominent cornice with dentils and modillions stretches around all elevations. A monumental Ionic portico with bas relief pediment ornamentation dominates the front elevation of the building. The double-leaf main entrance has a transom. Fenestration on the first and second floor consists of two-over-two aluminum-clad wood replacement windows. On the third floor, there are two-over-two and two-over-four aluminum clad wood replacement windows. Windows vary in size and have stone sills and lintels. Additions include: an additional story added to the east wing; a four-story brick tower on the east side, and a two-story brick gabled addition on the rear (south) elevation. Additions: A two-story addition was added to the rear of this building. A two-story brick addition was added to the east elevation during the 1990s renovation.; Alterations: Windows on the side elevations have been filled in with bricks, underwent renovation in the 1990s.				
Outbuildings: None				
<b>33. Old Stone Presbyterian Church Educational Building</b>	644 Church Street	1910	Contributing	1
Religion	Brick	Asphalt - shingles	Neo-Classical Revival	2 / 4
Architect: Homer Mille of Roanoke, Virginia. This religious building has a temple form with a portico supported by four fluted Doric columns. The entablature is accented with modillions, triglyphs, and disc shaped metopes. The fenestration on the first floor consists of the centered double paneled door with a wood transom and twenty-over-fifteen wood windows with decorative crowns on the outer bays. The north elevation includes multi-light windows and a two-story wing with a gabled roof and brick quoins. A one-story wing connects the educational building to the church on the south elevation. Additions: Addition added in 1952 and designed by architect Hugh Giffen, two-story wing on the south elevation

Architect: Christopher Foglestone & John Brown. This religious structure has a hipped roof with a central hexagonal belfry. The main entry has a two-leaf paneled door. A datestone above the main entry states: "This building was erected in the year 1796 at the expense of a few of the first inhabitants of this land to commemorate their affection & esteem for the holy gospel of JESUS CHRIST. Reader if you are inclined to applaud their virtues give God the Glory." The fenestration on the south and south elevations consists of twelve-over-twelve sash windows on the first floor and eight-over-eight wood sash windows on the second level. Windows have stone lintels and louvered shutters. Additions: addition on rear elevation, belfry added 1834, church enlarged 1830,; Alterations: Some of the windows have been filled-in with stones, 1968 renovation of interior and sanctuary

Outbuildings: None

<b>35. The Academy, "Greenbrier Hall" Greenbrier College</b>	653 Church Street	1921	Contributing	1
Education	Brick	Unknown	Neo-Classical Revival	3 / 15

Architect: Stanhope Johnson. This educational building is rectangular in plan and has a flat roof. A cornice with modillions extends across the front facade and north and south elevations above the third-floor windows and a stone belt course extends across the front facade and side elevations between the second and third floor windows. A monumental Ionic portico dominates the front (east) elevation. The central bay has a centered double door main entrance with a glass transom and paired one-over-one windows. There are paired single light windows with arched single light windows above the main entrance and first floor windows. Windows on the first and second floor are surrounded by an entablature and capped by a keystone. The remaining fenestration consists of paired one-over-one sash windows.

Outbuildings: None

<b>36. TAG Studio</b>	674 Church Street	2012	Non-contributing	0
Commercial	Wood - Weatherboard	Asphalt - shingles	Commercial	1 / 4

This commercial building was built into the slope of the terrain and has a side-gabled roof. A one-bay gabled porch supported by square columns covers the main entrance in the leftmost bay. The remaining fenestration consists of a band of six one-over-one windows and a door in the rightmost bay.

Outbuildings: None

<b>37. Seventh Day Adventist Church</b>	1019 Court Street N	ca.1985	Non-contributing	0
Religion	Brick	Asphalt - shingles	Modern	1 / 2

This church has an L-shaped plan and front-gabled roof. A sidewalk leads to the one-story brick ell at the rear which has a side-gabled roof and a double door main entrance. Fenestration consists of elongated vertical and horizontal single pane windows with brick sills. The central section of the side gable on the east elevation is covered with stone. Additions: One-story elongated section with the sanctuary and one-story wing with the entrance constructed between 1990 and 1997.

<b>51. Commercial Building (Converted)</b>	911 Court Street N	1900	Non-contributing	0
Commercial	Board and Batten	Asphalt - shingles	Classical Revival	2 / 3

This wood frame building has a hipped roof with an interior brick chimney. The house has a two-story pediment portico with cornice returns and full height columns. The fenestration on the first level consists of a centered main entrance and six-over-six replacement windows on the outer two bays. On the second floor, there are six-over-six replacement windows. Windows and the main entrance have fixed shutters. Alterations: Replacement siding and windows, foundation covered over with faux stone, reduced window openings on the front facade

Outbuildings: None

<b>52. Greenbrier County Courthouse</b>	912-942 Court Street N	1837	Contributing	1
Government	Brick	Metal	Classical Revival	3 / 13

Architect: John Dunn (original), David K Spotts, and Wysong. The Greenbrier County Courthouse has been enlarged by three major additions. The original section of the courthouse consists of a central temple-form structure with two-story wings extending 3 bays on either side. The center section has a front-gabled roof and a monumental two-story, three-bay portico with a pediment with a lunette supported by full height Doric columns. with an octagonal cupola along the roof line. The centered main double wood door has a multi-light transom. Two additional wood doors with transoms make up the remaining fenestration on the first floor. There are paired wood casement windows on the second level and nine-over-six sash windows on the third level. The wings contain 9/3 sash windows in each bay on both stories. The wings were extended by two bays on either side in 1938. The extensions are discernible by the slight difference in the exterior brick. The windows in the additions have the same spacing and pane arrangement as the original wings.

A two-story brick addition was added on the northern side of the 1938 wing in 1963 in a Colonial Revival style aesthetically similar to the original building. This two-story addition has a metal covered hipped roof and a centered clock tower along the roof line. The roof has two semi-circular dormer roof vents. Fenestration on this wing consists of nine-over-six double hung sash windows. This addition is connected to the north wing by a two-story brick gabled hyphen with a full-width metal shed roof porch supported by square columns. Two two-story flat-roof brick infill additions along the rear (east) elevations of the wings also appear to date from 1963.

A large two-story hipped-roof brick annex was added in 2022 to the north side of the 1963 addition. Like the 1963 addition, it has a Colonial Revival design and is connected to the earlier addition by a two-story brick hyphen. The annex has a its own entrance on Court Street marked by a one-story flat roof porch with Doric columns. The hipped metal roof has two cupolas along the roof line. Alterations: Windows on the rear elevation have been filled in

<b>128. Dwelling</b>	474 Foster Street	1955	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 3

This ranch residence has a rectangular plan and side-gabled roof with an exterior brick chimney on the west gable end. The fenestration consists of the main entrance in the center-right bay and picture windows with 4-pane sidelights in the flanking bays. The exterior of this residence has a brick water table with vinyl siding above. The main roof extends forward with a deep overhang to meet a random coursed sandstone pier and low wall which forms an at-grade patio. The water table on this part of the house is coursed sandstone.

Outbuildings: None

<b>129. Dwelling</b>	531 Foster Street	1966	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 5

This Ranch residence has a rectangular plan and a side-gabled roof. The roof, supported by replacement turned posts, extends to cover the two-bay front porch. The fenestration along the front facade consists of the centered main entrance and single and paired one-over-one vinyl windows with brick sills and fixed shutters on the outer bays. On the eastern elevation, the original carport or garage has been enclosed. Additions: One-story addition added to the rear of this house. It has an exterior brick chimney and single pane and picture windows.; Alterations: carport enclosed, vinyl windows, new posts supporting the roof

Outbuildings: None

<b>130. Dwelling</b>	572 Foster Street	1974	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 6

This residence has a linear plan and a side-gabled roof. The fenestration along the front facade consists of the main entrance, four-over-four sash windows, and a multi-pane bow window. Windows have brick sills and shutters.

Outbuildings: None

<b>131. Greenbrier County Magistrate Court</b>	127 Green Lane	ca. 1950	Non-contributing	0
Government	Stucco	Unknown	Commercial	1 / 6

This building has an L-shaped plan and a flat roof. Semicircular awnings cover the main entrances. Fenestration consists of large fixed-pane windows with concrete sills and semicircular blind arches above. Although this building is more than 50 years old, the stucco exterior and replacement windows give it a late 20th century visual aesthetic. Additions: The southeastern ell was enlarged between 1957 and 1971 (Historic Aerials)

Outbuildings: None

<b>132. Dwelling</b>	185 Green Lane	2015	Non-contributing	0
Residential	Composite	Asphalt - shingles	Craftsman Revival	1.5 / 2

This is a Craftsman-inspired cottage with a 2x4 bay rectangular plan and gable-on-hip roof. The front elevation consists of a box bay window in the left bay and the front door and paired one-over-one vinyl sash windows in the right bay. The front door is accessed by a one-bay shed-roof porch with square posts. The gable has two triangular windows and dentil wood trim. The west elevation has a shed dormer with paired sliding windows and the same dentil trim below.

Outbuildings: Matching gable-on-hip one-car detached garage

consists of the main entrance and one-over-one vinyl sash windows with operable shutters. Additions: two-story rear ell added in 1931; Alterations: 1956-rear porch enclosed

Outbuildings: Detached wood-covered garage (1930) with a side-gabled roof, sliding wood garage door, a side entrance, and two, paired single pane windows.

<b>143. Dr. Gory Hogg House "Homeland"</b>	128 Homeland Drive	1900	Contributing	2
Residential	Brick	Slate	Georgian Revival	2.5 / 7

This residence has a side-gabled roof with full cornice returns and exterior brick chimneys on the gable ends. The dwelling has three gabled dormers on the west elevation and a combination of three arched dormers and two gabled dormers on the east elevation, all with six-over-six windows. The centered main entrance is surrounded by Ionic pilasters and a frontispiece capped by a Palladian window on the second level. The fenestration consists of six-over-six windows with sills and lintels.

Outbuildings: Detached two-story, brick carriage house (1900) with a front-gabled roof and an interior brick chimney. The fenestration consists of six-over-six windows.

<b>144. John Montgomery House; James Withrow House</b>	1030 Jefferson Street N	1818	Contributing	4
Residential	Brick	Metal	Federal	2 / 5

Architect: John Weir. This 5-bay residence is constructed of brick laid in a Flemish bond and has a side-gabled roof and exterior brick gable end chimneys on the east and west elevations. A monumental one-bay two-story portico with a second-floor balcony has a simple pediment supported by thick full-height Tuscan columns with a pronounced entasis. The main entry is accented with a large fanlight and side lights. Fenestration consists of six-over-six windows with brick lintels and shutters. The residence is connected to a two-story brick building (former detached kitchen) with exterior brick chimneys on each side elevation. Additions: connector between the summer kitchen and main residence, 1905 addition; Alterations: 2002-2006 restoration of property. The original windows were replaced during the restoration.

Outbuildings: Two-story wood barn (1950s) with a metal-covered side-gabled roof and four-pane wood windows. One-story log cabin with a stone foundation and front-gabled roof covered by wood shingles. The log building was moved to this property in 1972. The third building is a small, brick building that served as the law office of James Withrow's son.

<b>145. Andrew Lewis Park</b>	105 Jefferson Street N	1785; 1974	Contributing	1
Landscape	Stone - Limestone	Wood - Shingles	Other	1 / 2

This cut limestone building has a 2x1 rectangular plan and a side-gabled roof. It was constructed over Lewis Spring and into the hillside. Fenestration consists of two small wood window openings and steps that lead to a small door. A bell from the Lewisburg Grade School, commemorative stones with plaques, and a picnic table with shelter are in the park. The lot also includes a parking area utilized by the Greenbrier County Sheriff's Office and an overlook with a commemorative limestone with a plaque about Andrew Lewis and the Battle of Point Pleasant.

This log building is constructed of hewn logs with V-notched corners and chinking. It has a 3x2 bay rectangular plan and a saltbox roof with board-and-batten gables. The building sits on a random fieldstone foundation and has a large exterior stone chimney on the northeast elevation. The northwest elevation faces Jefferson Street and contains a door in the right bay on the first floor and six-over-six wood sash windows in the other bays on the first and second floors. The southwest elevation contains one wood sash window on each story and a wooden door within the rear one-story section. A wood staircase leads to the centered wood door flanked by wood sash windows on the southeast elevation. Additions: shed roof addition on the east elevation.; Alterations: weatherboard siding removed, stone chimney added, the structure restored in the 1970s

Outbuildings: Two, small one-story log cabins with limestone foundations and side-gabled roofs. One roof is covered with metal; the other roof is covered with asphalt shingles.

<b>155. Old Red Mill Taphouse and Grille</b>	970 Jefferson Street N	1964	Contributing	1
Commercial	Wood - Log	Metal	Gable-Front	1 / 5

This building has a gabled roof and an exterior stone chimney on the south elevation. It was constructed for retail and commercial use of logs salvaged from early log buildings. It is oriented with the ridgeline parallel to Jefferson Street and the main entrance is on the north elevation. The building has a larger 3x2 bay section and a slightly smaller section extending one bay to the north. A gabled T extends from the back (east) of the building and sits atop a fieldstone foundation. An elevated board-and-batten shed-roof addition is located on the back of the T and is open at the basement level. A one-bay gabled porch roof supported by metal columns covers the main entrance. The remaining fenestration consists of a mixture of six-over-six wood sash windows on the west and north elevations and one-over-one vinyl sash windows elsewhere. Additions: frame addition on east elevation, set on piers; Alterations: Metal roof (2013), replacement windows

Outbuildings: None

<b>156. A. K. Houck House</b>	590 Jefferson Street S	1909	Contributing	2
Residential	Wood - Weatherboard	Metal	Colonial Revival	1.5 / 3

This wood frame residence has a hipped roof with hipped dormers on the south and north elevations. The front gable is sheathed in wood shingles and has paired one-over-one windows with operable shutters. The front gable is supported by Doric columns and extends to cover the wraparound front porch. Fenestration consists of a centered main entrance with a transom, a one-story projecting bay, and single and paired one-over-one windows with shutters.

Outbuildings: Detached one-car garage (1950) with a front-gabled roof is accessed from Austin Street. It has a centered window and doors on the outer two bays.

<b>157. Phillips House</b>	622 Jefferson Street S	1908	Contributing	2
Residential	Vinyl	Metal	Colonial Revival	1.5 / 3

This residence has a hipped roof with hipped dormers on the south elevation and a hipped dormer and interior brick chimney on the north elevation. A large front cross gable with paired one-over-one windows covers the recessed front porch, which features Doric columns and a wide entablature. Fenestration consists of a centered main entrance with a glass transom, paired one-over-one windows, two-over-two horizontal windows, and a projecting bay. Alterations: replacement windows, turned spindle balustrade and the corner of the wrap around front porch removed

Outbuildings: Detached garage (1920)

Architect: John W. Dunn. This inn has a side-gabled roof with an interior stone chimney along the roof line and stucco-covered chimneys on the gable ends. This former residence was built in two sections: the three-bay fieldstone south section was constructed first, and the two-bay stucco-covered brick north section was added later. A one-bay gabled porch supported by round columns covers the front entry on the west elevation within the stucco section. Fenestration consists of six-over-six and six-over-nine wood windows with stone sills, stone flat arch lintels, and operable shutters. Alterations: converted into an office then an inn, wrap-around front porch removed and replaced with the pediment (old HPI form photos taken by McBride)

<b>252. Samuel "Red Sam" McClung House</b>	132 McClung Street	1822	Contributing	2
Residential	Brick	Metal	Federal	2 / 3

Architect: John W Dunn. This residence has a side-gabled roof and two exterior brick chimneys on the western elevation. A cornice with paired brackets extends across the front facade. The dwelling has a one-story wrap around front porch, supported by Doric columns, which stretches across the front facade and western elevation. The main entrance is off-center and has a semicircular arched opening with a glass transom. The fenestration on the first and second level consists of two-over-two windows. A two-story addition with a front-gabled roof was added to the rear of this residence. It has an external brick chimney. Fenestration consists of six-over-six windows and nine-over-six windows. Additions: Two-story wood frame addition at rear.; Alterations: operable shutters removed

Outbuildings: Two-car detached garage (1940) with a front-gabled roof. The roof is covered with asphalt shingles. The garage has sliding wood doors. The exterior is covered with aluminum siding.

<b>253. Dwelling</b>	133 McClung Street	1961	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 6

This residence has a two-bay front-gabled section with a four-bay side gable section extending to the left. The main roof extends over the side gable section to form a porch with slender post supports. The off-centered main entrance is flanked by fluted pilasters. Fenestration consists of eight-over-eight windows with paneled aprons and a multi-light window.

Outbuildings: None

<b>254. Herbert Rothwell House</b>	165 McClung Street	1907	Contributing	2
Residential	Brick	Asphalt - shingles	Queen Anne	2.5 / 3

This residence has a hipped roof with projecting cross gables on the north, east, and west elevations, and gabled wall dormer on the south elevation. The north elevation has a hipped dormer with quarrel windows and an internal brick chimney. The east and north gables overhang two-story canted bays, and the west gable overhangs a curved bay. Gables contain imbricated shingles and paired quarrel windows. The fenestration consists of one-over-one wood sash windows and fixed windows with decorative transoms. Windows are flanked by louvered shutters and have stone sills and lintels. The dwelling has a one-story, wrap around veranda supported by Doric columns. Additions: A one-story addition was added to the rear of this residence. It has an asphalt shingle roof, simple cornice, and 1/1 windows. The exterior of this addition is covered with wood siding with a chevron pattern.

Outbuildings: A one-and-a half carriage house (1948) with a salt box roof covered with asphalt shingles. There are two hipped dormers with paired four-over-four windows along the front facade. An external brick chimney is present on the southern elevation. Fenestration consists of six-over-six and one-over-one windows. A two-car concrete block garage is attached to this building.

<b>255. Dwelling</b>	752 McElhenny Road	1971	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 3

This residence has a side-gabled roof with an interior brick chimney. A front gable caps the one-story projecting bay with a centered sliding door. The remaining fenestration consists of the main entrance and paired one-over-one windows. An attached one-car garage is present on the south elevation. Alterations: replacement windows

Outbuildings: None

<b>262. Dwelling</b>	116 Preston Blvd	1954	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 7

This residence has a linear side gable section with a hipped ell projecting forward from the left side of its front elevation. The long portion of the house has a coursed sandstone water table with board-and-batten siding above and the hipped ell is red brick. The central entry is recessed and includes a modern steel door and sidelight. The fenestration on the front elevation consists of two one-by-one vinyl sliding windows at the far edges of the ell, three small sliding windows along the center portion of the elevation and three continuous sliding glass windows in the rightmost bay. An attached one-car garage is situated on the east elevation and is accessed from N Court Street.

Alterations: replacement vinyl windows

Outbuildings: Brick front-gabled shed (2022) is located behind the residence.

<b>263. City of Lewisburg Police Department; Municipal Courts</b>	119 Preston Blvd	1973	Contributing	1
Government	Brick	Asphalt - shingles	Colonial Revival	2 / 5

This government building has a rectangular plan and side-gabled roof. The main roof extends to form a full-width five-bay, two-story porch supported by full-height fluted columns. Fenestration along the front facade consists of the centered main entrance with side lights and an elliptical transom and six-over-six sash windows in the bays on both floors. A one-story wing with six-over-six sash windows and an entrance flanked by pilasters and an entablature is situated on the east elevation. Additions: One-story wing on the east elevation.

Outbuildings: None

<b>264. Dwelling</b>	134 Preston Blvd	1954	Contributing	2
Residential	Wood - Weatherboard	Asphalt - shingles	Ranch	1 / 3

This ranch residence has a rectangular plan and a side-gabled roof. The fenestration along the front facade consists of paired one-over-one windows, a single pane fixed window flanked by one-over-one sash windows, and the main entrance. A one-story wing appears to have been added to the rear elevation. Additions: A one-story wing was added to the north elevation.; Alterations: replacement windows

Outbuildings: A two-story, wood frame carriage house (1970) with a side-gabled roof was constructed at the rear of this lot. It is sheathed in weatherboard and has single and paired horizontal windows. On the first floor, it appears to have two openings covered with board and batten.

<b>265. Dwelling</b>	135 Preston Blvd	1954	Contributing	1
Residential	Brick	Asphalt - shingles	Ranch	1 / 4

This ranch residence has a rectangular plan and a side-gabled roof with an exterior brick chimney on the east gable end. A central gabled projecting bay has a one-over-one window that is hidden by vegetation. A porch roof extends from the left side of the center gable and is supported by wood columns that rest on a brick base. The main entrance and a picture window with 1/1 sash sidelights are located under the porch roof. An attached one-car garage is situated in the rightmost bay

This residence has a distinct mid-century aesthetic with an asymmetrical front-gabled roof with very deep eaves. The front elevation consists of a slightly projecting two-story two-bay section on the left with fieldstone on the first floor and vertical wood siding on the upper story. A metal cantilever balcony extends across the elevation and is accessed by two doors. Windows are fixed pane in geometric groupings. The roof extends down to the right over a fieldstone section containing the front entrance, a single door flanked by large fixed-pane windows and a three-pane triangular transom above. A large side-gabled section extends to the south behind the entryway.

Outbuildings: None.

<b>330. Lewisburg Post Office</b>	1129 Washington Street E	1938	Contributing	1
Government	Brick	Metal	Colonial Revival	1 / 5

Lewis A. Simon, Architect; WPA, Builder. This building has a 5x6 bay rectangular plan with a hipped roof. A frieze board with the words "UNITED STATES POST OFFICE" stretches across the front facade and side elevations. The centered main entrance has side lights and two glass transoms. It is flanked by 1 1/2 pilasters and capped with an entablature. The remaining fenestration consists of twelve-over-eight sash windows on the outer bays and on the side elevations. The building has a large rear brick addition with a metal shallow-pitch mansard roof, no windows on any elevation, and four loading docks on the rear elevation. Additions: Two-story brick addition with a hipped roof added to rear; Alterations: metal roof

Outbuildings: None

<b>331. Lewisburg United Methodist Church</b>	1133 Washington Street E	1904-1905	Contributing	1
Religion	Brick	Asphalt - shingles	Romanesque Revival	2 / 8

Architect: ZMM, (1990s addition). This church has a cruciform plan oriented parallel to Washington Street. The east elevation on Lee Street is 3 bays and contains: the main entrance, a recessed double-leaf door with a 5-light transom and square columns and pilasters; a large stained glass window above the main entrance with three sash windows topped by a four-pane round arch; and tall, narrow stained glass windows in the outer bays made up of a 1/1 sash below a 1/1 arched sash. The south elevation contains four arched 1/1 stained glass sash windows on the nave and a large arched stained-glass window in the transept. The bell tower/steeple is located within the exterior ell of the south transept. It contains another set of doors with an arched transom, and narrow stained glass sash window on the two upper levels. The steeple consists of a square louvred belfry and a hexagonal spire. The steeply-pitched side-gabled roof, an interior brick chimney and a front gable with three stained glass windows and a narrow louvered vent. A 3x4-bay gabled section extends north from the nave and contains three tall arched windows on its east elevation and arched and flat 1/1 sash windows on the north. The church sits on a rough-hewn random coursed limestone foundation. An extensive one-story brick addition with a multiple sections and cross-gables was added to the north and west of the church in the 1990s. Additions: bell tower (1914), steeple (1920), education building (1954), addition (1990s)

Outbuildings: None

<b>332. Livery Tavern</b>	1134 Washington Street E	2012	Non-contributing	0
Commercial	Wood - Weatherboard	Metal	Commercial	1 / 3

This restaurant has a front-gabled roof and cupola with four-light windows. The front-gabled features an exposed king-post truss that is supported on wood posts and extends to cover the front porch. The fenestration consists of a wood door and four glazed, diamond patterned single light windows. Additions: Concrete block addition at rear; Alterations: wood siding replaced asbestos shingle siding, cupola added, new entrance and replacement windows, side gable on east elevation

A front cross-gable marks the rightmost two bays of the front elevation. A one-bay shallow gabled supported by fluted columns covers the centered main entrance, which has side lights and a transom. Fenestration on the first and second floor consists of two-over-two sash windows with operable shutters. A two-story shed-roof addition is located within the rear ell. Additions: One-story wing with a side-gabled roof covered with metal added to the rear elevation. Roof extends to cover the porch. Fenestration consists of multi pane and casement windows.; Alterations: Metal roof

Outbuildings: Two-story, two-car garage with gabled wall dormers behind the residence (1939).

<b>361. Lemon's House</b>	1505 Washington Street E	1893	Contributing	4
Residential	Wood - Weatherboard	Asphalt - shingles	Queen Anne	2 / 3

This U-plan wood frame residence has a side-gabled roof with an interior brick chimney along the roof line, and a wide semi-hexagonal tower with a pyramidal roof occupying the leftmost bays of the front elevation. A cornice with brackets extends across the front facade and the east and west elevations. A one-story wrap around veranda is supported by turned spindle posts. The fenestration consists of a centered main entrance with side lights and transom and single, paired, and triple one-over-one windows. The exterior of the second floor is covered with fish scale patterned wood shingles. The house has two rear gabled ells with a two-story infill addition between them. Alterations: spindle balustrade removed, exterior painted

Outbuildings: Detached two-story, two car, concrete block garage with a front-gabled roof (1958). One and a half story wood building with a metal side-gabled roof and paired one-over-one windows. Small concrete block building with a hexagonal roof. Shed dates 1930 and 1950.

<b>362. Jenkins-Creigh-Holt House</b>	1546 Washington Street E	1834	Contributing	2
Residential	Brick	Asphalt - shingles	Federal	2.5 / 3

Architect: John Dunn. This residence has a side-gabled roof and two exterior brick chimneys on the east and west elevations. A monumental portico capped by a pediment with full-height, fluted Ionic columns extends to cover the main entrance. The centered main entrance has side lights and a semi-elliptical fanlight. Above the main entrance is a twelve-over-twelve window flanked by six-over-six sash windows and a fanlight. Fenestration on the first and second story consists of triple six-over-six sash windows on the outer bays. A one-story brick addition with a side-gabled roof is present on the east elevation and a porte-cochere on the west elevation. Additions: porte-cochere on the west elevation; Alterations: According to the HPI form by Taylor the original portico replaced by current one

Outbuildings: Two-story wood carriage house (1935)

<b>363. Dwelling</b>	1573 Washington Street E	1921	Contributing	2
Residential	Metal - Aluminum	Asphalt - shingles	Colonial Revival	2 / 3

This wood frame residence has a hipped roof with an interior brick chimney. A two-story gabled canted bay projects from the rightmost bay of the front elevation. A one-story, wraparound veranda is supported by Doric columns, it has been enclosed on the west elevation. Board and batten siding covers the centered main entrance's side lights and transom. Fenestration consists of one-over-one sash windows with faux shutters. Alterations: Transom and side lights covered, aluminum siding, part of veranda enclosed

Outbuildings: Detached two-car garage (1921) has an asphalt shingle, front-gabled roof and is sheathed with aluminum siding.

<b>364. Nina Holt House; George Alderson</b>	1574 Washington Street E	1890	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Queen Anne	2.5 / 5

This residence has a hipped roof with projecting gabled bays on the front and west elevations and interior brick chimneys along the roof line. The gables have partial cornice returns and have paired one-over-one sash windows. A one-story wrap around veranda supported by Doric columns and turned spindle balustrade extends across part of the front facade and west elevation. The centered main entrance has side lights and a transom. A one-story wing with three multi-light windows is on the east elevation and a porte cochere is located on the west side. The remaining fenestration on the first floor consists of a bay window and multi-light windows. On the second floor there are single and paired nine-over-nine windows with operable shutters.

Outbuildings: Detached one-car garage (2005) with a steep, asphalt-shingle, side-gabled roof. It appears a wood staircase is present on the eastern elevation.

<b>365. Althea Mathews House</b>	1598 Washington Street E	1885	Contributing	1
Residential	Wood - Weatherboard	Asphalt - shingles	Gabled-Ell	2 / 3

This residence has a cross-gable roof with interior brick chimneys along the roof line. A partial double gallery porch is supported by paneled square columns and decorative balustrades. Fenestration on the first floor consists of a centered double door main entrance and paired one-over-one sash windows. A front-gabled two-story projecting bay contains paired one-over-one sash windows with shutters. Alterations: replacement windows

Outbuildings: A detached garage (1950) is located behind this residence and is not visible from the street.

<b>366. W. E. Sellard House</b>	1599 Washington Street E	1927	Contributing	2
Residential	Metal - Aluminum	Asphalt - shingles	Gable-Front	2 / 2

This residence has one large and one small front gable and an exterior brick chimney on the east elevation. A one-story front porch supported by paired turned spindle posts extends across the front facade and has a metal railing on the second floor. The double door main entrance has side lights. Fenestration consists of a large multi-pane window and nine-over-one sash windows with shutters. A two-story projecting bay is present on the east elevation. Alterations: aluminum siding, shutters, multi-light window

Outbuildings: Detached two-car garage with a metal, side-gabled roof (1927).

side of the center section. and is covered by a semi-spherical awning. Windows are generally multi-pane casements. Some windows have semi-circular transoms. An arched breezeway is present on the west elevation.

Outbuildings: One garage (C). One guesthouse/poolhouse (C).

<b>394. Mrs. J North Caldwell House</b>	2141 Washington Street E	1949	Contributing	2
Residential	Vinyl	Asphalt - shingles	Colonial Revival	2 / 3

This residence has a side-gabled roof with two interior brick chimneys on the north elevation. A one-bay flat roof porch supported by Doric columns marks the front entrance and has an x-cross roof railing. The centered main entrance has side lights and multi-light transom and is flanked by fluted pilasters. The remaining fenestration along the front facade includes eight-over-eight sash windows with fixed shutters on the outer two bays. The west elevation has a rounded portico supported by Doric columns. The remaining fenestration consists of single and paired one-over-one sash windows with fixed shutters. Alterations: siding

Outbuildings: A covered walkway connects the main house to the detached two-car garage (1950) with a front-gabled roof and cupola.

<b>395. Dwelling</b>	2183 Washington Street E	1953	Non-contributing	0
Residential	Metal - Aluminum	Metal	Ranch	1 / 6

This residence has a side-gabled roof and appears to have two additions. The fenestration on the main building consists of a recessed and centered main entry with six-over-six replacement window and a multi-light replacement window on the outer bays. The central section is a long and narrow one-story addition with an entry and vinyl windows. The second addition is situated on the western end and extends to the south. It has a pair of centered French doors and is topped with a louvered cupola. Due to extensive additions, this property does not retain integrity. Additions: one-story, large addition on the west elevation and a second one-story addition that extends in a southern direction; Alterations: metal roof, vinyl windows

Outbuildings: Frame utility shed with a metal roof

<b>396. John A North House; Frazier's Star Tavern</b>	814 Washington Street W	1820	Contributing	2
Recreation and Culture	Brick	Wood - Shingles	Federal	2 / 6

Architect: John Dunn. This residence has a 5x3 rectangular plan and a hipped roof with two interior brick chimneys. It is oriented perpendicular to Washington Street so that the front elevation faces southeast towards Church Street. The two-story portico features octagonal columns, a dentiled cornice, and a second-floor veranda with a balustrade. The main entry within the portico has sidelights, an elliptical transom, and paired square and round engaged columns. The balcony is accessed by a centered door with a trabeated surround with engage columns. Fenestration on the front facade consists of six-over-nine windows with classical surrounds and operable shutters in each bay on both stories. The same window type occurs generally in each bay on the side and rear elevations. A one-story wing with large glass windows and three Doric columns at each corner is present on the north elevation and appears to be a converted porte cochere. The south elevation features a two-story sunroom with engaged columns and classical paneling on the exterior and continuous wood sash windows. Two-story 1x5 bay wood clapboard gabled additions are present on the south and rear elevations. The fenestration includes six-over-six sash windows with operable shutters. Additions: Two, two-story additions were constructed at the rear of this former residence and have metal covered side-gabled

roofs with cornice returns. One addition has shed dormers. The exterior of these additions is covered with aluminum siding.; Alterations: Additions, shutters

Outbuildings: Two-story, three-bay wagon building with a side-gabled roof is located to the south of the North House. A shed roof extends to cover the one-story, front porch. It is supported by wood columns and railings. Fenestration on the first floor consists of multi pane windows. On the second floor, there are small, four-pane windows.

<b>397. Shuck Memorial Baptist Church</b>	841 Washington Street W	1938	Contributing	1
Religion	Brick	Metal	Colonial Revival	2 / 3

This church has a temple form with front-gabled roof and monumental portico. A pediment with a center oculus is supported by four full-height Doric columns and extends to create the front portico. Concrete and stone steps lead to the centered double door main entrance with an enclosed fanlight. Fenestration along the front facade consists of single sash and paired stained glass casement windows with sills on the first and second levels. On the first floor, the windows and doors have brick lintels and a stone keystone. The side elevations have two-story, arched stained glass windows. Alterations: Metal roof

Outbuildings: None

<b>398. Bowyer-Grow-Foster House Humble Tomato</b>	855 Washington Street W	ca. 1790	Contributing	1
Commercial	Wood - Weatherboard	Metal	Hall & Parlor	2 / 3

This log structure is sheathed with wood clapboard. The front section has a side gabled roof, faces Washington street, and contains six-over-nine wood sash windows in each of the three bays on the first floor and six-over-six windows on the second floor. A gabled ell extends from the northeast side of the building. A metal hipped roof porch extends three bays along the southeast elevation, where the main entrance is located. Windows generally consist of six-over-six wood sashes. The north and west side of the building have multiple one-story additions. Additions: one-story additions were added to the west and north elevations; Alterations: log building covered with siding, wooden stairs, converted from residence into restaurant

Outbuildings: One-story, former garage (2001) was converted into a kitchen that sits on a brick foundation on the north elevation. It is clad in wood siding and has a metal covered side-gabled roof.

Commercial	Brick	Unknown	Romanesque Revival	3 / 6
------------	-------	---------	--------------------	-------

Architect: James M. Lee. This commercial building has a flat roof with a corbelled cornice. The building is 6 bays on the Washington Street elevation and 5 bays on Court Street. The building has a tripartite facade with a rusticated base, brick upper stories, and a prominent cornice. Bays are delineated by full-height stone and brick piers, and the sills and lintels are marked by rusticated stone belt courses. A brick gable is located above the two leftmost bays on the Washington Street elevation and contains a stone with the word "Bank." The chamfered corner contains the main entrance surrounded by arched rusticated stonework; the upper two floors contain are glass doors with fan lights that open to small metal scrollwork balconies. A sign panel inscribed "1897" is placed above the third story. Fenestration on the Washington Street elevation consists of, on the first floor: two single-pane display windows with fanlights, a single door with fanlight, and a storefront with recessed entrance flanked by rectangular fixed-pane display windows; on the second floor and third floors, paired 1-over-1 sash windows with fanlights. The Court Street elevation is simpler with much less rusticated stone and facade detail; each bay on all floors contains an arched wood sash window with an arched brick lintel and stone sill Alterations: Some windows filled in with brick

large, elaborate obelisks. Some plots are enclosed by wrought iron fencing. Stone retaining walls run along Church and Court Streets. Plantings are minimal and consist of scattered trees and shrubs.

Outbuildings: None.

<b>424. Dick Pointer African American Cemetery</b>	Church Street and McElhenny Road, NW Corner	ca. 1850	Contributing site	1
Funerary				

This cemetery is approximately 0.75 acres. It is located on a sloping lot just across Church Street from the Old Stone Church Cemetery. The land was donated in 1854 for use as a cemetery for enslaved people. The cemetery contains 112 known gravesites but the local preservation group for the cemetery estimates that the cemetery contains about 350 burials, most unmarked. Markers include a variety of traditional materials and designs. Landscape features include scattered trees and shrubs. A large random course cut stone monument topped with a sphere memorializes Dick Pointer, an enslaved man who aided in defense of Fort Donnally in 1778 and died in 1827.

## 8. Statement of Significance

### Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☒ A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ B. Property is associated with the lives of persons significant in our past.
- ☒ C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ D. Property has yielded, or is likely to yield, information important in prehistory or history.

### Criteria Considerations

(Mark "x" in all the boxes that apply.)

- ☐ A. Owned by a religious institution or used for religious purposes
- ☐ B. Removed from its original location
- ☐ C. A birthplace or grave
- ☐ D. A cemetery
- ☐ E. A reconstructed building, object, or structure
- ☐ F. A commemorative property
- ☐ G. Less than 50 years old or achieving significance within the past 50 years

**Statement of Significance Summary Paragraph** (Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

This document provides an update to the original 1978 National Register nomination for the Lewisburg Historic District, including clarification of the Period of Significance and National Register boundary, and a comprehensive inventory and evaluation of all properties within the boundary. This document extends the Period of Significance to 1974. It is not a boundary expansion.

The Lewisburg Historic District is significant at the local level under Criterion A in the area of Commerce and Criterion C in the area of Architecture. In 1782, the Virginia General Assembly established Lewisburg as the county seat of Greenbrier County. Lewisburg's central business district developed at the intersection of two major roads: the Midland and Seneca Trails. It served as a commercial center for local businesses, financial institutions, restaurants, specialty stores, and professional offices. Throughout its history, Lewisburg served as an important commercial center for the surrounding agricultural, coal, timber, and railroad industries as well as tourists.

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

Lewisburg is also eligible under Criterion C in the area of Architecture. The Lewisburg Historic District contains a dense concentration of residential and non-residential structures constructed in a variety of architectural styles including Colonial Revival, Ranch, Minimal Traditional, Federal, Greek Revival, Cape Cod, and others. Architectural styles range from the colonial period to the present-day and represent Lewisburg's development from a frontier settlement to a small city.

The Period of Significance for the Lewisburg Historic District is 1784 to 1974, beginning with the date of construction of the Jesse Bowlin House, the oldest extant resource within the historic district and concluding in 1974 when the West Virginia School of Osteopathic Medicine opened on the former campus of the Greenbrier Military School. The Period of Significance of 1784 to 1974 covers Lewisburg's earliest resources dating to its settlement period to the establishment of one of the city's important institutions 50 years ago.

---

**Narrative Statement of Significance** (Provide at least **one** paragraph for each area of significance.)

**Criterion A**

The Lewisburg Historic District is significant at the local level under Criterion A: Commerce. Lewisburg's central business district developed along major transportation routes at the intersection of the Midland and Seneca Trails. Early commercial buildings including taverns and shops were constructed along these major transportation routes and geared towards tourists who were visiting from nearby springs, attorneys and judges who were attending court, and drovers who were transporting cattle and crops to markets. Throughout the 1800s, industries such as tanneries, glove making, and wood working developed along the Seneca Trail.

**Criterion C**

The Lewisburg Historic District is locally significant under Criterion C: Architecture. The majority of buildings in Lewisburg represent important, popular architectural styles and forms dating from the colonial period to the present day, including log cabins, Federal, Greek Revival, Colonial Revival, Italianate, Victorian, Cape Cod, Craftsman Bungalow, and Ranch. A number of the early extant resources are credited to John Weir and John Dunn, two early brick masons and architects. The styles and forms of the residential and commercial buildings of Lewisburg illustrate the town's history from its importance as a colonial town, site of early courts in western Virginia, and private education to becoming a commercial center along the Midland and Seneca Trails to its variety of residencies and businesses in the 20<sup>th</sup> century.

***Background and Previous Documentation***

The Lewisburg Historic District was listed in the National Register of Historic Places in 1978. The nomination document inventoried 198 total resources including 120 contributing resources (using the obsolete designations of 66 "pivotal" and 54 "secondary" structures) and 78 non-contributing resources ("non-conforming intrusions"). Some of the remaining buildings were

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

identified in accompanying sketch maps as neutral structures, neither contributing or non-contributing. It was difficult to determine a property's eligibility based on the accompanying sketch maps. The nomination also provided a list of Inclusive Street Numbers, indicating the extent of the district based on ranges of street addresses, but did not include a comprehensive individual inventory of every property within the district. The Period of Significance was unspecified, although it is assumed to have ended in 1928, 50 years prior. Since 1978, additional resources with a date of construction after 1928 have become eligible for listing on the National Register of Historic Places. In addition, the National Register boundary was unclear; the boundary specified by the UTM points differs from the boundary provided in the sketch map. Both versions of the boundary cut through parcels. This nomination clarifies the National Register boundaries, establishes a Period of Significance, and provides a comprehensive inventory of all properties within the boundary.

### *Historic Context*

#### *Exploration and Early Settlement*

The Greenbrier Valley around Lewisburg was utilized by indigenous people including the Six Nations of the Iroquois and Western Cayuga and Seneca (called Mingo by European settlers). These tribes used early trails including the Kanawha Trail and Seneca Trail for communication, hunting, trading, and traveling purposes.<sup>1</sup> Early European explorers and surveyors traveled along the same trails as they explored the Greenbrier Valley in the early to mid-eighteenth century.

In 1745, Virginia granted 100,000 acres of land in the Greenbrier Valley to the Greenbrier Company, a land speculator.<sup>2</sup> The Greenbrier Valley included land along the Greenbrier River in present-day Greenbrier, Pocahontas, and Monroe counties in West Virginia.<sup>3</sup> Andrew Lewis, an early explorer and captain in the Orange County, Virginia militia<sup>4</sup>, surveyed the area before the Greenbrier Company started promoting the land to potential settlers. During this survey, Lewis and other surveyors discovered a clear spring in present day Lewisburg.<sup>5</sup> Settlers began moving into the Greenbrier Valley in the early 1750s. These early settlements included one in the "Big Levels" area (near present-day Lewisburg), Muddy Creek, and McDowell Bottoms outside of Alderson. However, attacks by indigenous people resulted in settlers leaving the area and settling instead in Virginia's Shenandoah Valley.

In 1774, Virginia Governor Lord Dunmore ordered a mission to prevent a rumored attack by indigenous people as territorial conflicts increased. One part of his plan ordered over 1,000 militiamen from nearby counties to meet at Camp Union, Col. Andrew Lewis' Virginia Militia camp, near Lewisburg. Under the leadership of Andrew Lewis, now a colonel, the militiamen

County and State

marched westward towards Point Pleasant, where they battled with Mingo and Shawnee warriors. Some of the militiamen settled in Lewisburg after the war. A number of factors contributed to the town's growth including the militia's presence in the area, an increased number of forts in the Greenbrier Valley, and improved trade.

Greenbrier County was originally partitioned from portions of Montgomery and Botetourt Counties in present-day Virginia. The Virginia General Assembly passed an act creating Greenbrier County in 1777 and the county was officially formed in 1778. Its original boundaries stretched west from the Allegheny Mountains to the Ohio River and encompassed seventeen counties in present-day central and western West Virginia.<sup>6</sup> This act also established the location for the courthouse at Colonel John Stuart's house and the day court would be held. The earliest recorded meeting at the courthouse took place during the November 1782 term.<sup>7</sup>

In the 1750s, there were two documented forts located within the Greenbrier Valley: Baughman's Fort, west of Alderson and one at Marlin's, possibly in Marlinton in Pocahontas County. Other forts were constructed in the Greenbrier Valley in 1774 such as Arbuckle's Fort on John Keeny's property at the confluence of Mills and Muddy Creeks.<sup>8</sup> A fort was not located in Lewisburg until Captain John Stuart (Stewart) constructed one between 1776 and 1777. It is referred to as the "fort at Camp Union," "fort on the levels," "Fort Charles on the levels", or "Fort Charles"; by the 1830s this fort is referred to "the Savannah Fort" or Fort Savannah in Revolutionary War pension applications.<sup>9</sup>

### *Early Development of Lewisburg*

On October 7, 1782, the Virginia General Assembly passed an act establishing the town of Lewisburg, named in honor of Andrew Lewis. Lewisburg encompassed a total of 40 acres of land that were divided into streets with half-acre lots.<sup>10</sup> Three east-west and three north-south streets were designated. The act also required buyers to construct a dwelling 20 feet by 16 feet with a stone or brick chimney within four years of the date of purchase. Following passage of this act, surveyor Captain Thomas Edgar (1750-1822) was selected to lay out the town. Edgar laid out Lewisburg in a grid pattern with 16 large blocks each divided into 4 smaller lots for a total of 64 lots. The plat map included six streets including Market (now Court), Jefferson, Lafayette, Randolph, Washington, and German Streets (now Foster).

This act also required the trustees named in the legislation to sell the remaining lots at public auction. According to trustee John Reid's records, 28 of the 64 lots were sold at public auction in 1784 with another 8 sold three years later in 1787.<sup>11</sup> Some of the buyers purchased multiple lots

but did not immediately build on all of them. The first permanent settlers in Lewisburg included Captain Mathew Arbuckle, John Lockhart, Thomas Renick, and Thomas Edgar.

Early settlers constructed one-story log cabins and businesses along major transportation routes and near Lewis Spring which is located behind the Greenbrier County Courthouse. A small limestone building was constructed to protect the spring in the late eighteenth century. Two-story log buildings were later constructed along Washington Street, also known as the Midland Trail and US Route 60, the successors of the James River and Kanawha Turnpike. Some of the log buildings are extant and have been covered with weatherboard.

Early construction in Lewisburg also consisted of a small number of stone structures that were located near the Midland Trail. The first stone residence constructed in Lewisburg was the Thomas Edgar House located at 895 North Court Street (No. 229). In the early 1790s, Edgar resided in a two-story, Federal-style residence measuring 20 feet by 16 feet with an exterior stone chimney. Constructed in 1796, the Old Stone Church (No.33) at 644 Church Street was another early stone structure. This two-story church building replaced an earlier log cabin. Colonel Stuart carved a stone with the message "This building was erected in the year 1796 at the expense of a few of the first inhabitants of this land to commemorate their affection and esteem for the gospel of Jesus Christ; reader if you are inclined to applaud their virtues give God the glory" that was placed above the church's entrance.

One of the primary methods of transportation for early settlers and farmers was narrow, dirt roads. In 1781, the first public road between Warm Springs, Virginia and Lewisburg was constructed. The exact location of this road is not described in detail but based on early maps, it may have roughly followed the present-day routes Interstate 64 to Callaghan, Virginia and US 220 to Warm Springs.<sup>12</sup> Another early road was constructed between Lewisburg and Kanawha County for traveling and trading purposes. In 1785, construction of the Old State Road, the predecessor of the James River and Kanawha Turnpike and Midland Trail, began. This road followed the route taken by Colonel Andrew Lewis to Kanawha Falls then to Point Pleasant.

In 1790, the first census counted the residents of the United States. However, Virginia's records from the 1790 and 1800 censuses were destroyed during the War of 1812 when the British burned Washington. Available tax records for Greenbrier County between 1783 to 1786 show the population was 6,015 people including 319 enslaved people.<sup>13</sup>

### *Nineteenth Century*

In the late eighteenth and early nineteenth century, Greenbrier County's economy was agriculture-based. Early residents of Lewisburg grew crops such as corn, potatoes, and wheat and raised cattle, hogs, and horses. The soil found in the Greenbrier Valley was rich in nutrients and

provided fertile pastureland for raising livestock, particularly horses. Some Lewisburg residents owned enslaved people who worked on the farms and plantations while other enslaved people performed skilled and unskilled labor in industries such as brickmaking. Enslaved people also worked at the “Old White” – the present-day Greenbrier Resort in White Sulphur Springs – and other nearby resorts.<sup>14</sup>

Early development in Lewisburg included the construction of educational, industrial, governmental, religious, and commercial buildings. Private education in Lewisburg can be traced to the early 1800s when Dr. John McElhenney, pastor of the Old Stone Church, established the first private school. Oral tradition noted he opened this school in 1810 inside his home to educate young men in the classics. While a two-story, brick building was constructed on Church Street in 1812, Greenbrier County residents petitioned the Virginia General Assembly to incorporate the Lewisburg Academy, the school founded by McElhenney.<sup>15</sup> The Virginia General Assembly chartered the Lewisburg Academy, a co-educational institution, the same year. Architect and brick mason John Weir constructed the first two-story, brick school, the first brick building in Lewisburg.<sup>16</sup> It was destroyed by fire and by 1861, it was rebuilt. Figure 1 shows the location of the Lewisburg Academy in 1825.

An industrial area developed in Lewisburg along the Seneca Trail on the site of present-day Montwell Commons. This area had a number of facilities that manufactured products including gloves, chairs, spinning wheels, and shoes.<sup>17</sup> In the early 1800s, William Morrow, a tailor, opened a tannery north of “The Barracks” on North Jefferson Street to manufacture leather. He later sold the lot to James Withrow who also operated a successful tannery on the site.<sup>18</sup> Another early businessman was Hugh Donnally who manufactured gloves from buckskin and other animals for men and women. The Donnally Glove Factory also operated at the Montwell Commons site.<sup>19</sup> Donnally sold the gloves in Lewisburg, to guests of the Greenbrier Resort, and to customers when he traveled to New York.<sup>20</sup> Wood products were also manufactured in Lewisburg. Tommie Henning, a cabinet maker and painter, produced chairs, spinning wheels,

and cabinets from local timber at his business.<sup>21</sup> He sold his chairs throughout Greenbrier County including to the “Old White.”<sup>22</sup>

Growing commerce and the demand for better roads led to the construction of turnpikes. In 1820, the Virginia General Assembly passed legislation authorizing the James River Company to erect a road between the James and Great Falls of the Kanawha near present-day Gauley Bridge in Fayette County. The selected route for the James & Kanawha River Turnpike, an east-west toll road, ran parallel to its predecessor the Old State Road. It was located on the north side of the New and Kanawha Rivers and traveled through Greenbrier and Fayette counties.<sup>23</sup> Construction of this turnpike was completed in 1822. Stagecoaches transported passengers, mail, and freight along the James & Kanawha River Turnpike with stops in Lewisburg. Lewisburg’s built environment included taverns, inns, and livery stables to accommodate travelers and drovers who transported cattle and other livestock to markets.

In the early 1830s, two buildings related to Lewisburg’s role as the site of court and the county seat were constructed. The Virginia General Assembly passed legislation in 1831 requiring the Supreme Court of Appeals to hold an annual session in Lewisburg during the month of July.<sup>24</sup> The Western Division of the Supreme Court of Appeals was established to serve the people living west of the Allegheny Mountains. Both lawyers and jurists traveled to Lewisburg to attend court. Seeing the need for a law library in Lewisburg, James Frazier constructed one on his property. Constructed in 1834, the former Greenbrier County Library Building (No. 76) served as a law library until 1864 when the court ceased operation due to the Civil War. Three years later in 1837, the Greenbrier County Courthouse (No. 52) was constructed on a vacant lot at 912 North Court Street. Designed by John W. Dunn, the present Greenbrier County Courthouse replaced an earlier courthouse that was located on the corner of Washington and Church Streets.<sup>25</sup> Additions to the courthouse were added in 1937 and 1963 and a two-story annex was completed in 2023.

Improvements in infrastructure as well as the establishment of a bustling economy continued to encourage the settlement of Lewisburg. The population increase led to a building boom and the construction of single-family residences and commercial buildings. As a result of the region’s newfound wealth, the architecture of the region began to reflect the more elaborate designs of eastern markets through the work of architects/brick masons John Weir and John W. Dunn. Between 1812 and 1847, John Weir and John Dunn constructed residential, religious, governmental, educational and commercial structures in the Federal and Greek Revival styles of architecture. The following tables highlight the structures credited to John Weir and John W. Dunn.

The majority of the large, two-story brick residences extend outward in each direction from the central business district. Between 1800 and 1865, prominent Lewisburg residents such as attorneys, judges, educators, and businessmen constructed large residences in higher architectural styles on large lots. These residences were concentrated along Jefferson and Washington Streets with a smaller number along Lafayette, Chestnut, Randolph, Court, Courtney, and Walnut Streets. These two-story structures represent a time when architects and builders looked to the past and utilized stronger and more permanent building materials such as brick and stone. The residences are three-to-five bays and have more high-styled architectural details including two-story porticos, Doric columns, cornices, and exterior brick chimneys.

Greenbrier County contained a diverse population which included white inhabitants, free Black residents, and enslaved people. The number of white residents increased from 4,046 inhabitants in 1800 to 10,500 in 1860. By 1835, the population of Lewisburg reached 750 inhabitants.<sup>26</sup> In Lewisburg white men worked in the trades as blacksmiths, tanneries, carpenters, and brick layers as well as in professional fields as judge, attorneys, doctors, and educators. Greenbrier County's Black population consisted of a mixture of free Black and enslaved people. Slave ownership ranged from less than five to hundreds with the enslaved people working on farms and nearby resorts as well as making bricks.<sup>27</sup> The number of enslaved people in Greenbrier County increased from 297 in 1800 to 1,525 in 1860 while the number of free Blacks ranged from two in 1800 to 186 in 1860. (Table 3). Free Black people were employed as barbers, shoemakers, farmers, and brick masons.

Table 3: Population Figures From the Twelfth Census of the United State Bulletin (Page 2) and the West Virginia Culture Population Figures by Race.<sup>28</sup>

During the Civil War (1861-1865), the white residents of Lewisburg largely supported the Confederacy. At various points during the war, both Confederate and Union troops occupied Lewisburg with the Union primarily retaining control. Both the Union and Confederacy utilized the James River & Kanawha Turnpike to transport soldiers and goods. Buildings including the Old Stone Presbyterian Church, Greenbrier County Library, the John Wesley United Methodist Church, hotels, and offices were used as military hospitals for wounded and sick soldiers.

On the morning of May 23, 1862, a brief battle occurred in Lewisburg when Confederate General Henry Heth launched an attack on Union soldiers. Union soldiers were encamped near the Old Stone Church and present-day campus of the New River Community & Technical College. During the battle, cannonballs occasionally hit residences and buildings including the John Wesley United Methodist Church on Foster Street. Union soldiers forced Confederate soldiers to retreat across the Greenbrier River. At the conclusion of the battle, 204 Confederate soldiers were either killed, wounded, or captured, compared to 90 Union soldiers.<sup>29</sup>

Approximately 96 unknown Confederate soldiers were later buried in a cross-shaped grave at the Confederate Cemetery which overlooks Lewisburg on the western end of town (No. 257).

Residential development in Lewisburg slowed following the Civil War. Between 1870 and 1896, eighteen of the twenty extant structures constructed were one-story, one-and-a-half story or two-story single-family dwellings. These residential structures represented popular architectural styles including Victorian, Queen Anne, Italianate, Colonial Revival and Second Empire. Similar to residences constructed earlier, these two-story, single-family dwellings were constructed on large lots primarily along Washington Street East, Randolph Street West, Jefferson Street N, Lafayette Street, and North Lee Street. Many of the residences are L-shaped and feature one-story, full-width or partial front porches while a smaller number of the residences are cottages. Two-story projecting bays with front gables are common. High-style architectural details include turrets, decorative vergeboard, fish-scale shaped shingles, decorative window sashes, and quoins.

In the mid-1870s, private schools that educated young women and men separately emerged. In 1875, the Virginia General Assembly chartered the Lewisburg Female Institute, a private school and successor of the Lewisburg Academy, to educate young women. Young women were taught Latin, Home Economics, music, and art at the Lewisburg Female Institute. The following year, a new two-story academic building and later a dormitory were constructed on the campus of the Lewisburg Academy on Church Street.<sup>30</sup>

Between 1870 and 1890, young men were educated either by private teachers or at public schools such as the Lewisburg Graded School.<sup>31</sup> Thomas Gilmore opened the Greenbrier Male Academy or Gilmore Academy in 1890 with 90 male students attending. The original school building was located on land near the corner of Washington and Dwyer Streets; however, it was destroyed by fire. Beginning in 1896, young men were educated at private schools located on North Lee Street. The name of the schools changed multiple times before Col. H. B. Moore and his brothers Capt. Joseph Moore and Capt. D. T. Moore established the Greenbrier Military School in 1922.<sup>32</sup> In 1926, the three-story, Collegiate Gothic style school was built at 400 N Lee Street. The Greenbrier Military School continued to educate young men until 1972 when it closed.

While new residential and commercial development was limited following the Civil War, the railroad, coal, and timber industries were emerging in the surrounding area. Lewisburg's commercial center developed with businesses that catered to both residents and visitors. In the book *Hardesty's West Virginia Counties*, Lewisburg's commercial district in 1884 is described as having "six general mercantile establishments, one grocery store, one drug store, one restaurant, one tannery (operated by Withrow), one marble yard, two furniture factories, one hotel, two livery stables, one national bank, one jewelry store, two barber shops, four blacksmith shops, two merchant tailors, six churches (four white, two black), two carriage factories, one

female institute, one school building, one town hall, one Masonic Lodge, one lodge of Odd Fellows, one Court of Foresters, one chair factory, one post office (money order), one printing office, one millinery establishment, two shoe shops, three mantau (clothing) makers, two harness and saddlery houses, one resident surveyor, five resident physicians, two dentists, seven ministers, and ten attorneys.”<sup>33</sup> The types of businesses including the tannery, furniture, chair, and carriage factories, and clothing and shoe shops represent a time when goods were produced locally by skilled craftsmen rather than mass-produced by machines.

On the morning of August 3, 1897, a fire destroyed thirteen wood structures in the business section of Lewisburg. The fire blazed along Main Street to North Court Street, destroying retail stores, law offices, and the Bank of Greenbrier.<sup>34</sup> Following the fire, property owners began rebuilding the commercial district and the city established its first fire department. Two of the first buildings constructed following the fire were the Greenbrier Valley Bank Building (No. 410) at 930-942 Washington Street West and the old Lewisburg Bank-Elks Building (No. 407) at 931 Washington Street West. The Greenbrier Valley Bank was designed by James M Lee of the Lee Military Academy in the Colonial Revival style of architecture.<sup>35</sup> These two buildings were soon followed by the David Hammond/Thomas White Law Office (No. 414) at 959-963 Washington Street West and the Yarid Building (No. 411) at 935 Washington Street West in 1899. Over the next twenty years, additional brick commercial structures were constructed along Washington Street.

*Twentieth Century: 1900 to 1974*

Residential and commercial development continued through the turn of the twentieth century. The population of Lewisburg increased as a result of the nearby coal, timber, and railroad industries. Even though these industries were not directly in Lewisburg, coal operators such as James B. Laing and other management officials resided and established offices in Lewisburg. Commercial architecture of this era was often designed to express the values and qualities of the businesses within. During the decades of significant industrialization and economic growth, prior to the predominance of radio and television advertising, a company’s building served as an important means of conveying attributes such as prosperity, stability, trustworthiness, security, and innovation.

Lewisburg’s population continued to increase during the early twentieth century resulting in the construction of single-family dwellings. (Table 4) Sanborn Fire Insurance Maps from 1905, 1910, and 1923 show one-story, one-and-a-half story, and two-story residences along Walnut, Green, German, Lafayette, Randolph, and Main Streets. The residences featured in the Sanborn maps are concentrated near the central business district. The majority of the single-family dwellings are of wood frame construction while a smaller number are brick or stone. The shape

Table 4: Population Figures Between 1890 and 1930. Population Figures from US Census Bulletins.

In 1902, Carnegie Hall (No. 32) was constructed on the campus of Lewisburg Female Institute. It replaced a building that had been destroyed by fire the previous year. Steel tycoon Andrew Carnegie contributed \$26,750 and the community raised \$10,000 to fund the construction of this brick building.<sup>36</sup> The architectural firm of Barrett & Thompson designed Carnegie Hall in the Greek Revival style of architecture. Carnegie Hall provided students with classroom space, studios, labs, and an auditorium. It operated until 1972 when it closed and briefly became part of the Greenbrier Center, a facility for special needs individuals. In 1983, a group of citizens formed Carnegie Hall, Inc. to save the historic building from demolition. Carnegie Hall was restored and utilized for performances, art education programming, and gallery space.

A new method of transportation emerged in the early twentieth century. The Lewisburg & Ronceverte Electric Railway, a short-line railroad, was chartered in 1905 to connect Lewisburg and the Chesapeake & Ohio Railroad in Ronceverte. Italian immigrants and local residents constructed this 6-mile interurban railway line along a section of present-day US Route 219 ending at a passenger station near the Neely Building at 916 Washington Street West.<sup>37</sup> It was completed in 1907 and transported freight, mail, and passengers. Six years later in 1913, overhead wires were installed, and the locomotives were converted from steam to electricity.<sup>38</sup> The Lewisburg and Ronceverte Electric Railway constructed a train depot on Echols Lane in Lewisburg. In 2016, due to the threat of demolition, the train depot was relocated. The Lewisburg & Ronceverte Electric Railway operated until 1931 when the company closed, and the tracks were removed.

After World War I (1914-1918), a number of commercial buildings, residences, schools, and roads were constructed in Lewisburg. The 1923 United States Geological Survey Topographic map shows a heavily developed commercial district along Washington Street between Church Street and Lafayette Street. These two-story and three-story commercial buildings were

(Source: USGS)

Between 1921 and 1926, three new school buildings were constructed in Lewisburg: Greenbrier Hall, Greenbrier Military School, and Lewisburg High School. Greenbrier Hall (No. 35) was constructed in 1921 on the campus of Lewisburg Seminary, formerly the Lewisburg Female Institute at 653 Church Street. Architect Stanhope Johnson designed the three-story academic building in the Neo-Classical style of architecture. Another academic building was constructed on the campus of the Greenbrier Military School, a private school for young men, located at 400 North Lee Street. In 1926, a three-story academic building designed in the Collegiate Gothic style was constructed to replace a building that caught fire the previous year.

In 1924, Lewisburg's first public high school that educated white students was built at 232 North Lee Street. Prior to its construction, Lewisburg did not have a public high school. White students traveled to Ronceverte on the L&S Railway to attend high school. However, the 1923 Sanborn Fire Insurance Map of Lewisburg shows a school at this location. In 1924, Lewisburg High School (No. 217) was constructed in the Classical Revival style of architecture. The building

Lewisburg Historic District Additional  
Documentation

County and State

served as the high school until 1968 when schools were consolidated and students began attending Greenbrier East High School.

Automobiles soon replaced the electric railroad as they became more popular, and roads were improved with hard surfaces. In 1920, the West Virginia Legislature designated 4,600 miles as the state highway system.<sup>39</sup> Two roads in Lewisburg, the Midland Trail, formerly the James River & Kanawha Turnpike and the Seneca Trail, the predecessor of US Route 219, were included in this classification. Both roads were widened and paved with bituminous macadam. Over the next few years, the Midland Trail, which ran along Main or Washington Street in an east-west direction, was designated US Route 60. The Seneca Trail ran in a north-south direction along Jefferson Street and was designated US Route 219. The designation of US Route 60 resulted in sections of this road being realigned including in the western end of the historic district between the North House and former Greenbrier County Library building.

The 1923 Sanborn Fire Insurance Map shows a transition in transportation-related businesses in Lewisburg's central business district. Public and private garages, auto repair shops and car dealerships had replaced wagon shops and carriage facilities. Two car dealerships were constructed on West Washington Street in the 1920s: the Colonial Ford Building (No. 400) at 878 West Washington Street and the Lewisburg Chevrolet Building (No. 403) at 886 West Washington Street. Constructed in 1928, the Colonial Ford Building is two-story brick commercial building while the Chevrolet Building is a one-story brick commercial building. Two gas stations were later constructed in the Lewisburg Historic District at 864 Washington Street W in 1954 (No. 399) and at 1092 Washington Street E in 1970 (No. 325). The gas station at 864 Washington Street W has since been converted into a restaurant while the other continues to operate as a gas station.

When the stock market crashed in October of 1929 and the country entered the Great Depression, development in Lewisburg decreased. President Franklin D. Roosevelt created programs through the New Deal to help unemployed Americans return to work. In 1935, the Works Progress Administration (WPA) was created and focused on infrastructure projects such as building schools, roads, and hospitals. One WPA project in Lewisburg involved constructing additions to the Greenbrier County Courthouse. West Virginia architect A. F. Wysong (1881-1944) designed two-bay extensions to the two-story brick wings.<sup>40</sup> Construction of the additions began in 1937 and employed approximately 82 local workers.<sup>41</sup>

The WPA also erected a new post office (No. 330) at 1129 East Washington Street. In 1937, the Town of Lewisburg purchased land belonging to Hallie M. Sibold and construction began on the one-story brick building.<sup>42</sup> Supervising Architect of the Treasury Department Lewis A. Simon (1867-1958) designed the Lewisburg Post Office in the Colonial Revival style of architecture.

The interior of the post office features a mural entitled “Old Time Camp Meeting.” Artist Robert Franklin Gates painted this mural that depicts an early traveling preacher delivering an outdoor sermon to settlers.<sup>43</sup>

*World War II to 1974*

While the overall population of Greenbrier County decreased, Lewisburg experienced population growth during the mid-to-late 20<sup>th</sup> century. (Table 5) Lewisburg’s population steadily increased from 1,202 in 1910 to 3,065 in 1980. Following World War II, additional single-family dwellings were constructed on vacant lots along the perimeter of the Lewisburg Historic District. These residences continued to be designed in popular early 20<sup>th</sup> century styles such as Colonial Revival, Cape Cod, Tudor Revival, and Arts and Crafts as well as mid-century styles including Minimal Traditional, Ranch, and Split Levels. The majority of single-family dwellings constructed during this era are smaller in size compared to those erected in the nineteenth century. The residences are linear and frequently have an attached garage.

	1940	1950	1960	1970	1980

Lewisburg District	3,376	3,760	3,823	4,326	N/A
Lewisburg Town	1,466	2,192	2,259	2,407	3,065

Table 5: Population Figures Between 1940 and 1980. Population Figures from the US Census Bulletins.

A small number of commercial buildings were constructed throughout the central business district following World War II. These commercial buildings are concentrated along Randolph, Lafayette, East Washington, Court, and North Jefferson Streets and represent the simple design of this period. The buildings, including the two at 393 and 399 East Randolph Street (No. 270), have a linear plan with minimal architectural details. The majority of these commercial buildings are detached one-story and two-story, brick buildings with large display windows on the first floor. Professional offices, restaurants, a grocery store, and the Greyhound Bus Station occupied the first floor of these buildings.

With increased automobile traffic following World War II, highways were being planned and constructed for higher speeds. The passage of the Federal Aid Highway Act of 1956 resulted in West Virginia being assigned four interstate highways: I-64, I-70, I-81 and I-77. Construction of I-64, a 173-mile east-west superhighway between Huntington and the WV/VA state line, began in 1957 and was completed in 1988. Interstate 64 was constructed 1.5 miles north of the Lewisburg Historic District. While a small number of residences within the historic district have been converted into use as bed and breakfasts, hotels as well as chain restaurants, automobile-related services, and shopping centers are located outside the historic district. The lack of these modern intrusions assists the Lewisburg Historic District in maintaining its historic character and integrity.

The newly constructed superhighways resulted in travelers bypassing once thriving downtown business districts. Consequently, discussions began in the 1960s to develop a former industrial site on North Jefferson Street into a tourist destination. A variety of businesses including the Withrow Tannery, Donnally Glove Factory, Lewisburg Steam Roller Flour Mills, and Lewisburg Milling and Electric Company once occupied this site. In 1961, the corporation Old Red Mill planned to convert the Bluegrass Mill Building, a three-story building constructed in 1905 that housed Lewisburg's first electric light plant, into a country store.<sup>44</sup> However, the building was destroyed by fire shortly before opening day, leaving its stone foundation. A log building (No. 155) was soon constructed on its stone foundation, using antique logs salvaged from other buildings in the county. The Old Red Mill group had planned to construct a village and museum; however, their efforts to establish a museum did not materialize. One of the organizers, Rosalie Detch, opened the Fort Savannah Inn, a pioneer-themed motor lodge. Fort Savannah Inn utilized the log building as a restaurant and reception area, and two separate motel buildings were constructed. The motel buildings were razed in 2013.<sup>45</sup> Today, this site is known as Montwell Commons.

In 1972, both private schools, the Greenbrier Military School and Greenbrier College, closed their doors. The 43-acre Greenbrier Military School campus became the Greenbrier College of Osteopathic Medicine. It was founded in 1972 by a group of osteopathic physicians who believed rural West Virginia needed a school to train doctors.<sup>46</sup> The same year, the college acquired the three buildings belonging to the former Greenbrier Military School. The buildings underwent renovation over the next two years and opened in 1974 with 36 medical students. The other private institution, Greenbrier College, became Greenbrier Center, a facility for special needs individuals and later the Greenbrier Campus of the New River Community & Technical College.

Since the 1970s, Lewisburg continues to grow in both population and size. New residential and commercial development between 1974 and 2024 makes up approximately 1.4% of the total number of buildings in the Lewisburg Historic District. The majority of new development is found north of the historic district on each side of Jefferson Street N (Seneca Trail) and within close proximity to I-64. Lewisburg's population was 3,922 inhabitants in 2020.<sup>47</sup> Lewisburg remains a small city with a rich education, cultural, and law tradition as well as governmental center. The city benefits from a thriving tourism industry with a number of retail businesses, restaurants, and bed and breakfasts located in the central business district. Since 1923, the West Virginia State Fair has been held one mile south of Lewisburg in the town of Fairlea, drawing large crowds each August from inside and outside of the state. In 2011, readers of the magazine *Budget Travel* named Lewisburg the "Coolest Small Town" in America.

County and State

***Architecture***

The architecture found in the Lewisburg Historic District ranges from the colonial period to the present-day. It also represents the wide spectrum of architectural styles found in West Virginia and the United States. Early residential and commercial buildings were constructed utilizing local materials including wood and limestone while later construction materials include brick, vinyl siding, aluminum siding, and asbestos. The diversity of styles, massing, and sizes highlights Lewisburg's rich architectural history and reflects the changing design influences in the nineteenth and twentieth centuries.

**Log**

The earliest log structures in Lewisburg were constructed in the late eighteenth and early nineteenth centuries of native materials. Log cabins were used as dwellings as well as for holding religious services and government meetings. Constructed of native timber, these buildings had notched corner posts and side-gable roofs sheathed in wood shingles. An exterior brick or stone chimney is typically present on one of the gable ends. One extant two-story log structure is "The Barracks" (No. 154, Photo 3) at 934 N Jefferson. Other early log cabins in the district have been covered with weatherboard.

**I-House**

Residences with a central passage plan were found in large numbers throughout the Lewisburg Historic District. Constructed in the nineteenth century, central passage residences have a rectangular plan and are two rooms wide and one or two rooms deep with a center hallway. The main entrance is usually centered along the front façade. Like the log cabins, central-passage residences were constructed of local material and lacked stylistic embellishments. Identifying characteristics include weatherboard siding, side gable roof, and chimneys on the gable ends or along the roofline.

**Federal**

Following the Revolutionary War, new and more formal styles of architecture gained popularity in the United States. British architect Robert Adams created the Federal style, also known as the Adams style, after he traveled to Italy to study classical buildings. Information about the Federal style was distributed in architectural plan books that were utilized by carpenters and builders. It was prominent in the United States between the 1780s and 1840s and is often associated with the early US government.

Prominent citizens in Lewisburg hired brick masons and architects John Dunn or John Weir to construct some of the Federal style residences and commercial buildings. These permanent structures were constructed of brick. Residences constructed in the Federal style have a square or rectangular shape and are two rooms or more in depth. Federal style buildings feature strict symmetry and balance often expressed in a five-bay façade with a central entry and double hung

Lewisburg Historic District Additional  
Documentation

Greenbrier County, WV

Name of Property

County and State

sash windows in the outer bays. Other characteristics of the Federal style include semi-circular or elliptical fanlights above the front door and cornices with dentils or other decorative moldings.

A number of Federal-style buildings are found in the Lewisburg Historic District. One of the best-known Federal style residences is the John Montgomery House at 1030 Jefferson Street N (No. 144). Other buildings include the McClenachan-Welch House at 137 Chestnut Street (No. 11), James Withrow House & Store (also known as the "Community House"), the Samuel McClung House at 132 McClung Street (No. 252), and the Rev. John Spotts House at 489 Randolph Street E (No. 276).

### **Greek Revival**

During the early to mid-nineteenth century, the Greek Revival style was popular in the United States. This style reflected the idealism associated with the newly established democratic system and its rejection of ties to England following the War of 1812. Americans began looking towards ancient Greece rather than England due to the Greece's role in creating democracy. Builders constructed a variety of public buildings including banks, churches, and government buildings as well as residences in the Greek Revival style. It was a prominent style of architecture between 1830 and 1850 and tends to be associated with wealthy and prominent landowners.

Architectural details mirrored those from Greek temples including porticos with triangular pediments supported by Doric columns. Greek Revival houses could take a front-gabled temple form with full or partial eave returns, or a side-gabled form with a front portico and prominent end chimneys. Other recognizable characteristics include the cornice with or without dentil moldings, wide frieze band and low-pitched gable or hipped roof. Lewisburg has a small number of residences as well as the Greenbrier County Courthouse (No. 52) constructed in this style.

### **Italianate**

The Italianate style first appeared in the United States in the 1830s and 1840s.<sup>48</sup> It gained popularity due to pattern books published by landscape designer Andrew Jackson (A. J.) Downing and others.<sup>49</sup> The Italianate style took its inspiration from rural and country houses and villas in Italy. Pattern books disseminated information about this style to the American people and allowed local builders to use the information to tailor each house to the owner's tastes and pocketbook. At the same time, the invention of the balloon frame in the 1830s allowed the construction of asymmetrical residences. The balloon frame also reduced the cost and increased the speed with which buildings could be constructed.<sup>50</sup>

Italianate residences and commercial buildings are square or rectangular in shape and have low-pitched, hipped roofs. Other defining characteristics include single or paired brackets at the cornice line and tall and narrow windows with hoods. A small number of both residences and

Name of Property

County and State

commercial buildings in Lewisburg were designed in the Italianate style. Examples of the Italianate style include the Alexander Mathews House at 1335 Washington Street E (No. 350), Dennis-Caldwell House at 730 Jefferson Street S (No. 166), and the Wallace and Wallace Funeral House at 884 Jefferson Street N (No. 150)

### **Queen Anne**

During the mid-to-late nineteenth century, the United States experienced rapid industrialization. Americans began moving to urban areas from rural ones to work in factories and other developing industries. Construction materials including the dimensional lumber and ornamental wood elements were mass-produced resulting in inexpensive and readily available products. Railroads, one of the new industries, permitted mass-produced materials and pre-cut architectural details to be shipped over greater distances.

Queen Anne residences first appeared in the United States in the late 1870s. It was popularized by the work of British architect Richard Norman Shaw and his followers.<sup>51</sup> The Queen Anne style has little to no connection with Queen Anne or the formal architecture during her reign (1702-1714); instead, it draws from the Medieval models from the Elizabethan and Jacobean eras that preceded her reign.<sup>52</sup> Residences designed in the Queen Anne style are more elaborate in their architectural details. Common characteristics of the Queen Anne style include an irregular or asymmetrical plan and elevations, wrap around porches, turrets, bay windows and wall texture created by shingles, wood siding, and half-timbering.

### **Commercial Vernacular**

In the late nineteenth and early twentieth centuries, cities and towns including Lewisburg were rapidly growing. Industrialization, specifically the neighboring coal, timber, and railroad industries contributed to the growth of Lewisburg. Additional commercial buildings in the downtown central business district were needed. In order to accommodate new businesses, structures were constructed with two or three stories and minimal ornamentation. Their organized elevations, consisting of regular bays and stories, descended from classically based styles such as Federal and Greek Revival, but design elements were simplified to serve the functions needed in an economical and practical way. Technological innovations in plate glass production allowed storefronts to be built to display the goods within. Ornamentation, where present, consisted of decorative brickwork integrated into the façade, and applied mass-produced wood and metal cornices.

These buildings were designed for commercial use and had storefronts with large single pane windows on the first floor and offices or residences on the upper floors. The commercial buildings in Lewisburg ranged in height from one to three stories and from a single storefront with one entrance to double storefronts with two or three entrances. A small number of

Documentation

Greenbrier County, WV

Name of Property

County and State

commercial buildings have entrances on the corner. The majority of the entrances are recessed, have a transom, and are flanked by single pane windows. Commercial buildings with two to three entrances included one door on the outer bay that provided access to the second floor. Another feature of the commercial buildings were smaller windows on the second and third floor.

Beginning at the turn of the twentieth century, more commercial buildings were constructed of brick. Following the 1897 Lewisburg fire that destroyed a part of the commercial district. The first brick commercial buildings in Lewisburg were constructed on wide lots while those with a date of construction after the 1920s were constructed on narrow lots and have an elongated form.

### **Commercial High Style**

One of the more ornate commercial buildings was constructed of brick following the 1897 fire which destroyed part of the central business district. In 1897, the first commercial building, the Greenbrier Bank (No. 407), was designed in the Romanesque Revival style in Lewisburg and was constructed on the corner of West Washington and North Court Street. The Romanesque Revival style emerged in the late nineteenth century and were primarily used for public and commercial buildings. This style features buildings constructed of masonry, arched windows, belt courses, and a tripartite façade with rusticated base, *piano nobile*, and cornice.

### **Colonial Revival**

In the late nineteenth and early twentieth centuries, the Colonial Revival style of architecture gained popularity in the United States. It was a return to more traditional styles from the colonial period such as Federal and Georgian architecture and away from the Victorian style. The 1893 Columbian Exposition (World's Fair) in Chicago contributed to this trend as architects designed the fair's buildings in historical and classical styles.

Identifying characteristics of the Colonial Revival styles include a pediment supported by slender columns to cover the front porch, an accentuated front door with side lights or fan lights and double hung windows. A number of Colonial Revival residences were constructed in Lewisburg including the Ruth Woods Dayton House at 202 Van Sickler Drive (No. 299) and Blackburn House at 1618 Washington Street E (No. 367).

### **Cape Cod**

The Cape Cod (1925-1955) style developed as a subtype of the Colonial Revival style of architecture with modest one-story cottages modeled after wooden folk houses found in eastern Massachusetts and New York villages.<sup>53</sup> Cape Cod residences are typically symmetrical one-story with side gable roofs, dormers, an exterior chimney, centered main entrance with side

Name of Property

County and State

lights, and multi-paned, double-hung windows. They often resemble and share features with Colonial Revivals. The Cape Cod form continued in popularity through the mid-twentieth century, with increasingly simplified aesthetics, becoming a common form within the movement known as Minimal Traditional: homes taking traditional forms with low or no roof eave overhang and mass-produced materials.

### **Neoclassical Revival**

Another revival style found in Lewisburg is the Neoclassical Revival. It emerged in the first half of the twentieth century. This style was also influenced by the 1893 Columbian Exposition in Chicago where prominent architects designed the fair's buildings in classical styles. Characteristics of this style include symmetry, a full-height portico supported by Ionic or Corinthian columns. Some of Lewisburg's most notable institutional buildings are Neoclassical Revival, including Carnegie Hall (No. 32), Greenbrier Hall (No. 35), and the Old Stone Church Educational Building (No. 33).

### **Four-Square**

Four-Square is not an architectural style but a house form. This form can have design elements and features that identify with the Colonial Revival, Arts and Crafts, Mission, and other styles. It emerged in the early twentieth century and refers to a two-story house with a square floor plan with four rooms on the first floor and four rooms on the second floor. Defining characteristics include a hipped roof, gabled or hipped dormers, one-story, full-width front porch, and centered main entrance with windows on the outer bays. One example of a residence designed in the Four-Square form is the Methodist Church Parsonage at 309 Lee Street N (No. 233).

### **Arts and Crafts Movement**

The Arts and Crafts movement originated in England in the mid-nineteenth century and became popular in the United States in the late nineteenth and early twentieth century. In England, it was a reaction to the Industrial Revolution and the mass production of "substandard" products. Art critic John Ruskin wrote about relying on skilled craftsman rather than using machines to manufacture goods. Critics including Ruskin and English Architect William Morris believed mass-produced products lacked artistic merit and should clearly convey its function, structure, and material.

In the early twentieth century, residences designed in the Arts and Crafts style of architecture gained popularity in the United States. It was a reaction to the overcrowded slums found in cities and a nationwide effort to eradicate vice and diseases. The Arts and Crafts movement in the US emphasized handcrafted and quality materials over mass-produced materials and an informal lifestyle. Several Arts and Crafts residences are found in Lewisburg. Key characteristics movement include a low-pitched roof with a wide-eave overhang and brackets, the use of natural materials, and prominent front porches,

Lewisburg Historic District Additional  
Documentation

Name of Property

*Craftsman/Bungalow*

Greenbrier County, WV

County and State

Craftsman and bungalows also became a popular style and house type in the United States. Gustav Stickley, author of the magazine *Craftsman*, featured designs for furniture as well as architectural plans for the craftsman lifestyle. He created spacious rooms that highlighted beautiful woodwork and many windows to allow more natural light.

The bungalow was inspired by Charles Sumner Greene and his brother Henry Mather Greene who designed these houses in Pasadena, California.<sup>54</sup> They applied the principles of the Arts and Crafts movement to their own designs. Bungalows gained popularity as it was featured in architectural journals and builder's catalogs such as Sears and Roebuck. Customers across the United States could order pre-cut packages that could be assembled by local contractors.<sup>55</sup> Bungalows were primarily located in suburban environments but a few can be found in rural areas too. Several bungalows are found in Lewisburg including the dwelling at 262 Foster Street (No. 118).

Key characteristics of the Craftsman and bungalows include a side gable roof with large dormer, exposed rafters, recessed front porch with large (tapered) posts, decorative brackets under the eaves, and windows with a multi-pane sash over a single sash.

### **Minimal Traditional**

The Minimal Traditional style emerged in the United States between the mid-1930s and 1950s. This style of small house was constructed with Federal Housing Authority (FHA) loans during the Great Depression and for workers relocating to work at war production plants during World War II. The FHA limited the size of houses and kept sale prices down so buyers had the opportunity to purchase a home.

Key characteristics of the Minimal Traditional style include a one-story, small house, low pitched roof with minimal or no eave overhangs, multi-pane or one-over-one windows, and minimal architectural details. These homes take traditional home forms, particularly Cape Cod and Colonial Revival.

### **Ranch**

Following the Great Depression and World War II, the United States experienced prosperity and a population boom. New construction of residences was limited during these years except for small houses built under FHA financing guidelines.<sup>56</sup> However, the post-war years saw a need for more housing in communities. Returning WWII veterans and other Americans wanted a home to raise their families and a space of their own. At the same time, automobiles were

Name of Property

County and State

becoming the main mode of transportation resulting in one-story, rectangular-shaped houses being built on wider lots rather than on narrow lots near streetcar lines.

The Ranch house became a popular style throughout the United States in the 1950s and 1960s. The style originated in southern California in the mid-1930s and was loosely based on Spanish Colonial and Mexican residences found in the southwest. Similar to other styles, builder and promotor Cliff May introduced the Ranch house to readers of *Sunset Magazine*. This magazine and others also emphasized a more relaxed lifestyle in the post-World War II period.<sup>57</sup>

Ranch style dwellings were often located in large subdivisions. Ranch dwellings emphasized linear lines and garages and car ports added to their width. These residences featured larger public rooms including living rooms and kitchens. Identifying characteristics of the Ranch style include a low-pitched roof, one-story, rectilinear or elongated plans, large picture windows, off-center main entrances, and attached garages.

**Verbal Boundary Description** (Describe the boundaries of the property.)

The National Register boundary for the Lewisburg Historic District follows the parcel lines closest to the original boundaries from the 1978 nomination document. This includes, on the west, Parcel 10-19-158; on the south, parcels along Church Street, Court Street, Austin Street, Bell Drive, Lafayette Street, and Lightner Avenue; on the east, parcels along Washington Street East, Edgar Drive, Dwyer Lane, Matthews Street; and on the north, parcels along Lee Street, Greenbrier Avenue, Court Street N, Green Lane, Walnut Street, Randolph Street W, and Courtney Drive; and parcels on all intervening streets within this perimeter.

**Boundary Justification** (Explain why the boundaries were selected.)

The recommended boundary for the Lewisburg Historic District clarifies the original 1978 boundary. The UTM points and sketch map boundaries from the original nomination were mapped in GIS. Using these lines as a guide, preparers traced the nearest parcel lines. Parcels along the perimeter with uncertain status were reviewed for date of construction and integrity. If the property would qualify as a contributing resource, it was included and if was post-1974 or non-contributing, it was excluded.

---

**11. Form Prepared By**

name/title: Courtney Zimmerman, Architectural Historian & Sarah Elswick, Architectural Historian

organization: Aurora Research Associates, LLC (with Practical Preservation)

street & number: 1436 Graham Road

city or town: Silver Lake state: OH zip code: 44224

e-mail: courtney@aurora\_llc.com

telephone: 304-685-7410

date: August 11, 2025

---

**Additional Documentation**

Submit the following items with the completed form:

- **Maps:** A USGS map or equivalent (7.5 or 15 minute series) indicating the property's location.
- **Sketch map** for historic districts and properties having large acreage or numerous resources. Key all photographs to this map.
- **Additional items:** (Check with the SHPO, TPO, or FPO for any additional items.)

## Photographs

Submit clear and descriptive photographs. The size of each image must be 1600x1200 pixels (minimum), 3000x2000 preferred, at 300 ppi (pixels per inch) or larger. Key all photographs to the sketch map. Each photograph must be numbered and that number must correspond to the photograph number on the photo log. For simplicity, the name of the photographer, photo date, etc. may be listed once on the photograph log and doesn't need to be labeled on every photograph.

## Photo Log

Name of Property: Lewisburg Historic District

City or Vicinity: Lewisburg

County: Greenbrier

State: West Virginia

Photographer: Sarah Elswick

Date Photographed: October 2024, November 2024, and March 2025.

Description of Photograph(s) and number, include description of view indicating direction of camera:

- 1 of 29. Lewis Spring (1785) at Jefferson Street N, camera facing northwest.

**Paperwork Reduction Act Statement:** This information is being collected for nominations to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C.460 et seq.). We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

**Estimated Burden Statement:** Public reporting burden for each response using this form is estimated to be between the Tier 1 and Tier 4 levels with the estimate of the time for each tier as follows:

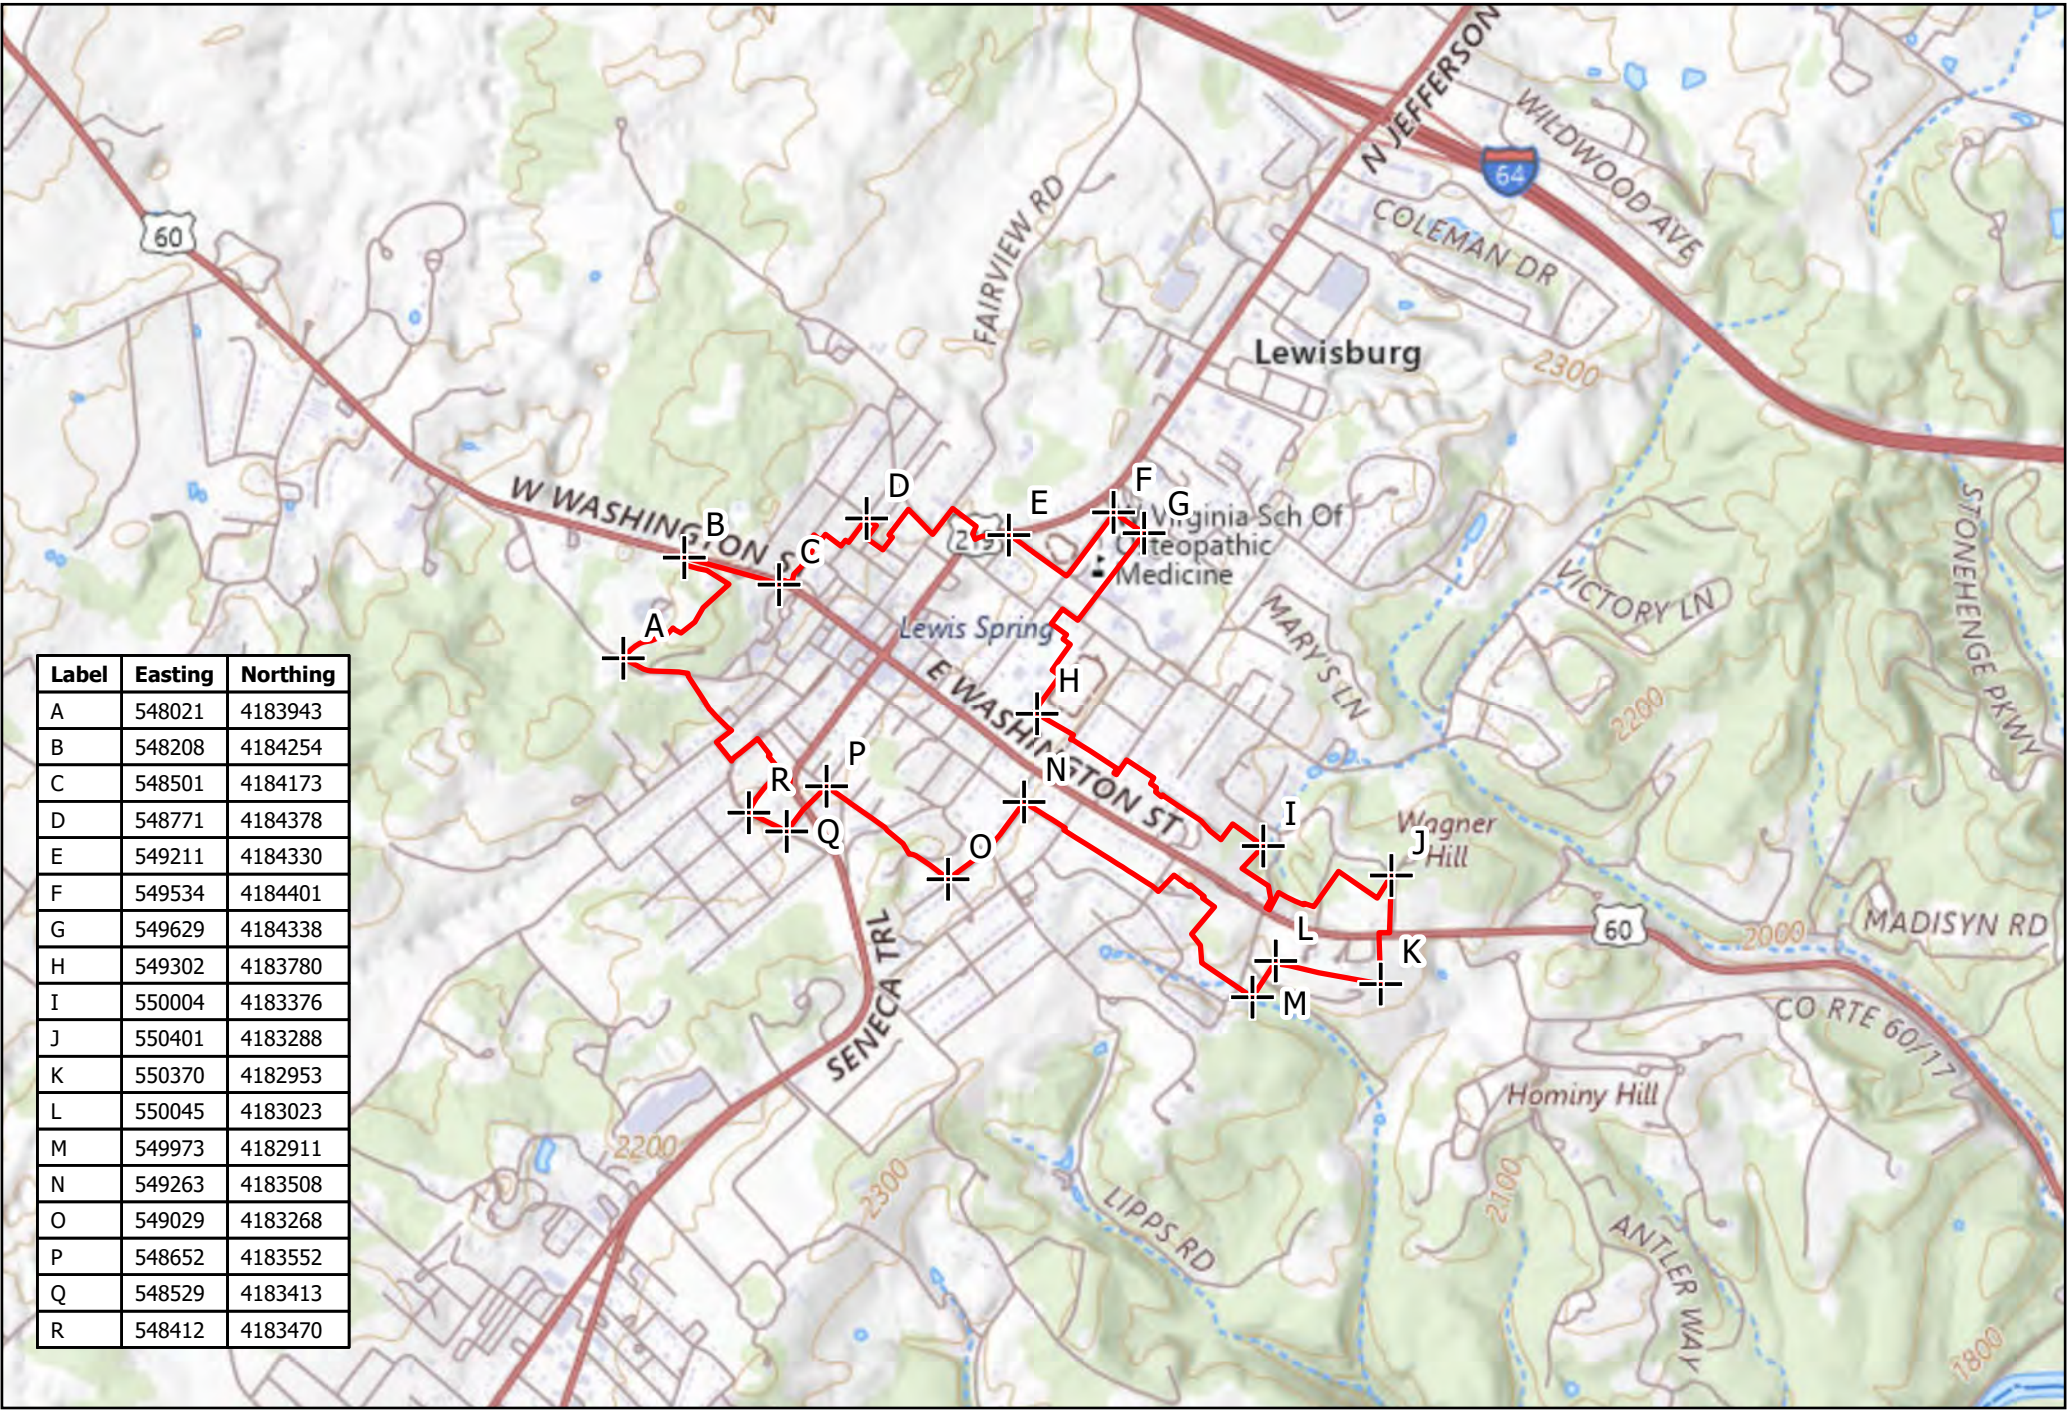

Tier 1 – 60-100 hours

Tier 2 – 120 hours

Tier 3 – 230 hours

Tier 4 – 280 hours

The above estimates include time for reviewing instructions, gathering and maintaining data, and preparing and transmitting nominations. Send comments regarding these estimates or any other aspect of the requirement(s) to the Service Information Collection Clearance Officer, National Park Service, 1201 Oakridge Drive Fort Collins, CO 80525.
